Los Angeles, California 90067

Subject: Phase I Environmental Site Assessment
South El Monte Future Park Site
825 Lexington-Gallatin Road
South El Monte, California 91733
Partner Project No. 25-486262.1

Dear Mr. Martinez:

Partner Engineering and Science, Inc. (Partner) is pleased to provide this Phase I Environmental Site Assessment (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and Client Agreement.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate your trust in Partner and the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (310) 622-8855 and dstott@partenresi.com.

Sincerely,

DB Stott

Debbie Stott
Principal

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Practice E1527-21, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Magellan Value Partners for the property located at 825 Lexington-Gallatin Road in South El Monte, Los Angeles County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Magellan Value Partners with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the northwest side of Lexington-Gallatin Road, east-southeast of Santa Anita Avenue, within a mixed commercial, residential, and recreation area of Los Angeles County, California. Please refer to the table below for a further description of the subject property:

SUBJECT PROPERTY DATA

Address(es):	825 Lexington-Gallatin Road, South El Monte, California
Additional Current Address(es):	None Identified
Historical Address(es):	None Identified
Property Use:	Commercial – currently vacant land with dilapidated building
Land Acreage (Ac):	21.18 Ac
Parcel Number:	8119-005-032
Site Assessment Performed By:	Carol Noland of Partner
Site Assessment Conducted On:	March 10, 2025
Regulatory Radius Report Date:	February 24, 2025
Lien Search Date:	N/A
Report Date:	March 18, 2025
FOIAs Date:	March 2025
Groundwater Flow Direction (Inferred):	Southwest
Estimated Depth to Groundwater (Feet bgs):	26 to 43

The subject property consists of vacant land covered with weeds and dirt. The foundation of the one former building is located on the southeast side of the site. No onsite operations are present. In addition, several square concrete bases from previous radio towers are located throughout.

According to available historical sources, the subject property was agriculturally developed land from 1928 to at least 1938. Between 1948 to at least 1994, the subject property was developed with a radio station and between 3 to 6 radio towers. The radio station was occupied by KXLA (1953) and KRLA (1953-1994).

By 2002, the radio towers appeared to have been removed and by 2022, the building on the southeast side of the site had been removed leaving the building foundation.

The adjoining properties are tabulated below:

ADJOINING PROPERTIES

Direction	Land Use/Occupant
North:	Santa Anita Avenue, followed by the Whittier Narrows Recreation Area and parking lot, and the 60 Freeway
Northeast:	Vacant property (995 Lexington-Gallatin Road)
East:	Lexington-Gallatin Road, followed by Whittier Narrows Recreation Area, Group Picnic Area and residential properties
Southeast:	Lexington-Gallatin Road, followed by Whittier Narrows Recreation Area, Group Picnic Area and residential properties
South:	Los Angeles County Parks and Recreation Maximo Training Center (750 Santa Anita Avenue) and the Los Angeles County Parks and Recreation Whittier Narrows Recreation Area maintenance yard (823 Lexington-Gallatin Road)
Southwest:	Santa Anita Avenue, followed by Whittier Narrows Recreation Area parking lot
West:	Santa Anita Avenue, followed by Whittier Narrows Recreation Area parking lot
Northwest:	Santa Anita Avenue, followed by Whittier Narrows Recreation Area North Lake

Findings and Opinions

Recognized Environmental Condition

A recognized environmental condition (REC) refers to the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- The subject property is located within the boundaries of the San Gabriel Valley (Area 1) National Priority List (NPL) site, an 11-square-mile area of contaminated groundwater in Los Angeles, California. Groundwater is contaminated with trichloroethylene (TCE) and PCE according to analyses by State agencies and local water companies. EPA conducted two five-year reviews of the Whittier Narrows and South El Monte OU's interim remedies. The subject property is located within the Whittier Narrows OU and adjacent to the South El Monte OU. The primary contaminant in Whittier Narrows is PCE. Based on the contaminant isoconcentration maps created in 2017 (EPA 2017 Annual Performance Review), the subject property is located outside the shallow zone PCE contamination zone (nearest monitoring well EPAMW4-13; depth to groundwater 27-29 feet bgs). The subject property is located within the groundwater plume with PCE contamination ranging from 0.5 to 5 µg/L in the Intermediate zone (between 150-300 and 450-600 feet bgs). Based on the confirmed groundwater contamination in the vicinity of the subject property, this listing is considered to represent a REC.

The subject property is not considered a source. Based on the current data indicating that VOCs in shallow groundwater are not above drinking water standards, availability of public water supply, remedial actions, identification of responsible parties, and regulatory oversight by USEPA, lack of VOCs in vapor at the surface, no further action related to current and future commercial or public park use of the subject property appears to be required at this time.

Controlled Recognized Environmental Condition

A controlled recognized environmental condition (CREC) refers to a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify any CRECs during the course of this assessment.

Historical Recognized Environmental Condition

A historical recognized environmental condition (HREC) refers to a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify any HRECs during the course of this assessment.

Business Environmental Risk

A Business Environmental Risk (BER) is a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice.

- Partner did not identify any BERs during the course of this assessment.

Significant Data Gaps

No significant data gaps affecting the ability of the Environmental Professional to identify a REC were encountered during this assessment.

Conclusions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of 825 Lexington-Gallatin Road in South El Monte, Los Angeles County, California (the “subject property”). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of CRECs, HRECs, or BERs in connection with the subject property; however a REC was identified. Based on the conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Practice E1527-21 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 825 Lexington-Gallatin Road in South El Monte, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-21) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the User to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "landowner liability protections," or "LLPs"). ASTM Standard E1527-21 constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with and to the extent necessary to achieve the goal of the requirements set forth in the ASTM Standard E1527-21. This assessment included: 1) a property and adjoining site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments to obtain readily ascertainable information to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched readily available information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-21, AULs include both legal (that is, institutional) and physical (that is, engineering) controls that may include legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, or surface water on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil, soil vapor, groundwater, and/or surface water on a property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the compliance and safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Magellan Value Partners (herein referred to as Client) engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Client. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

This report has been completed under specific Terms and Conditions relating to scope, relying parties, limitations of liability, indemnification, dispute resolution, and other factors relevant to any reliance on this report. Any parties relying on this report do so having accepted the Terms and Conditions for which this

report was completed. A copy of Partner's standard Terms and Conditions can be found at http://www.partneresi.com/terms-and-conditions.php.

1.5 Limiting Conditions

The findings and conclusions contain all the limitations inherent in these methodologies that are referred to in ASTM Practice E1527-21.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources, this data gap is not expected to alter the findings of this assessment.

Due to time constraints associated with this report, the Client has requested the report despite the above-listed limitations.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 825 Lexington-Gallatin Road in South El Monte, California is located northwest side of Lexington-Gallatin Road, east-southeast of Santa Anita Avenue. According to the Los Angeles County Assessor, the subject property is legally described as LOT (EX OF ST) COM N 0?02' E 581.49 FT FROM MOST S COR OF LOT 120 TR NO 621 TH N 64?26'36" E 1200 FT TH S 25?33'24" E TO NW LINE OF LEXINGTON AND GALLATIN RD SEE ASSESSOR MAPBOOK FOR MISSING PORTION FELIPE LUGO. According to online sources, ownership has been vested in MVP South El Monte I LLC since 2022.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property consists of vacant land covered with weeds and dirt. The foundation of the one former building is located on the southeast side of the site. No onsite operations are present. In addition, several square concrete bases from previous radio towers are located throughout.

The subject property is designated C for commercial development by the City of South El Monte.

2.3 Current Use of Adjoining Properties

The subject property is located within a mixed commercial, residential, and recreation area of Los Angeles County, California. During the vicinity reconnaissance, Partner observed the land uses on adjoining properties as defined in ASTM Practice E1527-21 as any real property or properties the border of which is contiguous or partially contiguous with that of the property, or that would be contiguous or partially contiguous with that of the property but for a street, road, or other public thoroughfare separating them. The adjoining properties are tabulated below:

ADJOINING PROPERTIES

Direction	Land Use/Occupant
North:	Santa Anita Avenue, followed by the Whittier Narrows Recreation Area and parking lot, and the 60 Freeway
Northeast:	Vacant property (995 Lexington-Gallatin Road)
East:	Lexington-Gallatin Road, followed by Whittier Narrows Recreation Area, Group Picnic Area and residential properties
Southeast:	Lexington-Gallatin Road, followed by Whittier Narrows Recreation Area, Group Picnic Area and residential properties
South:	Los Angeles County Parks and Recreation Maximo Training Center (750 Santa Anita Avenue), Los Angeles County Parks and Recreation Whittier Narrows Recreation Area maintenance yard (823 Lexington-Gallatin Road)
Southwest:	Santa Anita Avenue, followed by Whittier Narrows Recreation Area parking lot
West:	Santa Anita Avenue, followed by Whittier Narrows Recreation Area parking lot
Northwest:	Santa Anita Avenue, followed by Whittier Narrows Recreation Area North Lake

2.4 Physical Setting Sources

2.4.1 Topography

TOPOGRAPHIC DATA SUMMARY

Quadrangle Year:	2022
Quadrangle Name:	El Monte, California
Source:	USGS 7.5 Minute Topographic Map
Elevation (Feet):	221
Slope Direction:	Southwest
Slope Degree:	Gentle

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

While under natural and undisturbed conditions shallow groundwater flow most frequently follows the topography of the land surface, natural or man-made features can affect flow direction, and the presumed flow may not match the actual flow directions at the subject property and vicinity.

HYDROLOGY DATA SUMMARY

Groundwater Flow Direction:	Southwest
Groundwater Flow Source:	Topographic map interpretation
Estimated Depth to Groundwater (Feet bgs):	26 to 43
Estimated Depth Source:	A previous subsurface investigation conducted on a nearby property (Case Number T0603770196 – 1100 Santa Anita Avenue)
Closest Body of Surface Water Name:	Whittier Narrows Recreation Area North Lake
Closest Body of Surface Water Distance (Miles):	140 feet
Closest Body of Surface Water Direction:	Northwest
Shallow Groundwater Use:	Not used for domestic purposes
Source of Drinking Water:	Groundwater from the Main San Gabriel Basin and the Central Basin

2.4.3 Geology/Soils

GEOLOGY AND SOIL DATA SUMMARY

Physiographic Province:	The subject property is situated within the Peninsular Ranges Physiographic Province of California.
Geologic Unit Description:	This province is characterized by a series of ranges that are separated by longitudinal valleys, trending northwest to southeast, subparallel to faults branching from the San Andreas Fault. The trend of topography is similar to the Coast Ranges, but the geology is more like the Sierra Nevada, with granitic rock intruding the older metamorphic rocks. The Peninsular Ranges extend from the Transverse Ranges and the Los Angeles Basin south to the Mexican border and beyond to the tip of Baja California and are bounded on the east by the Colorado Desert and the Gulf of California. The Los Angeles Basin and the island group (Santa Catalina, Santa Barbara, and the distinctly terraced San Clemente and San Nicolas islands), together with the surrounding continental shelf (cut by deep submarine fault troughs) are included in this province. The Peninsular Ranges contain minor Jurassic and extensive Cretaceous igneous rocks associated with the Nevadan plutonism. Marine Cretaceous sedimentary rocks are well represented, and post-Cretaceous rocks form a restricted veneer of volcanic, marine, and non-marine sediments.
Geologic Data Source:	United States Department of Agriculture (USDA) Natural Resources Conservation Service Web Soil Survey
Soil Series Name:	Urban land-Biscailuz-Pico and Urban land-Pico-Metz complexes
Soil Series Description:	Urban land consists of soils altered due to human development and are typically covered by impermeable surfaces such as asphalt, concrete, and structures. Biscailuz soils consist of loam and sandy clay loam which formed from discontinuous human-transported material over mixed alluvium derived from granite and/or sedimentary rock. Pico soils consist of loam and sandy loam which formed from discontinuous human-transported material over mixed alluvium derived from granite and/or sedimentary rock. Metz soils consist of sandy loam which formed from

GEOLOGY AND SOIL DATA SUMMARY	
	discontinuous human-transported material over mixed alluvium derived from granite and/or sedimentary rock. Slopes range from 0 to 2 percent.

2.4.4 Flood Zone Information

FLOOD ZONE DATA SUMMARY	
Source:	Federal Emergency Management Agency
Community Panel No.	06037C1670F
FIRM Date:	September 26, 2008
Zone Designation:	Zone X (unshaded); defined as minimal risk areas outside the 1-percent and 0.2-percent-annual-chance floodplains.

A copy of the reviewed flood map is included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

HISTORICAL USE INFORMATION

Years	Resource	Description/Use
1928-1938	Aerial Photographs	Agricultural Land
1948-1982	Aerial Photographs, Topographic Maps	Vacant Land with Radio Towers and a Radio Station Building
1988-2021	Aerial Photographs	Vacant Land with Vacant Radio Station Building
2022-Present	Aerial Photographs	Vacant Land with a Building Foundation

According to available historical sources, the subject property was agriculturally developed land from 1928 to at least 1938. Between 1948 to at least 1994, the subject property was developed with a radio station and between 3 to 6 radio towers. The radio station was occupied by KXLA (1953) and KRLA (1953-1994). By 2002, the radio towers appeared to have been removed and by 2022, the building on the southeast side of the site had been removed leaving the building foundation

No potential environmental concerns were identified in association with the current or former use of the subject property.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Risk Information Services (ERIS) on February 25, 2025. The inferred uses of the subject property and adjoining properties as interpreted from the aerial photographs in Appendix B are tabulated below:

Date:	**1928, 1938**	Scale:	1"=500'
Subject Property:	Appears to be agricultural land		
North:	Appears to be agricultural land		
East:	Appears to be agricultural land, Lexington-Gallatin Road, and small structures		
South:	Appears to be agricultural land with a small structure, followed by Lexington-Gallatin Road		
West:	Appears to be agricultural land across a road		

Date:	**1948**	Scale:	1”=500’
Subject Property:	Appears to be vacant land, with several radio towers on the central portion of the property and a radio station and a commercial structure located on the		

	southeast side
North:	No significant changes visible
East:	No significant changes visible
South:	Appears to be developed several small structures and agricultural land
West:	No significant changes visible

Date: **1952**	Scale: 1”=500’
Subject Property:	No significant changes visible
North:	No significant changes visible
East:	No significant changes visible
South:	Appears to be developed with several small structures
West:	No significant changes visible

Date: **1960**	Scale: 1”=500’
Subject Property:	No significant changes visible
North:	No significant changes visible
East:	Appears to be developed several small structures and vacant land across Lexington-Gallatin Road
South:	Appears to be developed with the multiple small structures and vacant land
West:	Appears to be a paved parking lot and vacant land/recreation area beyond Santa Anita Avenue

Date: **1968**	Scale: 1”=500’
Subject Property:	No significant changes visible
North:	No significant changes visible
East:	No significant changes visible
South:	Appears to be developed with the current commercial building
West:	No significant changes visible

Date: **1972**	Scale: 1”=500’
Subject Property:	Appears to be vacant land with one building on the southeast side of the site
North:	No significant changes visible

East:	No significant changes visible
South:	No significant changes visible
West:	Appears to be two paved parking lots and a recreation area beyond Santa Anita Avenue

Date:	**1982**	Scale:	1”=500’
Subject Property:	No significant changes visible		
North:	No significant changes visible		
East:	Appears to be developed several small structures and park across Lexington-Gallatin Road		
South:	Appears to be developed with the current commercial buildings		
West:	No significant changes visible		

Date:	**1988, 1994, 2005, 2009, 2010, 2012, 2014, 2016, 2018**	Scale:	1”=500’
Subject Property:	No significant changes visible		
North:	No significant changes visible		
East:	No significant changes visible		
South:	No significant changes visible		
West:	No significant changes visible		

Date:	**2020, 2022**	Scale:	1”=500’
Subject Property:	No significant changes visible		
North:	Appears to be developed as a concrete storage lot to the northeast.		
East:	No significant changes visible		
South:	No significant changes visible		
West:	No significant changes visible		

Date:	**2024**	Scale:	1”=500’
Subject Property:	Appears to be vacant land with one building foundation on the southeast side of the site		
North:	No significant changes visible except concrete storage lot appears abandoned and partially vegetated		
East:	No significant changes visible		

South:	Developed with the current commercial building
West:	No significant changes visible

Copies of select aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner requested fire insurance maps (FIMs) from ERIS on February 23, 2025. FIM coverage was not available for the subject property.

A copy of the no coverage letter is included in Appendix B of this report.

3.3 City Directories

Partner reviewed historical city directories obtained from ERIS on February 26, 2025 for past names and businesses that were listed for the subject property and adjoining properties. City directories were not available for the subject property; however, coverage was available for adjoining properties. The findings are tabulated below:

ADJOINING PROPERTY SUMMARY

City Directory Search for 823 Lexington Gallatin Rd (Adjoining Property)	
Year(s)	**Occupant Listed**
1964	L a County Parks, L a Co Prks Recrtn
1979	Co La Pk Whit
1985	La Co Parks, La Co Parks Basebll
1990	La Co Parks Pool, La Co Parks Basebll, La Co Parks Police
1995 96	La Co Parks, La Co Parks Basebll, La Co Parks Pool
2000 01	Athletic Fortn, Southan Ca Muni
2003	Southern Ca Municipal Athletic
2008	M G Construction, Southern Ca Municipal Athletic, Southern Ca Municipal Athletic, Parks and Recreation Dept, Whittier Narrows Park
2012	Southern Ca Municipal Athletic
2016	Southern Ca Municipal Athletic
2020	Whittier Narrows Rec Area, Southern Ca Municipal Athletic
2023	Whittier Narrows Rec Area, Southern Ca Municipal Athletic

City Directory Search for 750 Santa Anita Ave (Adjoining Property)	
Year(s)	**Occupant Listed**
1985	Whittr Narrows Rec, La Co Parks Ystr Ct
1990	La Co Parks
1995 96	Xxxx
2000 01	La Co Parks, La Co Parks Pools Aquatics Hdq
2003	Los Angeles County Aquatics, Whittier Narrows Recreation
2008	Whittier Narrows Recreation
2012	Whittier Narrows Recreation
2016	Whittier Narrows Recreation
2020	Whittier Narrows Recreation
2023	Whittier Narrows Recreation

Based on the city directory review, no environmentally sensitive listings were identified for the adjoining property address.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from ERIS on February 23, 2025. The following inferred uses of the subject property and adjoining properties interpreted from topographic maps in Appendix B and are tabulated below:

Date:	**1894, 1896, 1900**
Subject Property:	No structural development depicted
North:	No structural development depicted
East:	No structural development depicted across a road
South:	Depicted as a river beyond which is one small structure
West:	No structural development depicted

Date:	**1923, 1926**
Subject Property:	Depicted with a land-grant line running through the southwest side of the property and a portion of an intermittent stream on the west side.
North:	No structural development depicted
East:	Depicted as developed with several small structures and vacant land across

	Lexington
South:	Depicted as developed with one small structure and vacant land
West:	No structural development depicted across a road

Date: **1948**	
Subject Property:	Depicted with a land-grant line, intermittent stream, three structures on the west side, two structures on the southeast side, and three radio towers identified as a radio station
North:	No structural development depicted
East:	Depicted as developed with several small structures across Lexington
South:	No significant changes depicted
West:	No structural development depicted

Date: **1953**	
Subject Property:	Depicted as developed with one small structure on the west side, one structure on the southeast side, and three radio towers identified as a KXLA radio towers
North:	No structural development depicted
East:	Depicted as developed with several small structures and vacant land across Lexington
South:	No significant changes depicted
West:	No structural development depicted beyond Portero Avenue

Date: **1966, 1972, 1991, 1994**	
Subject Property:	Depicted as developed with two structures on the southeast side, and six radio towers identified as a KRLA radio towers, area shaded blue to indicate the site is located within the Whittier Narrows Dam County Recreational Area
North:	Vacant land and the 60 Freeway, area shaded blue to indicate the site is located within the Whittier Narrows Dam County Recreational Area
East:	No significant changes depicted, area shaded blue to indicate the site is located within the Whittier Narrows Dam County Recreational Area
South:	Depicted as developed tone structure, an water tank, and vacant land, area shaded blue to indicate the site is located within the Whittier Narrows Dam County Recreational Area
West:	No significant changes depicted, area shaded blue to indicate the site is located within the Whittier Narrows Dam County Recreational Area

Date:	**2015, 2022**
Subject Property:	Shaded to depict development
North:	Shaded to depict development
East:	Shaded to depict development
South:	Shaded to depict development
West:	Shaded to depict development

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

State Department

REGULATORY AGENCY DATA

Name of Agency:	California Environmental Protection Agency (Cal/EPA)
Point of Contact:	https://calepa.ca.gov/nsite/map/help
Agency Address:	1001 I Street, Sacramento, California 95814
Agency Phone Number:	(916) 323-2514
Date of Contact:	February 24, 2025
Method of Communication:	

Summary of Communication:

The Cal EPA Regulated Site Portal is a database and interactive map, which combines information from multiple state and federal data sources. The database provides an overview of regulated equipment, materials and activities for each site, such as underground and aboveground storage tanks; hazardous materials and waste; state and federal cleanups; impacted ground and surface waters; and/or toxic materials.

No listings for the subject property were identified. Of note, a listing was identified for an AT&T Mobility cell tower listed at the address of 825 Lexington Gallatin Road. However, the cell tower appears to be located over 700 feet to the northeast of the subject property boundary.

Health Department

REGULATORY AGENCY DATA

Name of Agency:	Los Angeles County Department of Public Health
Point of Contact:	http://publichealth.lacounty.gov/phi/admin.htm
Agency Address:	313 North Figueroa Street, Los Angeles, California 90012, Los Angeles, California
Agency Phone Number:	(213) 240-7785
Date of Contact:	February 25, 2025
Method of Communication:	Online Research

Summary of Communication:

The Public Health Investigation (PHI) Administration serves as the Custodian of Records for the Department of Public Health. However as of July 1, 2017, all Hazardous Material report requests are handled by the Los Angeles County Fire Department, Health Hazmat Division (LACoFD). See below for additional information.

Fire Department

REGULATORY AGENCY DATA

Name of Agency:	Los Angeles County Fire Department
Point of Contact:	https://fire.lacounty.gov/public-records-requests/
Agency Address:	1320 North Eastern Avenue, Los Angeles, California 90063
Agency Phone Number:	(323) 890-4045
Date of Contact:	February 25, 2025
Method of Communication:	Online Research

Summary of Communication:

No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the LACoFD.

Building Department

REGULATORY AGENCY DATA

Name of Agency:	South El Monte Building Department (SEMBD)
Point of Contact:	https://customercare@soelmonte.org
Agency Address:	1415 Santa Anita Avenue, South El Monte, California 91733
Agency Phone Number:	(626) 579-6540
Date of Contact:	February 25, 2025
Method of Communication:	Online Research

Summary of Communication:

A request for building permits has been submitted to the South El Monte Building Department.

Building Records Reviewed for 825 Lexington-Gallatin Road (Subject Property)

Year(s)	Owner/Applicant	Description
03/25/2019	Department of the Army	6 Antennas, 2 Cabinets on existing Cell Tower sit
03/25/2019	Department of the Army	Unmanned communication facility

Planning Department

REGULATORY AGENCY DATA

Name of Agency:	South El Monte Planning Department (SEMPD)
Point of Contact:	https://www.cityofsouthelmonte.org/185/Planning
Agency Address:	1415 Santa Anita Avenue, South El Monte, California 91733
Agency Phone Number:	(626) 579-6540
Date of Contact:	February 25, 2025

Method of Communication:	Online Research

Summary of Communication:

According to reviewed online documents, the subject property is zoned C for commercial development by the City of South El Monte.

Oil & Gas Exploration

REGULATORY AGENCY DATA

Name of Agency:	California Geologic Energy Management Division (CalGEM)
Point of Contact:	https://www.conservation.ca.gov/calgem/Pages/WellFinder.aspx
Agency Address:	801 K Street, Sacramento, California 95814
Agency Phone Number:	(916) 322-1080
Date of Contact:	February 25, 2025
Method of Communication:	Online Research

Summary of Communication:

According to the CalGEM Well Finder database, no oil or gas wells are located on or adjoining to the subject property.

Assessor's Office

REGULATORY AGENCY DATA

Name of Agency:	Los Angeles County Office of the Assessor
Point of Contact:	https://assessor.lacounty.gov/
Agency Address:	500 West Temple Street, Los Angeles, California 90012
Agency Phone Number:	(213) 974-3211
Date of Contact:	February 25, 2025
Method of Communication:	Online Research

Summary of Communication:

According to records reviewed, the subject property is identified as Assessor Parcel Number (APN) 8119-005-032 which measures a total of 21.182 acres.

Air Pollution Control Agency

REGULATORY AGENCY DATA

Name of Agency:	South Coast Air Quality Management District (AQMD)
Point of Contact:	http://www.aqmd.gov/nav/FIND
Agency Address:	21865 Copley Drive, Diamond Bar, California 91765
Agency Phone Number:	(909) 396-2000

Date of Contact:	February 25, 2025
Method of Communication:	Online Research

Summary of Communication:

No Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) or the presence of AULs, dry cleaning machines, or USTs were on file for the subject property with the AQMD.

Regional Water Quality Agency

REGULATORY AGENCY DATA

Name of Agency:	Regional Water Quality Control Board (RWQCB)
Point of Contact:	https://geotracker.waterboards.ca.gov/
Agency Address:	320 West 4th Street, Los Angeles, California 90013
Agency Phone Number:	(213) 576-6600
Date of Contact:	February 25, 2025
Method of Communication:	Online Research

Summary of Communication:

No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the RWQCB.

Department of Toxic Substances Control

REGULATORY AGENCY DATA

Name of Agency:	California Department of Toxic Substances Control (DTSC)
Point of Contact:	http://www.envirostor.dtsc.ca.gov/public/ http://hwts.dtsc.ca.gov
Agency Address:	1001 I Street, Sacramento, California 95814
Agency Phone Number:	(916) 323-7811
Date of Contact:	February 25, 2025
Method of Communication:	Online Research

Summary of Communication:

The EnviroStor database is the DTSC's data management system for tracking cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known contamination or sites where there may be reason to investigate further. No records were identified for the subject property address on the EnviroStor database.

The DTSC Hazardous Waste Tracking System (HWTS) was researched for hazardous waste manifest data submitted to the California DTSC. No listings for the subject property addresses were identified.

Other Agency

REGULATORY AGENCY DATA

Name of Agency:	Los Angeles County Department of Public Works (LACDPW)
Point of Contact:	https://dpw.lacounty.gov/epd/CleanLA/OpenFileReview.aspx
Agency Address:	900 South Fremont Avenue, Alhambra, California 91803
Agency Phone Number:	(626) 458-3517
Date of Contact:	February 25, 2025
Method of Communication:	Online Research

Summary of Communication:

No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the LACDPW.

Copies of pertinent documents are included in Appendix B of this report.

4.2 Mapped Database Records Search

The regulatory database report provided by ERIS documents the listing of sites identified on federal, state, county, city, and tribal (when applicable) standard source environmental databases within the approximate minimum search distance (AMSD) specified by ASTM Practice E1527-21. The data from these sources are updated as these data are released and integrated into one database. The information contained in this report was compiled from publicly available sources.

The environmental database information is used to identify environmental concerns in connection with the subject property. The listings also serve to identify the known indications of the storage, use, generation, disposal, or release of hazardous substance at the subject property and the potential for contaminants to migrate onto the subject property from off-site sources in groundwater or soil in the form of liquids or vapor.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

The following table lists the sites as categorized by the regulatory database within the prescribed AMSD. The locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

DATABASE REPORT DATA

Database	AMSD Radius (mile)	Listings Identified		
		Subject Property	Adjoining Properties	Surrounding Area Sites of Concern
Federal NPL	1.00	N	N	**Y**
Delisted NPL Site	0.50	N	N	N

Federal SEMS Site	0.50	N	N	N
Federal SEMS-ARCHIVE	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	**Y**	N
Federal RCRA Generators Site (LQG, SQG, VSQG, CESQG)	Subject and Adjoining	N	N	N
Federal IC/EC Registries	Subject Property	N	N	N
Federal ERNS Site	Subject Property	N	N	N
Federal PFAS Facility	0.50	N	N	N
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site (LUST/LPST)	0.50	N	N	N
State/Tribal Registered Storage Tank Sites (UST/AST)	Subject and Adjoining	N	**Y**	N
State/Tribal IC/EC Registries	Subject and Adjoining	N	N	N
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.25	N	N	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N
State PFAS Facility	0.50	N	N	N

Additional Databases	Various	N	**Y**	N

4.2.2 *Subject Property Listings*

The subject property was not identified in the regulatory database report. Although listings were identified for the provided address of 825 Lexington Gallatin Road, and were plotted on the subject property, further research indicates those listings do not fall within the subject property boundaries.

4.2.3 *Adjoining Property Listings*

The adjoining property was identified as a California Environmental Reporting System (CERS) Hazardous Waste Sites (CERS HAZ), Los Angeles County- CUPA Program Records (CUPA LA COUNTY), Facility Registry Service/Facility Index (FINDS/FRS), RCRA Non Generators (RCRA NON GEN), CERS Tanks, Permitted Underground Storage Tank (UST), Historical Hazardous Substance Storage Information Database (HHSS), Los Angeles County- HMS List (HMS LA), Delisted Storage Tanks (DELISTED TNK), HAZ GEN, Historical Hazardous Substance Storage Container Information- Facility Summary (HIST TANK), RCRA NON GEN, and RCRA non-CORRACTS TSD Facilities (RCRA TSD) site, as discussed below:

ADJOINING PROPERTY DATABASE LISTING

Property Name:	Whittier Narrows Recreation Area, Universal Waste Systems, Los Angeles County Department of Parks and Recreation, Army Corps of Engineers
Address:	823 Lexington Gallatin Road
Direction:	South
Hydrological Gradient:	Down-Gradient
Database Listing:	HAZ GEN, UST, HMS LA, HIST TANK, HHSS, DELISTED TNK, CUPA LA COUNTY, CERS TANK, FINDS/FRS, RCRA TSD
Discussion:	These listings reference the presence and removal of a UST on the southern adjoining property. In 1988, the State Water Resources Control Board reported a 1,000-gallon, unleaded gasoline UST. The LA County Department of Public Works. The tank was owned by the Army Corps of Engineers and operated by the County of Los Angeles Department of Parks and Recreation. It was reportedly a stand-alone, single walled, steel tank. After further investigation, this listing is likely in reference to the presence of two, two-thousand-gallon USTs. The Los Angeles County Department of Public Works (LADPW) issued a closure letter on September 12, 2013, for the removal of the two tanks that were used to store gas and diesel fuel, installed in 1987. The USTs were pumped, cleaned, and removed from the site on October 18, 2007. Six soil samples were taken, four from below the invert of the USTs and two from below the dispensers. The soil below the dispensers appeared to contain 339 mg/kg of gasoline and 12.9 ml/kg diesel. The LADPW recommended further investigation of the soil underneath the dispensers. Of note, a UST listing was reported for a 3000-gallon tank removed in 2018. Further investigation has determined the location of that tank was actually 1.26 miles northwest of the subject property and does not represent a

significant environmental concern.

The California State Regulated Portal reports the subject property as a Chemical Storage Facility and Aboveground Petroleum Storage. Six compliance violations exist for the operation of the above-ground storage tank as determined by the Los Angeles County Fire Department during annual Compliance Evaluation Inspections. Most violations are administrative in nature and are followed by a return to compliance. The property was identified as a Hazardous Waste Handler by the Department of Toxic Substances Control, reporting small quantities of tank bottom waste, unspecified waste, household wastes, and other inorganic solids. All DTSC profiles are expired, the most recent having expired in 2015.

ADJOINING PROPERTY DATABASE LISTING

Property Name:	AT&T Mobility
Address:	825 Lexington Gallatin Road
Direction:	Southeast
Hydrological Gradient:	Cross-Gradient
Database Listing:	CERS HAZ, CUPA LA COUNTY, FINDS/FRS, RCRA NON GEN,
Discussion:	These listings reference an AT&T cell tower located on an adjoining property. However, the tower is approximately 700 feet northeast from the subject property boundary. The California Environmental Protection Agency (CalEPA) Regulated Site Portal identifies the site as a Chemical Storage Facility storing diesel fuel. One violation is reported as a failure to complete and/or submit a Hazardous Materials Business Plan. No violations were reported during the most recent inspection in 2022. Given the distance from the subject property and lack of a documented release, these listings are not expected to represent a significant environmental concern.

ADJOINING PROPERTY DATABASE LISTING

Property Name:	Los Angeles County and Whitter Narrows Recreation Area
Address:	750 Santa Anita Avenue
Direction:	South
Hydrological Gradient:	Down-Gradient
Database Listing:	HAZ GEN, HAZNET
Discussion:	These listings refer to the property adjoining the south of the subject property as a Hazardous Waste Handler. The Department of Toxic Substances Control reports waste code matrixes of other inorganic solid waste in 2015 (ID: CAC002833421) and unspecified oil-containing waste in 2016 (ID:

	CAC002833421). Both profiles are inactive and are not expected to represent a significant environmental concern

Based on the findings, vapor migration is not considered an environmental concern at this time.

4.2.4 Surrounding Area Listings of Sites of Concern

The property was identified as located within the boundaries of a National Priorities List (NPL) and a Los Angeles County- San Gabriel Valley Areas of Concern (AOCONCERN) site in the regulatory database report, as discussed below:

SITES OF CONCERN DATABASE LISTING

Property Name:	San Gabriel Valley Area 1, Whittier Narrows
Address:	825 Lexington Gallatin Road
Database Listing:	AOCONCERN, NPL
Discussion:	The subject property is located within the boundaries of the San Gabriel Valley (Area 1) National Priority List (NPL) site, an 11-square-mile area of contaminated groundwater in Los Angeles, California. It is one of four Superfund sites in the 170-square-mile San Gabriel Valley. Multiple potentially responsible parties (PRPs) contaminated over 30 square miles of groundwater under the Valley with volatile organic compounds (VOCs) and industrial solvents. About 400 facilities in the region have soil contamination. Cleanup, operation and maintenance activities, and monitoring are ongoing. Groundwater is contaminated with trichloroethylene (TCE), perchloroethylene (PCE), and carbon tetrachloride (CTC) according to analyses by State agencies and local water companies. Many public wells in this area exceed the EPA Suggested No Adverse Response Levels (SNARL) for TCE and PCE. The groundwater contamination was first detected in 1979. Following this discovery, the California Department of Health Services (CDHS) initiated a well sampling program to assess the extent of contamination. By 1984, when EPA added four areas of contamination to the National Priorities List (NPL), 59 wells were known to be contaminated with high levels of volatile organic compounds (VOCs). Based on the identification of VOC contamination throughout the area, the Regional Water Quality Control Board (RWQCB) established the San Gabriel Valley Cleanup Program, which required the completion of hazardous materials questionnaires by all occupants of commercial/industrial buildings in the vicinity, in order determine potential sources of the contamination. If potential VOC sources were identified, then the facility would be required to have an approved soil gas investigation performed to determine the regional impact from the facility. EPA conducted three five-year reviews of the Whittier Narrows and South El Monte OU's interim remedies. These reviews ensure that the interim remedies put in place protect public health and the environment, and functions as intended by site decision documents. The most recent five-year review is dated September 21, 2021. According to the review, EPA prepared an Interim Record of Decision (IROD) that selected an interim groundwater pump-and-treat remedy for South El Monte OU to protect human health and the environment in June 1999. Initial work on the water

purveyor treatment facilities started before EPA prepared the South El Monte OU IROD and continued in various stages through mid-2006. By the time remedy implementation began under the Cooperative Agreement in October 2008, all of the primary construction activities had been completed by the water purveyors. Although the toxicity values for trichloroethene (TCE) became more stringent in 2011, the current MCL is within EPA's risk range and is therefore protective of human health and the environment. The overall protectiveness determination for the San Gabriel Valley Area 1 Superfund Site interim remedy is deferred. A protectiveness determination at the South El Monte OU (OU 5) cannot be made until further information is obtained. A vapor intrusion investigation began in 2018 for the source area known as the Arden Drive Properties, including soil vapor sampling and indoor air sampling. Based on data collected to date, EPA has no evidence that chemicals in the regional groundwater pose an unacceptable exposure risk from vapor intrusion to overlying areas. NOTE that the subject property is not within a source area. The subject property is located within the Whittier Narrows OU and adjacent to the South El Monte OU. The primary contaminant in Whittier Narrows is PCE. Analytical data results from shallow zone sampling conducted in January/February, 2011 indicate that PCE concentrations are below the MCL throughout the Whittier Narrows OU and are typically non-detect or less than 0.5 micrograms per liter (µg/L). PCE concentrations have generally been declining in the intermediate zone in the upgradient portions of the Whittier Narrows OU (see MW4-8, MW4-9, MW4-10, MW4-13 and MW4-15. However, the concentration reductions have been less consistent in the intermediate zone compared to the shallow zone and several upgradient zones remain near or slightly above the MCL. In the shallow zone, the extent of contamination has shrunk dramatically since remedy construction was completed in 2002 and PCE concentrations have continued to decline consistently over the last five years (2006 to 2010). There are currently no shallow zone MCL exceedances in the Whittier Narrows OU, indicating that continued extraction is not needed to meet the goals of this hydraulic containment remedy. Based on the contaminant isoconcentration maps created in 2017 (EPA 2017 Annual Performance Review), the subject property is located outside the shallow zone PCE contamination zone (nearest monitoring well EPAMW4-13; 27-29 feet bgs). The subject property is located within the groundwater plume with PCE contamination ranging from 0.5 to 5 µg/L in the Intermediated zone PCE contamination zones (between 150-300 and 450-600 feet bgs). Based on the confirmed groundwater contamination in the vicinity of the subject property, this listing is considered to represent a REC. The subject property is not considered a source nor is it within a source area.

Based on the current data indicating that VOCs in shallow groundwater are not above drinking water standards, availability of public water supply, remedial actions, identification of responsible parties, and regulatory oversight by USEPA, lack of VOCs in vapor at the surface, no further action related to current and future commercial or public park use of the subject property appears to be required at this time.

Based on the findings, vapor migration is not considered an environmental concern at this time.

4.2.5 Unplottable Listings

No unplottable listings of concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM Practice E1527-21, Partner requested the following site information from Magellan Value Partners (User of this report).

USER RESPONSIBILITIES

Item	Provided By User
AAI User Questionnaire	Yes
Title Records, Environmental Liens, and AULs	No
Specialized Knowledge	No
Actual Knowledge	No
Valuation Reduction for Environmental Issues	No
Identification of Key Site Manager	No
Reason for Performing Phase I ESA	Yes
Prior Environmental Reports	Yes

5.1 Interviews

5.1.1 Interview with Owner

A representative of the owner of the subject property since 2022, identified as MVP South El Monte I LLC, was available to be interviewed at the time of the assessment. See Section 5.1.2.

5.1.2 Interview with Report User

Mr. Rick Martinez, report user and owner representative, was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any

pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

5.1.3 Interview with Key Site Manager

A key site manager was not provided to be interviewed at the time of this assessment.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators, and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

The User did not have specialized knowledge of environmental conditions associated with the subject property at the time of the assessment.

5.2.3 Actual Knowledge of the User

The User was not aware of environmental liens and/or AULs encumbering the subject property or in connection with the subject property at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

The User was not aware of any reductions in property value due to environmental issues.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or reasonably ascertainable within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

The following information was provided to Partner for review during the course of this assessment:

Phase I Environmental Site Assessment Report, 825 Lexington-Gallatin Road, South El Monte, California 91733, Partner Engineering and Science, Inc. (January 6, 2022)

Partner Engineering and Science, Inc. (Partner) prepared this report on behalf of Magellan Value Partners. The assessment was reportedly performed in accordance with ASTM Standard E1527-13. The assessment consisted of a site reconnaissance, interviews with knowledgeable personnel, review of historical information, and a review of federal, state, and local regulatory databases. Pertinent information contained in this report is summarized below:

- At the time of the 2022 assessment, the subject property was occupied by vacant land with the remnants of one abandoned building on the south side of the site. The building consisted of a shell with no roof. Trees were observed growing in the building interior. The remainder of the property consists of an unpaved lot surrounded by a fence

- According to the Partner report, the subject property was agriculturally developed land from 1928 to at least 1938. Between 1948 to at least 1994, the subject property was developed with a radio station and between 3 to 6 radio towers. The radio station was occupied by KXLA (1953) and KRLA (1953-1994). By 2002, the radio towers appeared to have been removed, leaving the building on the southern portion of the property and vacant land.
- No hazardous substances or petroleum products were observed on the subject property during the site reconnaissance. No evidence of current or former aboveground storage tanks (ASTs) or underground storage tanks (USTs) was observed during the site reconnaissance.
- Partner's review of the regulatory database indicated that the subject property is located within the boundaries of the San Gabriel Valley (Area 1) National Priority List (NPL) site, an 11-square-mile area of contaminated groundwater in Los Angeles, California. Groundwater is contaminated with trichloroethylene (TCE) and PCE according to analyses by State agencies and local water companies. Based on the contaminant isoconcentration maps created in 2017 (EPA 2017 Annual Performance Review), the subject property is located outside the shallow zone PCE contamination zone (nearest monitoring well EPAMW4-13; depth to groundwater 27-29 feet bgs). The subject property is located within the groundwater plume with PCE contamination ranging from 0.5 to 5 µg/L in the Intermediate zone (between 150-300 and 450-600 feet bgs). Based on the confirmed groundwater contamination in the vicinity of the subject property, this listing is considered to represent a REC.
- The subject property is not considered a source. Based on the current data indicating that VOCs in shallow groundwater are not above drinking water standards, availability of public water supply, remedial actions, identification of responsible parties, and regulatory oversight by USEPA, no further action related to current and future commercial use of the subject property appears to be required at this time.

Partner did not recommend further investigation.

Copies of pertinent pages reviewed are included in Appendix B of this report.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

SITE ASSESSMENT DATA

Site Assessment Performed By:	Carol Noland
Site Assessment Conducted On:	March 10, 2025

Partner was unaccompanied during the site reconnaissance.

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste is not currently generated onsite. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance, with the exception of areas of wind-blown household trash along the western end of the subject property.

6.1.2 Sewage Discharge and Disposal

No wastewater treatment facilities were observed or reported on the subject property. No septic systems were observed or reported on the subject property.

6.1.3 Stormwater and Surface Water Drainage

Stormwater is removed from the property primarily due to ground infiltration. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Based on the lack of onsite structures, no heating or cooling sources were observed onsite.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater is not generated at the subject property. No industrial processes are currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No hazardous substances or petroleum products were observed on the subject property during the site reconnaissance.

6.2.2 *Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)*

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 *Evidence of Releases*

No spills, stains, or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 *Polychlorinated Biphenyls (PCBs)*

No potential PCB-containing equipment (transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, etc.) was observed on the subject property during Partner's reconnaissance.

6.2.5 *Strong, Pungent or Noxious Odors*

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 *Pools of Liquid*

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 *Drains, Sumps and Clarifiers*

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 *Pits, Ponds and Lagoons*

No pits, ponds, or lagoons were observed on the subject property.

6.2.9 *Stressed Vegetation*

No stressed vegetation was observed on the subject property.

6.2.10 *Additional Potential Environmental Hazards and Emerging Contaminants*

Partner evaluated the current subject property use during the site reconnaissance for potential environmental hazards, including Per- and Polyfluoroalkyl Substances (PFAS) impacts to the subject property. Based on the site observations, likely PFAS impacts to the subject property based on current use were not identified. Based on this information, PFAS are not considered an environmental concern at this time.

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 *Asbestos-Containing Materials (ACMs)*

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building that have not been appropriately tested are "presumed asbestos-containing material" (PACM).

Based on the lack of onsite structures, ACMs were not considered within the scope of this assessment.

6.3.2 *Lead-Based Paint (LBP)*

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm2 (or 5,000 µg/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X," to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

Due to the lack of onsite structures, LBP was not considered within the scope of this assessment.

6.3.3 *Radon*

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA RADON ZONES

EPA Zones	Average Predicted Radon Levels	Potential
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered an environmental concern.

6.3.4 *Lead in Drinking Water*

LEAD IN DRINKING WATER SUMMARY

Water System Operator:	San Gabriel Valley Water Company (SGVWC)
Source of Drinking Water:	Groundwater from the Main San Gabriel Basin and the Central Basin
Year of Annual Water Quality Report:	2023
Compliance Status:	Water supplied is in compliance with all State and Federal regulations pertaining to drinking water standards for lead.

Water sampling was not conducted to verify water quality.

6.3.5 *Microbial Growth*

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Based on the lack of onsite structures, microbial growth and water damage was not considered within the scope of this assessment.

6.3.6 *Wetlands*

The subject property does not appear to be a designated wetland area based on information obtained from the United States Fish and Wildlife Service's Online Wetlands Mapper; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

6.4 Adjoining Property Reconnaissance

The adjoining property reconnaissance consisted of observing the adjoining properties from the subject property premises.

6.4.1 *Hazardous Substances and Petroleum Products Used or Stored at the Site*

No hazardous substances or petroleum products were observed on adjoining properties during the limited adjoining property reconnaissance.

6.4.2 *ASTs/USTs for Hazardous Substances or Petroleum Products*

No ASTs or USTs for hazardous substances/petroleum products were observed on adjoining properties during the limited adjoining property reconnaissance.

6.4.3 *Evidence of Releases*

No evidence of a release was observed on adjoining properties during the limited adjoining property reconnaissance.

6.4.4 *PCBs*

No PCB containing materials were observed on adjoining properties during the limited adjoining property reconnaissance.

6.4.5 *Strong, Pungent, or Noxious Odors*

No strong, pungent, or noxious odors were observed on adjoining properties during the limited adjoining property reconnaissance.

6.4.6 *Pools of Liquid*

No pools of liquid were observed on adjoining properties during the limited adjoining property reconnaissance.

6.4.7 *Drains, Sumps, and Clarifiers*

No drains, sumps, or clarifiers were observed on adjoining properties during the limited adjoining property reconnaissance.

6.4.8 Pits, Ponds, and Lagoons

No pits, ponds, or lagoons were observed on adjoining properties during the limited adjoining property reconnaissance.

6.4.9 Stressed Vegetation

No stressed vegetation was observed on adjoining properties during the limited adjoining property reconnaissance.

6.4.10 Additional Potential Environmental Hazards and Emerging Contaminants

Partner evaluated the current adjoining property uses during the site reconnaissance for potential environmental hazards, including PFAS impacts to the subject property. Based on observations made from the subject property borders, likely emerging contaminants and/or PFAS impacts to the subject property from current adjoining property uses were not identified. Based on this information, PFAS are not considered an environmental concern.

No additional environmental hazards were observed on adjoining properties during the limited adjoining property reconnaissance.

7.0 VAPOR ENCROACHMENT CONDITIONS

Partner conducted a limited non-intrusive vapor screening on the subject property to identify, to the extent feasible, the potential for vapor encroachment conditions (VECs) in connection with the subject property. This included consideration of chemicals of concern (COC) that may migrate as vapors into the subsurface of the subject property as a result of contaminated soil and groundwater on or near the property.

This screening utilized readily available data sources previously discussed in this Phase I ESA that includes:

- the physical setting of the subject property (Section 2.4),
- standard historical sources for the subject property, adjoining, and surrounding area (Section 3.0),
- known or potentially contaminated sites as identified from information from regulatory agencies and sites on Federal, State, tribal and local databases (Section 4.0), and
- information from the site reconnaissance (Section 6.0) of the subject property and observations of the surrounding properties.

The results of our data collection, reconnaissance, and analysis are tabulated below:

POTENTIAL FOR VAPOR ENCROACHMENT TO IMPACT THE SUBJECT PROPERTY

Area of Concern	Likely or Known VEC to Subject Property
Subject Property Existing Operations or Conditions (Sections 2.0 and 6.0)	None identified that impact the subject property.
Historical Uses of the Subject Property (Section 3.0)	None identified that impact the subject property.
Adjoining Property Operations or Existing Conditions (Sections 2.3 and 6.4)	None identified that impact the subject property.
Historical Uses of Adjoining Properties or Nearby Properties (Section 3.0)	None identified that impact the subject property.
Regulatory Review of sites identified on Federal, State, tribal and Local Environmental Databases which were located in the AMSD (Section 4.0)	None identified that impact the subject property.

Based on the findings of the limited non-intrusive vapor screening, vapor intrusion is unlikely to be an issue of concern in connection with the existing structures on the subject property. As such, no further assessment is recommended.

8.0 FINDINGS AND CONCLUSIONS

Findings and Opinions

Recognized Environmental Condition

A recognized environmental condition (REC) refers to the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- The subject property is located within the boundaries of the San Gabriel Valley (Area 1) National Priority List (NPL) site, an 11-square-mile area of contaminated groundwater in Los Angeles, California. Groundwater is contaminated with trichloroethylene (TCE) and PCE according to analyses by State agencies and local water companies. EPA conducted two five-year reviews of the Whittier Narrows and South El Monte OU's interim remedies. The subject property is located within the Whittier Narrows OU and adjacent to the South El Monte OU. The primary contaminant in Whittier Narrows is PCE. Based on the contaminant isoconcentration maps created in 2017 (EPA 2017 Annual Performance Review), the subject property is located outside the shallow zone PCE contamination zone (nearest monitoring well EPAMW4-13; depth to groundwater 27-29 feet bgs). The subject property is located within the groundwater plume with PCE contamination ranging from 0.5 to 5 µg/L in the Intermediate zone (between 150-300 and 450-600 feet bgs). Based on the confirmed groundwater contamination in the vicinity of the subject property, this listing is considered to represent a REC.

  The subject property is not considered a source. Based on the current data indicating that VOCs in shallow groundwater are not above drinking water standards, availability of public water supply, remedial actions, identification of responsible parties, and regulatory oversight by USEPA, lack of VOCs in vapor at the surface, no further action related to current and future commercial or public park use of the subject property appears to be required at this time.

Controlled Recognized Environmental Condition

A controlled recognized environmental condition (CREC) refers to a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify any CRECs during the course of this assessment.

Historical Recognized Environmental Condition

A historical recognized environmental condition (HREC) refers to a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify any HRECs during the course of this assessment.

Business Environmental Risk

A Business Environmental Risk (BER) is a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice.

- Partner did not identify any BERs during the course of this assessment.

Significant Data Gaps

No significant data gaps affecting the ability of the Environmental Professional to identify a REC were encountered during this assessment.

Conclusions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of 825 Lexington-Gallatin Road in South El Monte, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of CRECs, HRECs, or BERs in connection with the subject property; however a REC was identified. Based on the conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

9.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 825 Lexington-Gallatin Road in South El Monte, Los Angeles County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

RE: CITY DIRECTORY RESEARCH
825 Lexington Gallatin Road
SOUTH EL MONTE,CA 91733

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:
ALL of Lexington Gallatin Rd
600-1020 of Santa Anita Ave
Search Notes:
Santa Anita Ave is also known as Hoyt Ave (1964 and prior) in SOUTH EL MONTE. Santa Anita Ave is also known as Hoyt Ave (1964 and prior) in SOUTH EL MONTE.

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

825 Lexington-Gallatin

825 Lexington-Gallatin Road
South El Monte, California 91733

Report Date: January 6, 2022
Partner Project No. 21-331089.1

Prepared for:

Magellan Value Partners
1900 Avenue of the Stars, Suite 2470
Los Angeles, California 90067

PARTNER
Engineering and Science, Inc.

January 6, 2022

Mr. Somy Mukherjee
Magellan Value Partners
1900 Avenue of the Stars, Suite 2470
Los Angeles, California 90067

Subject: Phase I Environmental Site Assessment
825 Lexington-Gallatin
825 Lexington-Gallatin Road
South El Monte, California 91733
Partner Project No. 21-331089.1

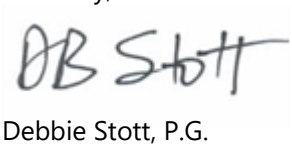
Dear Mr. Mukherjee:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (310) 622-8855.

Sincerely,



Debbie Stott, P.G.
Principal

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Magellan Value Partners for the property located at 825 Lexington-Gallatin Road in South El Monte, Los Angeles County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Magellan Value Partners with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the northwest side of Lexington-Gallatin Road, east-southeast of Santa Anita Avenue, within a mixed commercial, residential, and recreation area of Los Angeles County. Please refer to the table below for further description of the subject property:

Subject Property Data	
Address:	825 Lexington-Gallatin Road, South El Monte, California
Property Use:	Commercial – currently vacant land with dilapidated building
Land Acreage (Ac):	21.18 Ac
Number of Buildings:	1
Number of Floors:	1
Date of Construction:	By 1948
Assessor's Parcel Number (APN):	8119-005-032
Current Tenants:	Vacant
Site Assessment Performed By:	Janet Tentler of Partner*
Site Assessment Conducted On:	August 11, 2021

The subject property consists of vacant land with the remnants of one abandoned structure on the south side of the site. The building consist of a shell with no roof. Trees were observed growing in the building interior. The remainder of the property consists of an unpaved lot surrounded by a fence.

No hazardous substances or petroleum products were observed on the subject property during the site reconnaissance. No evidence of current or former aboveground storage tanks (ASTs) or underground storage tanks (USTs) was observed during the site reconnaissance.

According to review of available historical data, it appears that the subject property was agriculturally developed land from 1928 to at least 1938. Between 1948 to at least 1994, the subject property was developed with a radio station and between 3 to 6 radio towers. The radio station was occupied by KXLA (1953) and KRLA (1953-1994). By 2002, the radio towers appeared to have been removed, leaving the building on the southern portion of the property and vacant land.

The agency database report obtained from Environmental Data Resources, Inc. (EDR) identified the subject property as:

- AT&T Mobility- LAC033-01 South El Monte (USID1208)(EDR Map ID: A1-A4), is listed at 825 Lexington-Gallatin Road, is identified in the RCRA NonGen, CERS, CERS Haz Waste, FINDs, and

ECHO databases. No RCRA violations were listed. The facility was last inspected on June 19, 2019 by the Los Angeles County Fire Department. No violations were listed.

- New Cingular Wireless (EDR Map ID: A5), is listed at 825 Lexington-Gallatin Road, is identified in the HWTS database. The facility is identified as a Satellite Telecommunications facility.

Based on the regulatory status and lack of listings in other databases indicating violations and/or a release, these listings are not considered to have created an environmental concern to the subject property.

During the vicinity reconnaissance, During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

Northeast: Construction yard (995 Lexington-Gallatin Road)

Northwest: Santa Anita Avenue, followed by Whittier Narrows Recreation Area (parking lot and Legg Lakes) and 60 Freeway.

South: Los Angeles County Parks and Recreation Maximo Training Center (823 Lexington-Gallatin Road), Lexington-Gallatin Road and Santa Anita Avenue.

Southeast: Lexington-Gallatin Road, followed by Whittier Narrows Recreation Area, Group Picnic Area and residential properties,

Southwest: Santa Anita Avenue, followed by Whittier Narrows Recreation Area (parking lot and Legg Lakes).

No environmental concerns associated with adjacent properties were identified based on visual observation from publicly accessible rights-of-way.

The subject property is located within the boundaries of the San Gabriel Valley (Area 1) National Priority List (NPL) site, an 11-square-mile area of contaminated groundwater in Los Angeles County, California. It is one of four Superfund sites in the 170-square-mile San Gabriel Valley. Multiple potentially responsible parties (PRPs) contaminated over 30 square miles of groundwater under the Valley with volatile organic compounds (VOCs) and industrial solvents. About 400 facilities in the region have soil contamination. Cleanup, operation and maintenance activities, and monitoring are ongoing.

The subject property is located within the Whittier Narrows Operable Unit (OU) and adjacent to the South El Monte OU. The primary contaminant in Whittier Narrows is tetrachloroethylene (PCE). Analytical data results from shallow zone sampling conducted in January/February, 2011 indicate that PCE concentrations are below the drinking water maximum contaminant level (MCL) throughout the Whittier Narrows OU and are typically non-detect or less than 0.5 micrograms per liter (µg/L). PCE concentrations have generally been declining in the intermediate zone in the upgradient portions of the Whittier Narrows OU.

In the shallow zone, the extent of contamination has shrunk dramatically since remedy construction was completed in 2002 and PCE concentrations have continued to decline consistently over the last five years (2006 to 2010). There are currently no shallow zone MCL exceedances in the Whittier Narrows OU, indicating that continued extraction is not needed to meet the goals of this hydraulic containment remedy.

Based on the contaminant isoconcentration maps created in 2017 (EPA 2017 Annual Performance Review), the subject property is located outside the shallow zone PCE contamination zone (nearest monitoring well EPAMW4-13; depth to water 27-29 feet below ground surface (bgs)). The subject property is located within the groundwater plume with PCE contamination ranging from 0.5 to 5 µg/L in the Intermediate zone es (between 150-300 and 450-600 feet bgs). Based on the confirmed groundwater contamination in deeper groundwater zones in the vicinity of the subject property, this listing is considered to represent a recognized environmental condition (REC).

No potential vapor intrusion concerns were identified onsite nor from offsite facilities.

According to information obtained from the California State Water Resources Board online database, GeoTracker, for a nearby release (Case Number T0603770196 – 1100 Santa Anita Avenue) and topographic map interpretation, groundwater in the vicinity of the subject property is present at 27 feet bgs and flows toward the southwest.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- The subject property is located within the boundaries of the San Gabriel Valley (Area 1) National Priority List (NPL) site, an 11-square-mile area of contaminated groundwater in Los Angeles, California. Groundwater is contaminated with trichloroethylene (TCE) and PCE according to analyses by State agencies and local water companies. EPA conducted two five-year reviews of the Whittier Narrows and South El Monte OU's interim remedies. The subject property is located within the Whittier Narrows OU and adjacent to the South El Monte OU. The primary contaminant in Whittier Narrows is PCE. Based on the contaminant isoconcentration maps created in 2017 (EPA 2017 Annual Performance Review), the subject property is located outside the shallow zone PCE contamination zone (nearest monitoring well EPAMW4-13; depth to groundwater 27-29 feet bgs). The subject property is located within the groundwater plume with PCE contamination ranging from 0.5 to 5 µg/L in the Intermediate zone (between 150-300 and 450-600 feet bgs). Based on the confirmed groundwater contamination in the vicinity of the subject property, this listing is considered to represent a REC.

  The subject property is not considered a source nor is it within a source area. Based on the current data indicating that VOCs in shallow groundwater are not above drinking water standards, availability of public water supply, remedial actions, identification of responsible parties, and regulatory oversight by USEPA, no further action related to current and future commercial use of the subject property appears to be required at this time.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject

to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Due to the age of the subject property building, there is a potential that asbestos-containing material (ACM) and/or lead-based paint (LBP) are present. Should these materials be replaced, the identified suspect ACMs would need to be sampled to confirm the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 825 Lexington-Gallatin Road in South El Monte, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of recognized environmental conditions and environmental issues in connection with the subject property; however, based on the conclusions of this assessment described above, Partner recommends no further investigation of the subject property at this time.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 825 Lexington-Gallatin Road in South El Monte, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a limited property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential

exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Magellan Value Partners engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Magellan Value Partners. Either verbally or in writing, third parties may come into possession of this report or all or part of the

information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- An environmental cleanup lien search was not performed. However, it is Partner's opinion that the lack of the lien search does not represent a significant data gap, in that it does not impact Partner's ability to identify recognized environmental conditions at the subject property and therefore it does not alter the conclusions of this report. A Title Commitment Report provided by Magellan Value Partners did not indicate environmental liens filed against the property. According to the EDR Report, NPL (Superfund) and other environmental liens are not associated with the subject property. Based on available information, no environmental liens appear to be associated with the subject property.
- Partner did not enter the onsite building.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 825 Lexington-Gallatin Road in South El Monte, California is located on the. According to the Los Angeles County Office of the Assessor, Online Property Assessment Information System, the subject property is identified by Assessor's Parcel Number (APN) 8119-005-032, and ownership is currently vested in El Monte Meadows, LLC.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property consists of vacant land with the remnants of one abandoned structure on the south side of the parcel. The building consists of a shell with no roof. Trees were observed growing in the building interior. The remainder of the property consists of an unpaved dirt lot surrounded by a fence.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial, residential, and recreation area of Los Angeles County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

Northeast: Construction yard (995 Lexington-Gallatin Road)

Northwest: Santa Anita Avenue, followed by Whittier Narrows Recreation Area (parking lot and Legg Lakes) and 60 Freeway.

South: Los Angeles County Parks and Recreation Maximo Training Center (823 Lexington-Gallatin Road), Lexington-Gallatin Road and Santa Anita Avenue.

Southeast: Lexington-Gallatin Road, followed by Whittier Narrows Recreation Area, Group Picnic Area and residential properties,

Southwest: Santa Anita Avenue, followed by Whittier Narrows Recreation Area (parking lot and Legg Lakes).

No environmental concerns associated with adjacent properties were identified based on visual observation from publicly accessible rights-of-way.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *El Monte, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 221 feet above mean sea level (MSL) with a local topographic gradient toward the southwest.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to information obtained from the California State Water Resources Board online database, GeoTracker, for a nearby release (Case Number T0603770196 – 1100 Santa Anita Avenue) and topographic map interpretation, groundwater in the vicinity of the subject property is present at 27 feet below ground surface (bgs) and flows toward the southwest.

The closest surface water is Whittier Narrows recreation area/Legg Lakes is located adjacent to the west, beyond Santa Anita Avenue, and the San Gabriel River located approximately 0.50-miles southeast of the subject property. No natural surface water bodies or streams were observed on the subject property. No retention ponds were observed on the subject property.

2.4.3 Geology/Soils

The subject property is located within the San Gabriel Valley in Los Angeles County, California at an elevation of approximately 260 feet above mean seal level. The San Gabriel Valley is bounded by the San Gabriel Mountains to the north and west, and the Repetto Merced, Puente, and San Jose Hills to the south and east. The San Gabriel Valley was formed by downward movement along fault zones near the perimeter of the basin. Coincident uplift on opposite sides of the valley floor formed the surrounding San Gabriel Mountains and the Repetto, Merced, Puente, and San Jose Hills. Erosion of these surrounding highlands has gradually filled the basin with alluvial sediments. The subject property is underlain by Quaternary-age alluvial deposits in a transition zone of reworked older alluvial debris between areas of recent alluvium to the north and west and older alluvium to the east. These alluviums consist of gravel, sand, silt and clay deposits.

Based on information obtained from the United States Department of Agriculture (USDA) Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as Urban land-Biscailuz-Pico and Metz complexes. These complexes are described as somewhat poorly drained to well drained soils classified as discontinuous human-transported material over mixed alluvium derived from granite and/or sedimentary rock. Slopes range from 0 to 2 percent.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06037C1670F, dated September 26, 2008, the subject property appears to be located in unshaded Zone X, an area of minimal flood hazard.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. Information regarding past land use was obtained by a review of historical aerial photographs, city directories, and historical topographic maps of the subject property and surrounding area obtained from Environmental Data Resources, Inc. (EDR) in August 2021. EDR reported that Sanborn™ Fire Insurance Maps were not available for the subject property. Copies of the historical resources are included in Appendix C. A chronological listing of the historical data found is summarized in the table below.

Date	Scale or Address	Source	Summary
1894, 1896, 1900, 1923, 1926	1:62,500; 1:24,000	Topographic Map	Various improved roads and railroad lines are shown throughout the surrounding area. The subject property is depicted as vacant land to the northwest of the San Gabriel River. An unnamed creek drainage is located on the northwest portion of the site. Lexington is located adjacent to the southeast. By 1926, residential properties are located adjacent to the southeast.
1928, 1938	1"=500'	Aerial Photograph	The subject property and surrounding area appear to be agriculturally developed land. Lexington-Gallatin Road is located adjacent to the southeast. Scattered farm houses are located on the southeast side of Lexington-Gallatin Road.
1948, 1952, 1953, 1966, 1972, 1981, 1991, 1994	1:24,000	Topographic Map	The subject property appears to be developed with a radio station as seen in the topographic map. One building is shown in the south corner. Three radio towers are located in the central portion of the property. Residential properties were located adjacent to the east. By 1966, an additional building is located on the south corner of the property and two additional radio towers are located in the central portion of the property. Surrounding properties consist of LAC Parks & Rec building and Whittier Narrows Recreation area to the southwest and southeast. By 1972, Santa Anita Avenue is located adjacent to the

Date	Scale or Address	Source	Summary
			west and northwest; and 60 Freeway is located adjacent to the north.
1952, 1954, 1964, 1972, 1977, 1983, 1989	1"=500'	Aerial Photograph	The subject property appears to be developed with a radio station as seen in the topographic map. One building is shown in the south corner of the property. Three radio towers are located in the central portion. A few small structures (possible residences) are located on the east corner of the property from 1948 to 1952. By 1964, an additional building is located on the south corner and two additional radio towers are located in the central portion. Surrounding properties consist of LAC Parks & Rec building and Whittier Narrows Recreation area to the southwest and southeast. By 1972, Santa Anita Avenue is located adjacent to the west and northwest; and 60 Freeway is located adjacent to the north. By 1989, it is not clear if the radio towers are still onsite.
1966, 1972, 1981, 1991, 1994	1:24,000	Topographic Map	The subject property appears to be developed with a radio towers (KRLA). Two buildings are shown in the south corner of the property. Six radio towers are depicted in central portion. The site vicinity is shaded blue indicating the site is located within the Whittier Narrows Dam County Recreational Area. Surrounding properties consist of Santa Ana Avenue and Legg Lakes are located adjacent to the west and northwest; 60 Freeway to the north; vacant land to the northeast; a commercial building to the southwest; and Lexington-Gallatin Road, vacant land, and residential properties to the southeast.
2002, 2005, 2009, 2012, 2016	1"=500'	Aerial Photograph	The subject property appears to be developed with the existing abandoned building. The radio towers appears to have been removed leaving vacant land. Surrounding properties consist of Santa Ana Avenue and Legg Lakes are located adjacent to the west and northwest;

Date	Scale or Address	Source	Summary
			60 Freeway to the north; vacant land to the northeast; a commercial building to the southwest; and Lexington-Gallatin Road, vacant land, and residential properties to the southeast.
2012	1:24,000	Topographic map	Existing street configuration is shown.
2021	825 Lexington-Gallatin Road	Site Visit	Vacant land with remains of an abandoned building.

According to review of available historical data, it appears that the subject property was agriculturally developed land from 1928 to at least 1938. Between 1948 to at least 1994, the subject property was developed with a radio station and between 3 to 6 radio towers. The radio station was occupied by KXLA (1953) and KRLA (1953-1994). By 2002, the radio towers appeared to have been removed, leaving the building on the southern portion of the property and vacant land.

Common agricultural practices can result in residual concentrations of fertilizers, pesticides or herbicides in near-surface soil, though not generally at concentrations that pose a significant health risk. It is Partner's opinion that, since the majority of the subject property has been graded, redeveloped, and paved, remaining pesticide or herbicide residues, if any, are likely to have been dispersed during these construction activities and are therefore unlikely to impact human health or the environment. Accordingly, no further investigation is recommended regarding potential residual pesticides.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 Public Works Department

Regulatory Agency Data	
Name of Agency:	Los Angeles County Department of Public Works (LACDWP)
Point of Contact:	http://ladpw.org/epd/CleanLA/OpenFileReview.aspx
Agency Address:	900 S Fremont Avenue, Alhambra, California 91803
Agency Phone Number:	(626) 458-3517
Date of Contact:	August 13, 2021
Method of Communication:	Email
Summary of Communication:	

The subject property address was not identified on the LACDPW online database for industrial waste and underground storage tank (UST) records.

4.1.2 Fire Department

Regulatory Agency Data	
Name of Agency:	Los Angeles County Fire Department, Health Hazardous Materials Division
Point of Contact:	https://www.fire.lacounty.gov/hhmd/hhmd-records-request/)
Agency Address:	1320 N Eastern Avenue, Los Angeles, California 90063
Agency Phone Number:	(323) 881-2411
Date of Contact:	August 13, 2021
Method of Communication:	Online
Summary of Communication:	

As of the date of the report, Partner has not received a response from the LACFD.

4.1.3 Air Pollution Control Agency

Regulatory Agency Data	
Name of Agency:	South Coast Air Quality Management District (SCAQMD)
Point of Contact:	http://www3.aqmd.gov/webappl/fim/prog/search.aspx
Agency Address:	21865 Copley Drive, Diamond Bar, California 91765
Agency Phone Number:	(909) 396-2000
Date of Contact:	August 13, 2021
Method of Communication:	Online
Summary of Communication:	

Partner researched the South Coast Air Quality Management District (SCAQMD) online database for information regarding any Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) records for the subject property related to air emission equipment.

No records were found for the subject property address.

4.1.4 Regional Water Quality Agency

Regulatory Agency Data	
Name of Agency:	Regional Water Quality Control Board (RWQCB)
Point of Contact:	http://geotracker.waterboards.ca.gov/)
Agency Address:	320 West 4th Street, Los Angeles, California 90013
Agency Phone Number:	(213) 576-6600
Date of Contact:	August 13, 2021
Method of Communication:	Online
Summary of Communication:	

The subject property address was not identified on the RWQCB GeoTracker online database.

4.1.5 Department of Toxic Substances Control

Regulatory Agency Data	
Name of Agency:	California Department of Toxic Substances Control (DTSC)
Point of Contact:	https://www.envirostor.dtsc.ca.gov/public/ and http://hwts.dtsc.ca.gov/
Agency Address:	1001 I Street, Sacramento, California 95814
Agency Phone Number:	(800) 728-6942
Date of Contact:	August 13, 2021
Method of Communication:	Online
Summary of Communication:	

The subject property address was not identified on the online DTSC EnviroStor database. The subject property address was identified on the online DTSC Hazardous Waste Tracking System database as discussed below.

ID Number	Facility Name/Address	Status	Inactive Date	Waste
CAL000423150	New Cingular Wireless PCS LLC/825 Lexington-Gallatin Road	Active	NA	No hazardous waste records were listed.

4.1.6 *Building* Department

Regulatory Agency Data	
Name of Agency:	South El Monte Building Department (SEMBD)
Point of Contact:	https://customercare@soelmonte.org
Agency Address:	1415 Santa Anita Avenue, South El Monte, California 91733
Agency Phone Number:	(626) 579-6540
Date of Contact:	August 12, 2021
Method of Communication:	Email
Summary of Communication:	A request for building permits has been submitted to the South El Monte Building Department.

Building Records Reviewed for 825 Lexington-Gallatin Road (Subject Property)		
Year(s)	**Owner/Applicant**	**Description**
03/25/2019	Department of the Army	6 Antennas, 2 Cabinets on existing Cell Tower site
03/25/2019	Department of the Army	Unmanned communication facility

4.1.7 Planning Department

Regulatory Agency Data	
Name of Agency:	South El Monte Planning Department (SEMPD)
Point of Contact:	Paulina Reyes
Agency Address:	1415 Santa Anita Avenue, South El Monte, California 91733
Agency Phone Number:	(626) 579-6540 x 3275
Date of Contact:	August 17, 2021
Method of Communication:	Email
Summary of Communication:	According to records reviewed, the subject property is zoned Commercial by the City of South El Monte.

4.1.8 Oil & Gas Exploration

Regulatory Agency Data	
Name of Agency:	California Department of Conservation, Geologic Energy Management Division (CalGEM)
Point of Contact:	http://maps.conservation.ca.gov/doggr/index.html#close
Agency Address:	801 K Street, MS 18-05, Sacramento, California 95814
Agency Phone Number:	(916) 445-9686
Date of Contact:	August 13, 2021
Method of Communication:	Online
Summary of Communication:	

According to CalGEM, no oil or gas wells are located on or adjacent to the subject property.

4.1.9 Assessor's Office

Regulatory Agency Data	
Name of Agency:	Los Angeles County Assessor
Point of Contact:	http://maps.assessor.lacounty.gov
Agency Address:	500 West Temple Street, Room 225, Los Angeles, California
Agency Phone Number:	(213) 974-3211
Date of Contact:	August 13, 2021
Method of Communication:	Online
Summary of Communication:	

According to records reviewed, the subject property is identified by Assessor Parcel Number (APN) 8119-055-032.

4.1.10 Sanitation District

Regulatory Agency Data	
Name of Agency:	Los Angeles County Sanitation District (LACSD)
Point of Contact:	https://lacsd.org/
Agency Address:	1955 Workman Mill Road, Whittier, California
Agency Phone Number:	(562) 908-4288
Date of Contact:	August 13, 2021
Method of Communication:	Online
Summary of Communication:	

As of the date of this report, Partner has not received a response from the LACSD. Based on the use, files are not expected.

Copies of pertinent documents obtained by Partner from the above-referenced agencies are included in Appendix B.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	N	N	**Y**
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG, NonGen)	0.25	**Y**	**Y**	N
Federal IC/EC Registries	0.50	N	N	**Y**
Federal ERNS Site	Subject Property	N	N	N
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site (LUST)	0.50	N	N	N
State/Tribal Registered Storage Tank Site	0.25	N	**Y**	N

Radius Report Data				
Database	**Search Radius (mile)**	**Subject Property**	**Adjacent Properties**	**Sites of Concern**

EDR US Hist Cleaners	Varies	N	N	N

4.2.2 Subject Property Listings

The agency database report obtained from Environmental Data Resources, Inc. (EDR) identified the subject property as:

- **AT&T Mobility- LAC033-01 South El Monte (USID1208)(EDR Map ID: A1-A4)**, is listed at 825 Lexington-Gallatin Road, is identified in the RCRA NonGen, CERS, CERS Haz Waste, FINDs, and ECHO databases. No RCRA violations were listed. The facility was last inspected on June 19, 2019 by the Los Angeles County Fire Department. No violations were listed.
- **New Cingular Wireless (EDR Map ID: A5)**, is listed at 825 Lexington-Gallatin Road, is identified in the HWTS database. The facility is identified as a Satellite Telecommunications facility.

Based on the regulatory status and lack of listings in other databases indicating violations and/or a release, these listings are not considered to have created an environmental concern to the subject property.

4.2.3 Adjacent Properties

The EDR Report identified the following facilities adjacent to the subject property:

- **LA County, Parks & Recreation, Whittier Narrows Recreation Area, Universal Waste Systems, Inc. (EDR Map ID: B6-B10, B12)**, is located at 823 Lexington-Gallatin Road, adjacent to the south-southwest and hydrologically down-gradient of the subject property. This facility is listed in the CA WIP, CERS, CERS Tanks, UST, HIST UST, and RCRA NonGen database. No RCRA violations were listed. The WIP listing indicates that this site was investigated by the RWQCB as a suspected contributor to the San Gabriel Valley Superfund Site and the status is listed as "historical." One 1,000-gallon fuel UST was identified at the site. The facility was last inspected on November 19, 2019 by the Los Angeles County Fire Department. Violations were listed for Failure to annually review and electronically certify that the business plan and hazardous material inventory. Returned to compliance on 04/06/2020. Based on the regulatory status, these listings is not considered to have created an environmental concern to the subject property.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.4 Sites of Concern Listings

Partner identified one facility, using the criteria discussed above, that appeared to be a potential concern, as discussed below:

- The subject property is located within the boundaries of the **San Gabriel Valley (Area 1)** National Priority List (NPL) site, an 11-square-mile area of contaminated groundwater in Los Angeles, California. It is one of four Superfund sites in the 170-square-mile San Gabriel Valley. Multiple potentially responsible parties (PRPs) contaminated over 30 square miles of groundwater under the Valley with volatile organic compounds (VOCs) and industrial solvents. About 400 facilities in the region have soil contamination. Cleanup, operation and maintenance activities, and monitoring are ongoing.

  Groundwater is contaminated with trichloroethylene (TCE), perchloroethylene (PCE), and carbon tetrachloride (CTC) according to analyses by State agencies and local water companies. Many public wells in this area exceed the EPA Suggested No Adverse Response Levels (SNARL) for TCE and PCE. The groundwater contamination was first detected in 1979. Following this discovery, the California Department of Health Services (CDHS) initiated a well sampling program to assess the extent of contamination. By 1984, when EPA added four areas of contamination to the National Priorities List (NPL), 59 wells were known to be contaminated with high levels of volatile organic compounds (VOCs). Based on the identification of VOC contamination throughout the area, the Regional Water Quality Control Board (RWQCB) established the San Gabriel Valley Cleanup Program, which required the completion of hazardous materials questionnaires by all occupants of commercial/industrial buildings in the vicinity, in order determine potential sources of the contamination. If potential VOC sources were identified, then the facility would be required to have an approved soil gas investigation performed to determine the regional impact from the facility.

  EPA conducted two five-year reviews of the Whittier Narrows and South El Monte OU's interim remedies. These reviews ensure that the interim remedies put in place protect public health and the environment, and functions as intended by site decision documents. The most recent five-year review is dated September 11, 2013. According to the review, EPA prepared an Interim Record of Decision (IROD) that selected an interim groundwater pump-and-treat remedy for South El Monte OU to protect human health and the environment in September 2000. Initial work on the water purveyor treatment facilities started before EPA prepared the South El Monte OU IROD and continued in various stages through mid-2006. By the time remedy implementation began under the Cooperative Agreement in October 2008, all of the primary construction activities had been completed by the water purveyors. Although the toxicity values for trichloroethene (TCE) became more stringent in 2011, the current MCL is within EPA's risk range and is therefore protective of human health and the environment. The overall protectiveness determination for the San Gabriel Valley Area 1 Superfund Site interim remedy is deferred. A protectiveness determination at the South El Monte OU (OU 5) cannot be made until further information is obtained. EPA is currently

conducting a vapor intrusion investigation, including soil vapor sampling and indoor air sampling at and near source facilities throughout the South El Monte OU. It is expected that the investigation will take approximately three years to complete, at which time a protectiveness determination will be made. NOTE that the subject property is not within a source area.

The subject property is located within the Whittier Narrows OU and adjacent to the South El Monte OU. The primary contaminant in Whittier Narrows is PCE. Analytical data results from shallow zone sampling conducted in January/February, 2011 indicate that PCE concentrations are below the MCL throughout the Whittier Narrows OU and are typically non-detect or less than 0.5 micrograms per liter (µg/L). PCE concentrations have generally been declining in the intermediate zone in the upgradient portions of the Whittier Narrows OU (see MW4-8, MW4-9, MW4-10, MW4-13 and MW4-15. However, the concentration reductions have been less consistent in the intermediate zone compared to the shallow zone and several upgradient zones remain near or slightly above the MCL.

In the shallow zone, the extent of contamination has shrunk dramatically since remedy construction was completed in 2002 and PCE concentrations have continued to decline consistently over the last five years (2006 to 2010). There are currently no shallow zone MCL exceedances in the Whittier Narrows OU, indicating that continued extraction is not needed to meet the goals of this hydraulic containment remedy.

Based on the contaminant isoconcentration maps created in 2017 (EPA 2017 Annual Performance Review), the subject property is located outside the shallow zone PCE contamination zone (nearest monitoring well EPAMW4-13; 27-29 feet bgs). The subject property is located within the groundwater plume with PCE contamination ranging from 0.5 to 5 µg/L in the Intermediated zone PCE contamination zones (between 150-300 and 450-600 feet bgs).

- Based on the confirmed groundwater contamination in the vicinity of the subject property, this listing is considered to represent a REC. The subject property is not considered a source nor is it within a source area. Based on the current data indicating that VOCs in shallow groundwater are not above drinking water standards, availability of public water supply, remedial actions, identification of responsible parties, and regulatory oversight by USEPA, no further action related to current and future commercial use of the subject property appears to be required at this time.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.5 Orphan Listings

Partner reviewed EDR's Orphan Summary, which is a listing of sites that have not been geocoded based on lack of sufficient data regarding their exact location within the general area. The subject property was not identified as an Unmapped Site.

No orphan listings of concern were identified.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from Magellan Value Partners (User of this report).

User Responsibilities				
Item	**Provided By User**	**Not Provided By User**	**Discussed Below**	**Does Not Apply**
AAI User Questionnaire			**X**	
Title Records, Environmental Liens, and AULs			**X**	
Specialized Knowledge			**X**	
Actual Knowledge			**X**	
Valuation Reduction for Environmental Issues			**X**	
Identification of Key Site Manager	**Section 5.1.3**			
Reason for Performing Phase I ESA	**Section 1.1**			
Prior Environmental Reports		**X**		
Other		**X**		

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property, identified as El Monte Meadows, LLC, a California limited liability company, was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User. The information requested was not received prior to the issuance of this report. Because the Report User (Client) is a lender, it is understood that the Report User would not have knowledge of the property that would significantly impact our ability to satisfy the objectives of this assessment. The lack of this information is not considered to represent a significant data gap.

5.1.3 Interview with Key Site Manager

A key site manager was not provided to be interviewed at the time of this assessment.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was provided by Magellan Value Partners with a Commitment for Title Insurance issued by First American Title Insurance Company and dated April 8, 2021. According to the Commitment for Title Insurance, the title to the subject property is currently vested in El Monte Meadows, LLC, a California limited liability company. The Title Commitment did not list the presence of environmental liens or activity and use limitations.

A copy of the Title Commitment is included in Appendix B.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

No previous reports or other pertinent documentation was provided to Partner for review during the course of this assessment.

6.0 SITE RECONNAISSANCE

The weather at the time of the field reconnaissance was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data	
Site Assessment Performed By:	Janet Tentler
Site Assessment Conducted On:	August 11, 2021

Partner was unaccompanied during the field reconnaissance activities.

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

No solid waste is currently being generated at the subject property. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

No sanitary discharges are currently being generated on the subject property. No wastewater treatment facilities or septic systems were observed on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by percolation to unpaved ground surfaces on the subject property.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

No heating and/or cooling systems are located within the abandoned structure.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during this assessment.

6.1.6 Wastewater

No domestic wastewater is currently being generated at the subject property. The vicinity is connected to a public sanitary sewer. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed on the subject property during the Partner site reconnaissance.

6.1.8 Additional Site Observations

No additional general site characteristics were observed on the subject property during the Partner site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No hazardous substances or petroleum products were observed on the subject property during the Partner site reconnaissance.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former ASTs or USTs on the subject property was observed during the site reconnaissance.

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

No potential PCB-containing equipment (transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, etc.) on the subject property was observed during the Partner site reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid on the subject property were observed during the Partner site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers on the subject property, other than those associated with storm water removal, were observed during the Partner site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property during the Partner site reconnaissance.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property during the Partner site reconnaissance.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed on the subject property during the Partner site reconnaissance.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building that have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The subject property structure was constructed prior to the 1960s. Partner did not access the interior of the abandoned structure due to safety issues. Prior to demolition of the abandoned structure, a demolition-level ACM survey is recommended.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm^2 (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

It is unlikely that LBP is present in buildings constructed after 1978. Partner did not access the interior of the abandoned structure due to safety issues. The presence of LBP on painted surfaces is considered likely.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones

EPA Zones	Average Predicted Radon Levels	Potential
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification and proposed commercial use, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by San Gabriel Valley Water Company (SGVWC) serves the subject property vicinity. According to the SGVWC website, the sources of public water for the City of South El Monte includes groundwater from the San Gabriel Groundwater Basin, Central Groundwater Basin, and Metropolitan Water District's sources. According to SGVWC and the 2020 Annual Water Quality Report, water supplied to the subject property is in compliance with all state and federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner did not access the abandoned structure due to safety issues. A visual survey for evidence of mold growth or water intrusion was not conducted. Partner understands that the building will be demolished.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises. No items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 FINDINGS AND CONCLUSIONS

A *REC* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- The subject property is located within the boundaries of the San Gabriel Valley (Area 1) National Priority List (NPL) site, an 11-square-mile area of contaminated groundwater in Los Angeles, California. Groundwater is contaminated with trichloroethylene (TCE) and PCE according to analyses by State agencies and local water companies. EPA conducted two five-year reviews of the Whittier Narrows and South El Monte OU's interim remedies. The subject property is located within the Whittier Narrows OU and adjacent to the South El Monte OU. The primary contaminant in Whittier Narrows is PCE. Based on the contaminant isoconcentration maps created in 2017 (EPA 2017 Annual Performance Review), the subject property is located outside the shallow zone PCE contamination zone (nearest monitoring well EPAMW4-13; depth to groundwater 27-29 feet bgs). The subject property is located within the groundwater plume with PCE contamination ranging from 0.5 to 5 µg/L in the Intermediate zone (between 150-300 and 450-600 feet bgs). Based on the confirmed groundwater contamination in the vicinity of the subject property, this listing is considered to represent a REC.

  The subject property is not considered a source. Based on the current data indicating that VOCs in shallow groundwater are not above drinking water standards, availability of public water supply, remedial actions, identification of responsible parties, and regulatory oversight by USEPA, no further action related to current and future commercial use of the subject property appears to be required at this time.

A *CREC* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *HREC* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Due to the age of the subject property building, there is a potential that asbestos-containing material (ACM) and/or lead-based paint (LBP) are present. Should these materials be replaced, the identified suspect ACMs would need to be sampled to confirm the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 825 Lexington-Gallatin Road in South El Monte, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of recognized environmental conditions and environmental issues in connection with the subject property; however, based on the conclusions of this assessment described above, Partner recommends no further investigation of the subject property at this time.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 825 Lexington-Gallatin Road in South El Monte, Los Angeles County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Torrance, CA 90501-0000
Contact: Evelyn Perez

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Partner Engineering and Science, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 04BA-4826-940E

PO # 21-331089.1

Project 21-331089.1

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 04BA-4826-940E

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2015. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Five-Year Review Report

Second Five-Year Review Report

for

San Gabriel Valley Area 1 Superfund Site
Whittier Narrows Operable Unit

Los Angeles County, California

September 2011

PREPARED BY:

United States Environmental Protection Agency
Region 9
San Francisco, California

Approved by:

Kathleen Salyer
Assistant Director, Superfund Division
U.S. Environmental Protection Agency Region 9

Date: 9/14/11

Executive Summary

The remedy for the Whittier Narrows Operable Unit (OU) of the San Gabriel Valley (Area 1) Superfund Site in Los Angeles County, California is to protect groundwater in the Whittier Narrows and the Montebello Forebay portion of the Central Basin from upgradient groundwater contamination. The trigger for the commencement of this five-year review was the completion of the first five-year review in September 2006. This is the second five-year review for the Whittier Narrows OU.

EPA's remedy is intended to provide groundwater containment to prevent further migration of contamination above state or federal drinking water standards into the Central Basin. The major components of the remedy include groundwater extraction in the vicinity of Whittier Narrows Dam, treatment of the extracted water and discharge of the treated water for use by local water purveyors or for groundwater recharge.

The remedy is functioning as intended although additional data collection is required to determine if modifications to the groundwater extraction scheme may be needed to ensure long-term protectiveness.

The Whittier Narrows OU currently protects human health and the environment because there is no exposure to contaminated groundwater and groundwater containment is occurring. Additional monitoring wells are planned to help determine whether adjustments to the groundwater extraction systems are warranted to optimize groundwater containment.

Five-Year Review Summary Form (continued)

Issues:

1) Low levels of contamination exists in the deeper aquifer (>400 feet below ground surface [bgs]) near the eastern extraction wells (EW4-5 and EW4-6). This contamination is below the extraction well screens. Additional monitoring is required to determine if migration of this deeper contamination is occurring past these wells.

Recommendations and Follow-up Actions:

1a) Review monitoring well program and determine the number and location of additional monitoring wells needed.

1b) Evaluate whether additional pumping or new extraction wells are needed to address the deeper (> 400 feet bgs) intermediate zone contamination and, if necessary, install wells and pipelines.

Protectiveness Statement(s):

The Whittier Narrows OU currently protects human health and the environment because there is no exposure to contaminated groundwater and groundwater containment is occurring. The additional monitoring described above will help determine whether adjustments to the groundwater extraction systems are warranted to optimize groundwater containment.

Other Comments:

In addition to the Issues and Recommendations, the following areas of improvement, which do not affect protectiveness, were identified during the five-year review:

1) The shallow zone and intermediate zone target extraction rates are not optimized to current contaminant conditions. Based on recent contaminant transport modeling, revised target extraction rates are needed.

2) Because the CDPH Notification Level for 1,4-dioxane has recently been lowered, a contingency plan with appropriate 1,4-dioxane trigger levels for initiating additional action(s) should be developed.

3) DTSC and EPA should finalize development of the Whittier Narrows OU Performance Evaluation Plan to provide routine evaluation of the remedy, including data collection, annual data evaluation and annual reporting.

4) A TMDL for nitrogen loading to Legg Lakes, as is currently proposed, could potentially impact discharges of treated water to the lakes. After a new TMDL is promulgated, EPA can submit a request to the RWQCB for alternative concentration-based wasteload allocations along with a Lake Management Plan.

5) If the revised extraction rates for the remedy developed while resolving the Issue identified above exceed the City of Whittier's water demands, EPA will need to re-engage potential treated water recipients and finalize arrangements for an additional end user.

Five-Year Review Report

I. Introduction

The purpose of five-year reviews is to determine whether the remedy at a site is protective of human health and the environment. The methods, findings, and conclusions of reviews are documented in five-year review reports. In addition, five-year review reports identify issues found during the review, if any, and recommendations to address them.

The Agency is preparing this five-year review pursuant to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) §121 and the National Contingency Plan (NCP). CERCLA §121 states:

> *If the President selects a remedial action that results in any hazardous substances, pollutants, or contaminants remaining at the site, the President shall review such remedial action no less often than each five years after the initiation of such remedial action to assure that human health and the environment are being protected by the remedial action being implemented. In addition, if upon such review it is the judgment of the President that action is appropriate at such site in accordance with section [104] or [106], the President shall take or require such action. The President shall report to the Congress a list of facilities for which such review is required, the results of all such reviews, and any actions taken as a result of such reviews.*

The agency interpreted this requirement further in the NCP; 40 Code of Federal Regulations (CFR) §300.430(f)(4)(ii) states:

> *If a remedial action is selected that results in hazardous substances, pollutants, or contaminants remaining at the site above levels that allow for unlimited use and unrestricted exposure, the lead agency shall review such action no less often than every five years after the initiation of the selected remedial action.*

The United States Environmental Protection Agency (EPA) Region 9 has conducted a five-year review of the interim remedy implemented at the Whittier Narrows OU of the San Gabriel Valley (Area 1) Superfund Site in Los Angeles County, California. This review was conducted from February 2011 through August 2011 by the Remedial Project Manager (RPM), the EPA Region 9 Technical Support Program and EPA RA Contractor CH2M Hill. The EPA RPM and CH2M HILL conducted the site inspection on March 10. This report documents the results of the review.

This is the second five-year review for the San Gabriel Valley (Area 1) Superfund Site. The triggering action for the initial statutory review was the start date of actual RA on-site construction at the Whittier Narrows OU, as shown in EPA's WasteLAN database: June 11, 2001. The trigger for this second five-year review was completion of the first five-year review in September 2006. The five-year review is required due to the fact that the interim remedy will result in hazardous substances, pollutants, or contaminants remaining on site above levels that allow for unlimited use and unrestricted exposure.

The San Gabriel Valley (Area 1) Superfund Site, which includes the Whittier Narrows OU, is one of four San Gabriel Valley groundwater sites listed on the National Priorities List (NPL). The other San Gabriel Valley sites are San Gabriel Valley Area 2 (which includes the Baldwin Park OU), San Gabriel Valley Area 3, and San Gabriel Valley Area 4 (which includes the Puente Valley OU). This five-year review only addresses the interim remedy implemented for the Whittier Narrows OU of the San Gabriel Valley (Area 1) Superfund Site. This review does not address the other OUs in Area 1,

including the El Monte OU, Richwood OU, Suburban OU and South El Monte OU. The El Monte and South El Monte OUs are located upgradient of Whittier Narrows OU and have various remedy components in both the RD and RA stages. The contamination in the southern South El Monte OU, immediately adjacent to the Whittier Narrows OU, is described in Attachment 6.

II. Site Chronology

Table 1: Chronology of Site Events

Event	Date
Initial discovery of contamination	1979
NPL listing	May 8, 1984
Remedial Investigation (RI)/Feasibility Study (FS) complete	September 1992
Monitoring-only Interim Record of Decision (IROD) signed for the Whittier Narrows OU	March 31, 1993
Increasing volatile organic compound (VOC) concentrations prompt additional investigation	1997-1998
FS Addendum and Proposed Plan	October 1998
Remedial Design start	April 5, 1999
IROD Amendment signed for the Whittier Narrows OU	November 10, 1999
Remedial Action start	September 27, 2000
Design completed for the wellheads, well pumps, and conveyance pipelines	January 2001
Design completed for the groundwater treatment plant	March 2001
Start of on-site construction	June 11, 2001
EPA and the State conduct pre-final inspection of the RA	January 24, 2002
CH2M HILL determines contractor has completed construction	March 31, 2002
EPA and the State conduct final inspection of the RA	May 16, 2002
Full-scale, 11,000 gallons per minute (gpm) system operations test	June to August 2002
Treatment plant modifications to split shallow and intermediate zones; construction of pipeline to City of Whittier	September 2002
Begin interim system operations and maintenance (O&M)	October 23, 2002
Detection of n-Nitrosodimethylamine (NDMA) in shallow zone	December 2002
Remedy becomes operational and function one year after final inspection	May 16, 2003
California Department of Public Health (CDPH) issues permit to City of Whittier for use of treated intermediate zone water as municipal drinking water supply	September 5, 2003
RA complete (Interim RA Report signed)	September 30, 2003
Construction of final connection to City of Whittier	October 2003
Transfer of O&M responsibilities from CH2MHill to City of Whittier	November 2004
Treated intermediate zone water delivered to the City of Whittier system	December 14, 2005
First Whittier Narrows OU five-year review completed	September 2006
Remediation System Evaluation completed by U.S. Army Corps of Engineers	May 2008
Work on second five-year review initiated	January 2011

III. Background

Physical Characteristics

San Gabriel Valley (Area 1) Superfund Site is located in eastern Los Angeles County. The Whittier Narrows OU encompasses approximately four square miles in the southern portion of the San Gabriel Basin (See Figure 1) and is the primary discharge point for groundwater and surface water flow exiting the Basin. Whittier Narrows is a 1.5-mile gap in the low-lying hills that separate the San Gabriel Basin from the downgradient Central Basin. The Whittier Narrows OU is bounded to the north by the Pomona Freeway (Highway 60) and to the south by the Montebello Forebay portion of the Central Basin near the Whittier Narrows Dam.

EPA designated Whittier Narrows as an OU specifically to address groundwater contamination flowing out of the San Gabriel Basin, through Whittier Narrows, into the Montebello Forebay portion of the Central Basin. The Montebello Forebay is critical to the Central Basin groundwater aquifers because this is where the aquifers are closest to the ground surface and receive most of their recharge.

Land and Resource Use

Groundwater in the Whittier Narrows OU flows primarily from northeast to southwest from the San Gabriel Basin into the Central Basin. There are drinking water wells located within Whittier Narrows and immediately downgradient in the Central Basin. The drinking water wells closest to the remedy within Whittier Narrows belong to the City of Whittier and are no longer in routine use because the City receives treated water from the EPA remedy. Drinking water wells in the Central Basin are located within 2,000 and 4,500 feet of the remedy. Analytical sampling data collected from the Central Basin drinking water supply wells currently contain only trace levels of contamination.

Most of the Whittier Narrows OU is undeveloped land dedicated to flood control and outdoor recreational uses. Densely populated residential, commercial and light industrial areas are immediately adjacent to the Whittier Narrows OU. This includes extensive industrial areas in the upgradient South El Monte OU. Industrial activities within the Whittier Narrows OU are generally limited to the far eastern portion of the Narrows.

History of Contamination

Groundwater contamination was first detected in the San Gabriel Valley in 1979. This contamination was most likely the result of decades of improper chemical handling and disposal practices at hundreds of industrial sites through the San Gabriel Valley. Although many of the laws regulating the handling and disposal of hazardous chemicals went into effect after 1970, historical documents demonstrate that local officials were concerned about the potential for groundwater contamination by industrial activities in the San Gabriel Valley as early as the 1950s. By 1984, high levels of VOC contamination was detected in 59 San Gabriel Valley water supply wells. Since that time, additional wells have been determined to be contaminated with VOCs along with other contaminants, including 1,4-dioxane, perchlorate, and NDMA.

The shallow and intermediate VOC contamination found in Whittier Narrows is migrating into the area from upgradient industrial contaminant sources. EPA has not found any significant sources of VOC contamination within the Whittier Narrows OU. Remediation of upgradient contaminant sources is occurring and will continue to occur as part of remedial activities in other San Gabriel Basin OUs, particularly the directly adjacent and upgradient South El Monte OU.

Initial Response

Since the late 1980s, EPA has conducted field investigations and evaluated remedial actions in Whittier Narrows. EPA signed an IROD on March 31, 1993, specifying that remedial action would be limited to groundwater monitoring only throughout Whittier Narrows. EPA implemented the monitoring-only IROD, which included installation of several monitoring wells and routine quarterly monitoring of wells in the area for VOCs. For several years, contaminant concentrations were relatively low throughout Whittier Narrows and groundwater resources in the Central Basin were not threatened. However, starting in 1997, a significant increase in VOC contaminated groundwater was detected migrating from upgradient areas into the western side of Whittier Narrows. The increases in contaminant concentrations suggested an imminent threat to groundwater resources in the Central Basin and EPA subsequently prepared an IROD Amendment (signed on November 10, 1999) for additional remedial actions.

Basis for Taking Action

VOCs are the primary chemicals of concern (COCs) that have been found above state and federal drinking water standards in the Whittier Narrows OU and upgradient areas. The VOCs found in the Whittier Narrows OU are mobile in groundwater and are probable and/or potential carcinogens. The primary route of potential exposure for the public would be through domestic use of untreated groundwater. Tetrachloroethylene (PCE) and trichloroethylene (TCE) are the most frequently detected COCs in groundwater analytical samples.

Elevated VOC contamination occurs primarily in the western half of the Whittier Narrows and PCE is the VOC detected at the highest concentrations. Exceedances of the drinking water standard (5.0 micrograms per liter [µg/L]) for PCE in this area have been detected up to 500 feet bgs. Prior to remedy implementation, PCE concentrations just above drinking water standards were present in isolated locations in the Montebello Forebay, downgradient of Whittier Narrows. This confirmed that groundwater contamination was flowing out of the San Gabriel Basin through Whittier Narrows and into the Montebello Forebay portion of the Central Basin. The Montebello Forebay area is the primary source of recharge for the Central Basin's drinking water aquifers.

Continuing groundwater contamination migrating from the San Gabriel Basin into this area could impact the water supply for millions of people.

IV. Remedial Actions

Remedy Selection

The remedial action selected in the 1993 IROD was limited to conducting groundwater monitoring in Whittier Narrows. EPA issued an IROD Amendment for the Whittier Narrows OU on November 11, 1999. As stated in the IROD Amendment, the Remedial Action Objective (RAO) for Whittier Narrows OU is:

> "To the extent technically and economically feasible, EPA intends to control contaminant migration in Whittier Narrows so that contamination originating from industrial activities in the San Gabriel Basin will not cause production wells in Whittier Narrows and the Central Basin to exceed drinking water standards."

EPA's objective for the Whittier Narrows OU is to protect groundwater resources in Whittier Narrows and the Montebello Forebay portion of the Central Basin from contamination emanating from the San Gabriel Valley. At the time of the IROD Amendment, groundwater contaminated with PCE at levels

above the drinking water standard had been detected just south of Whittier Narrows Dam in the Central Basin. EPA's remedy is intended to prevent further migration of contamination above state or federal drinking water standards into the Central Basin.

Table 2 provides a list of the COCs and the associated ARARs as listed in the 1999 IROD Amendment.

Table 2: ARARs for Chemicals of Concern[1]

Compound	ARAR (ug/L)	Source
1,1-Dichloroethane	5	California MCL
1,1-Dichloroethene	6	California MCL
1,1,1-Trichloroethane	200	Federal MCL
1,2-Dichloroethane	0.5	California MCL
Chloroform[2]	100	Federal MCL
Cis-1,2-Dichloroethene	6	California MCL
1,4-Dioxane	3	California Notification Level
Ethylbenzene	700	Federal MCL
Styrene	100	Federal MCL
Tetrachloroethene	5	Federal MCL
Trichloroethene	5	Federal MCL
Toluene	150	California MCL
Xylenes, total	1,750	California MCL

[1]As presented in the 1999 IROD Amendment

[2]This chemical is a trihalomethane (THM); the MCL listed is for the four THMs combined: chloroform, bromodichloromethane, dibromochloromethane, and bromoform.

The major components of the Whittier Narrows remedy include:

- Groundwater containment through extraction in the vicinity of Whittier Narrows Dam near the downgradient limit of contaminant concentrations exceeding maximum contaminant levels (MCLs) or other relevant and appropriate standards;
- Groundwater treatment using two-stage liquid-phase granular activated carbon (LGAC) treatment;
- Conveyance systems (i.e., pipelines, booster pumps) to transport contaminated groundwater from the wells to the treatment plant and treated water from the plant to the designated end use;
- Treated water end-use by local water purveyors (for municipal supply or recreational use), potentially combined with recharge of some treated water back to the aquifer; and
- Groundwater monitoring to help measure the performance of the containment system and provide early warning of upgradient conditions that could affect the remedy.

Remedy Implementation

Groundwater flow modeling indicated that four shallow wells, extracting a total average flow rate of 5,000 gpm, would provide complete shallow-zone containment and that three intermediate-depth extraction wells, extracting a total average of 6,000 gpm, would provide complete intermediate-zone

containment. EPA installed the groundwater extraction wells during two phases of well drilling in May/June 1999 and August/September 2000.

Installation of the conveyance pipelines from the extraction wells to the treatment plant and from the treatment plant to the initial surface water discharge points (Legg Lakes, Nature Center Lake, and the Zone 1 Ditch-see Figure 2) began on June 11, 2001. Construction of the treatment plant began in July 2001 (see Figure 3). Construction was completed in March 2002 and EPA and California Department of Toxic Substances Control (DTSC) conducted the final construction inspection on May 16, 2002.

In 2002 and 2003, minor treatment plant piping modifications were completed and an additional conveyance pipeline was installed to allow for connection to the City of Whittier's system. This resulted in the current system configuration where the shallow zone water is kept separate from the intermediate zone water throughout the system and can only be discharged to Legg Lakes. The treated intermediate zone water is permitted for potable use and currently can only be distributed to the City of Whittier system.

In September 2003, the City of Whittier obtained a permit from CDPH that allows the City to use the treated intermediate zone water from the Whittier Narrows treatment plant as drinking water. Production of shallow zone water and discharge of the treated water to Legg Lakes is conducted in accordance with a three party Water Production Agreement that was executed by EPA, the Main San Gabriel Basin Watermaster and Los Angeles County.

System Operations/Operation and Maintenance (O&M)

EPA entered into a Cooperative Agreement with the City of Whittier to operate and maintain the Whittier Narrows groundwater treatment system. CH2M Hill began transferring the treatment plant operations to the City of Whittier in November 2004. Pursuant to the CDPH permit, the City modified the extraction wellheads and constructed flush lines at each well. In addition, the City changed out the carbon for all the potable vessels and conducted additional monitoring for CDPH. Since December 14, 2005, the City has distributed the treated intermediate zone water to its residents.

Routine system procedures and requirements are outlined in the Operations and Maintenance (O&M) Manual for the Whittier Narrows Operable Unit Remedial Action, dated September 2003, prepared for EPA by CH2M HILL and the Revised Operations, Maintenance, and Monitoring Plan for the Whittier Narrows Operable Unit Remedial Action, dated September 2003, prepared for EPA by CH2M HILL. Both of these documents were approved by CDPH. Use of the treated intermediate zone water as a drinking water supply for the City adds significant operational requirements pursuant to the CDPH permit, including daily operator involvement and extensive water quality monitoring.

Daily operator activities include driving around the project site to visually inspect the extraction wells, the wellfield power/control platforms, and the treatment plant. The operator also visually inspects the LGAC vessels and checks the pressure drop across each LGAC vessel. In addition, the operators routinely record meter readings, conduct sampling, perform required maintenance, and make minor system repairs.

The groundwater extraction and treatment systems are setup with a large number of automated alarm conditions to alert the operator. Examples include failure of a system component (e.g., a booster pump) or detection of a parameter outside of the designated operational range (e.g., elevated pressure differential across an LGAC vessel). The operator performs system checks to confirm the readings recorded by the operating system.

The primary measurement of treatment system performance is water quality monitoring. The CDPH permit contains extensive monitoring requirements to verify system performance and ensure that all treated water meets permit requirements. Monitoring locations include: upgradient monitoring wells, operating extraction wells, in-plant water from each LGAC vessel, and treatment plant effluent. All treated water analytical sampling results have been non-detect for all VOCs.

In general, system O&M is relatively straightforward. Although the system capacity is much larger than most groundwater remediation systems, the technologies employed (groundwater pumping, carbon adsorption treatment and conveyance) are not complicated and require relatively minimal oversight.

One operational issue raised in the first five-year review was an electrical system failure observed in 2005/2006. As described in the first five-year review report, in an attempt to remedy the problem, electrical cables running to several of the extraction wells were replaced, cable splices and connections were raised above-grade, and variable frequency drives (VFDs) were adjusted. There have not been any further failures or significant electrical issues since the work was completed in 2006.

Annual O&M Costs

Table 3 provides a summary of the O&M costs incurred to operate the system over the last five years. The actual costs are also compared to the estimated O&M costs from the IROD Amendment (adjusted to match current conditions).

The O&M costs incurred over most of the last four and one-half years have been consistent with the IROD cost estimate (after adjustment for inflation through 2006) on a per acre-foot extracted basis. The one year where costs were substantially higher than the IROD estimates (October 2008 through September 2009) was the result of an extended system downtime experienced during the carbon changeout that year, which lowered extraction rates, combined with the large costs associated with the periodic carbon change outs. As shown in Table 3, the costs per acre-foot of extracted water in the other years have ranged from $69 to $113, compared to the adjusted IROD cost estimate of $102.

Table 3: Annual System Operations/O&M Costs

Dates		Volume Extracted (acre-feet)	O&M Costs	Cost per Acre-Foot of Extracted Water
From	To			
Annual O&M Cost Estimate from IROD[1]		12,100	$1,238,000 (2006 dollars)	$102
October 2006	September 2007	8,428	$634,000	$75
October 2007	September 2008	5,968	$546,000	$91
October 2008	September 2009	5,473	$1,085,000[2]	$198
October 2009	September 2010	7,818	$886,000	$113
October 2010	March 2011	3,685	$255,000	$69

[1] The O&M costs from the IROD Amendment have been revised to a purveyor reimbursement of $10/ac-ft (instead of $40/ac-ft), which is applied only to the intermediate water (73% of the IROD volume). Also, the ROD costs have been escalated from 1999 to 2006 assuming a 3.5% annual increase.

[2] Includes large carbon changeout cost, which also resulted in considerable downtime and lower extraction volumes

V. Progress since the Last Five-Year Review

The last five-year review concluded:

> *The remedy at Whittier Narrows OU is protective of human health and the environment.*

In addition, a number of issues were raised and most of the recommendations and follow-up actions needed to address these issues have either been completed or they were determined through further evaluation to be unnecessary. A brief summary of each issue, its recommendation(s)/follow-up action(s), and status is presented below:

Issue	Recommendation(s)/Follow-up Action(s)	Status
Shallow zone extraction and long-term end-use	1) Evaluate contaminant transport within shallow zone to determine minimum extraction rate; permanently reduce shallow zone extraction rate as appropriate. 2) Finalize agreements for long-term end-use.	Contaminant transport evaluations completed and permanent reductions in shallow-zone target rates are planned. Agreements for long-term end use were finalized in 2008.
Annual O&M Costs	1) Conduct Remedy System Evaluation (RSE) to identify optimization opportunities and cost savings. 2) Negotiate reduced CDPH permit monitoring.	The USACE completed the RSE in May 2008. Some optimization/cost saving actions implemented with more expected after revised target pumping rates are finalized. Multiple reductions in CDPH permit monitoring have been approved.
Electrical system failures	USACE investigation into electrical cable and system failures.	USACE evaluation did not resolve the specific cause of failures. However, failed cables were replaced and upgraded and VFDs were adjusted. There have been no additional failures even after additional wellfield flooding.
Downgradient monitoring	After conducting September 2006 monitoring event, re-evaluate monitoring frequency.	After the 2006 event, it was determined that annual OU-wide monitoring should be performed. There are current efforts underway to evaluate appropriate data requirements needed to support remedy performance evaluation.

VI. Five-Year Review Process

Administrative Components

The Whittier Narrows OU five-year review team was led by Bella Dizon of EPA, Remedial Project Manager (RPM) for the Whittier Narrows OU and EPA RA Contractor CH2MHILL. The five-year review report was reviewed by the California Department of Toxic Substances Control (DTSC).

Community Notification and Involvement

Public Notice of the upcoming 2011 five-year review was published in the *San Gabriel Valley Tribune* on February 3, 2011.

Document Review

This five-year review consisted of a review of relevant documents (Attachment 1), O&M records, and monitoring data (see Attachment 6). Applicable groundwater cleanup standards (Attachment 2) and risk factors (Attachment 5) were also reviewed for comparison to the assumptions used in 1999 when the IROD Amendment was prepared.

Data Review

PCE is both the most widely detected VOC chemical contaminant and is the only VOC that regularly exceeds its MCL in the Whittier Narrows OU. Of the remaining COCs listed in Table 2, only TCE and

1,4-dioxane are regularly detected; however, these detections are generally below the MCL or notification level, respectively. PCE analytical sampling results from upgradient monitoring wells, remedy extraction wells, and downgradient monitoring and extraction wells were reviewed (see Figure 4 for locations of wells in Whittier Narrows) and these data, as well as data on other site contaminants, are discussed briefly below and in more detail in Attachment 6.

The current extent of PCE contamination in the Whittier Narrows OU and southern South El Monte OU is depicted in Attachment 6 Figures 1 through 4. These recent maps of PCE contamination are drawn using a more refined set of concentration contour intervals than prior maps of VOC contamination prepared for the area. Changes in the extent of contamination are discussed in the following text.

Shallow Zone Contamination

Shallow zone PCE concentrations have consistently declined over the last five years (2006 to 2010). As shown in Attachment 6 Figure 1, there are currently no shallow zone MCL exceedances within the Whittier Narrows OU. This continuing lack of an MCL exceedance indicates that continued extraction is not likely needed to meet the hydraulic containment remedial action objective for the shallow zone. The current extent of shallow contamination represents a dramatic reduction in the extent of shallow zone contamination since 2002 (Attachment 6, Figure 13) when there was a large area of groundwater contamination in the western portion of the narrows above 25 μg/L and smaller areas in excess of 50 and 100 μg/L surrounding wells MW4-72 and MW4-15.

A number of factors likely contributed to this observed reduction in contamination in the shallow zone in Whittier Narrows, including a reduction in contaminant mass loading from upgradient sources in the South El Monte OU, groundwater dilution, vertical migration of contamination into the intermediate zone and contaminant mass removal from Whittier Narrows OU remedy well pumping. Although there are persistent areas of elevated shallow zone groundwater contamination in the southern South El Monte OU (Attachment 6, Figure 1), these areas do not appear to be generating enough contaminant mass (load) to significantly affect the shallow groundwater migrating into Whittier Narrows.

Further, the below average water-level elevations that have persisted for much of the last decade in the region may also be contributing to a reduction in the contaminant mass loading available to enter the Whittier Narrows groundwater system. However, following record rainfall in the winter of 2005, shallow water levels rose dramatically (Attachment 6, Figures 19 and 20), yet there was not an associated spike in shallow zone concentrations observed in South El Monte source area groundwater. This may also indicate that shallow zone PCE concentrations within the Whittier Narrows OU are unlikely to increase due to these upgradient South El Monte sources areas.

As shown below in Table 4, the PCE concentrations in the shallow zone monitoring wells downgradient of the Whittier Narrows OU extraction wells have been consistently very low to non-detect from 2004 to present, despite the reduced extraction rates from the shallow zone extraction wells (Attachment 6, Table 12).

Additionally, based on review of the available data presented in Attachment 6, it does not appear that any of the emerging chemical contaminants (i.e., 1,4-dioxane, perchlorate and NDMA) will require remedial action in the near-term for Whittier Narrows OU shallow zone groundwater.

Based on these observations, EPA will evaluate, with State's input, the possibility of stopping or reducing the target rates for shallow zone extraction. If shallow extraction is stopped or reduced, an appropriate monitoring program will need to be developed to ensure that rising shallow zone

concentrations in the future would be detected in sufficient time to re-adjust the shallow zone extraction rates.

Intermediate Zone Contamination

The current extent of PCE contamination in the intermediate zone is shown in three maps (Attachment 6, Figures 2, 3 and 4), with each map drawn to cover a specific 150-foot thick depth interval. On review of the new maps, several observations are apparent regarding current intermediate zone contamination compared to 2002 when the remedy first began operations:

- The areal extent of the high PCE concentration areas towards the southern end of the South El Monte OU is somewhat smaller now compared to the area in 2002, but the changes do not appear to be significant.
- The extent of contamination above the PCE MCL upgradient of the Whittier Narrows OU extraction wells has not changed dramatically. The area with PCE contamination above the MCL is only slightly narrower. However, the width of the higher concentrations has shrunk more substantially and also extends a little further downgradient.
- In the vicinity of the extraction wells, the western edge of contamination has shifted towards the east.
- The Whittier Narrows OU extraction wells have significantly reduced the downgradient extent of intermediate zone contamination above the MCL. Only a small area of contamination above the PCE MCL remains in the 150- to 300-foot deep interval (Attachment 6, Figure 2).
- There is an area of deeper (450- to 600-feet below ground as shown on Attachment 6, Figures 4 and 10) intermediate zone contamination in the vicinity of the Whittier Narrows OU extraction wells EW4-5 and EW4-6 and towards the northeast (MW4-22). However, based on the existing water quality data (which are limited for these deeper intervals), it appears to be a relatively isolated area suggesting that the amount of contaminant mass migrating into the deeper intermediate zone horizons may be relatively small. Although additional downgradient monitoring is needed to confirm this, the deep contamination does not yet appear to have migrated as far as the Whittier Narrows Dam based on analytical sampling data collected at WN-01, which are all nondetect.

In general, downgradient PCE concentrations have continued to decline over the last five years. This decline has occurred despite intermediate zone extraction rates averaging less than 3,300 gpm over the last five years (Attachment 6, Table 12). This provides strong evidence that the remedial objective (to prevent exceedance of drinking water standard in Whittier Narrows and Central Basin production wells) can be met at a lower flow rate than the current intermediate zone target extraction rate of 6,000 gpm.

The changes in the distribution of contamination observed in groundwater sampling analytical data indicate that intermediate pumping should likely be focused on EW4-5 (center well) and EW4-6 (eastern well) rather than EW4-7.

The deep intermediate zone PCE contamination in excess of the MCL appears to extend to depths of greater than 400 feet bgs near and to the east/northeast of the extraction wells (see Attachment 6,

Figures 4 and 10). This contamination is below the extraction well screens. It is not clear how significant of a threat this potentially limited extent of deeper contamination represents to downgradient areas or nearby water purveyor production wells. As noted above, the closest wells belong to the City of Whittier and are not currently used regularly because the City receives treated water from the Whittier Narrows OU project. Additionally, other downgradient production wells in the Central Basin continue to have very low PCE concentrations. New, deeper intermediate zone monitoring wells located downgradient from the intermediate zone extraction wells are necessary to evaluate this issue.

Site Inspection

The five-year review site inspection was conducted on March 10, 2011 by EPA and CH2M HILL. Representatives from DTSC's engineering section also participated in the inspection. The City of Whittier's O&M manager, Dan McKenna, provided information on the status of the treatment systems and various facilities. The purpose of the inspection was to assess the integrity of the extraction and treatment system, including the extraction wells, electrical and control systems and the treatment plant. The inspection included a review of O&M activities, site conditions, equipment conditions and documenting observations. A copy of the site inspection checklist is included in Attachment 3.

The inspection found the system and site to be in generally good condition. There are a few minor items requiring repair, but nothing that impacts system operation or performance. Some of the past operational issues, such as frequent VFD failures and problems with submersible pumps, have been addressed through replacement or upgrades to more reliable equipment.

Interviews

The EPA RPM interviewed Dan Wall, Assistant Public Work Director for the City of Whittier, on March 8, 2011 and David Towell, CH2M HILL project manager, on May 5, 2011. The interview records for both of these interviews are included in Attachment 4. Through his role with the City of Whittier, Mr. Wall is fairly familiar with the project and the City's role in operating the system for EPA. He had an overall positive impression of the project and indicated that there had not been any concerns with the project raised by City residents. Mr. Towell is intimately familiar with the project through his long-term role in providing technical support to EPA in the Whittier Narrows OU. He described some of the improved conditions in the OU, both in contaminant distribution and system operations, and highlighted some technical issues that are the subject of ongoing evaluation and that may lead to increased cost savings in future remedy operations.

VII. Technical Assessment

Question A: Is the remedy functioning as intended by the decision documents?

The data review and evaluation, document review, ARARs review, risk assumptions review, and the results of the site inspection indicate that the remedy is functioning as intended by the IROD Amendment. The remedy has generally achieved the remedial objective of minimizing migration of contaminants into the Central Basin and potential impacts on production wells.

Shallow zone contamination is no longer present above the MCLs in the Whittier Narrows OU. Although the shallow zone extraction rates averaged only about 1,200 gpm over the past five years, which is well below the target rates, full containment of contaminant migration has been achieved as evidenced by the current shrinking extent of shallow groundwater contamination. As discussed above, there are likely a number of contaminant and hydrogeologic factors that have combined to reduce

shallow contamination in Whittier Narrows. Additionally, contaminant concentrations downgradient of the OU extraction wells remain low. Further, contaminant mass loads entering the Whittier Narrows OU from upgradient source areas appear to have declined and these conditions appear unlikely to change in the near-term. Significant reductions in the target rates for shallow zone extraction appear warranted.

For the intermediate zone, the average extraction rate over the past five years has been just under 3,300 gpm, which is only 55% of the target rate of 6,000 gpm. However, the downgradient extent of intermediate zone contamination and downgradient PCE concentrations (Table 4), have declined since 2006. This observed trend has continued relatively consistently since the start of remedy operations in 2002. These downgradient decreases indicate that the remedy has provided reasonable containment of contaminant migration and is operating in general accordance with remedial objectives. However, the small amount of downgradient contamination remaining, combined with the deeper intermediate zone contamination present near EW4-6 and MW4-22, indicate that containment should be further evaluated. Additional monitoring in the deeper portion of the intermediate zone (including new monitoring points) is required to determine if migration of this deeper contamination is occurring past these wells.

The predictive contaminant transport modeling that EPA is currently conducting, combined with the data evaluation presented in Attachment 6, should be used to select lower overall target extraction rates for the Whittier Narrows remedy and to determine whether supplemental pumping is needed to address the deeper intermediate contamination.

Although the evaluations conducted in support of this five-year review have indicated that the remedy is meeting the remedial objectives, a more formal process for evaluating remedy performance on an annual basis should be implemented. To facilitate this, EPA and DTSC are developing a Remedy Performance Evaluation Plan that identifies:

- the specific remedial objectives of the remedy;
- how compliance with those objectives will be determined;
- the data that needs to be collected to support remedy performance evaluations; and,
- the technical evaluations to be conducted each year to evaluate remedy performance.

An Annual Remedy Performance Evaluation Report should be prepared summarizing the available monitoring data, summarizing remedy performance and describing any upcoming technical evaluations or proposed changes to the remedy.

A comprehensive Groundwater Monitoring Plan should be included as an attachment to the Remedy Performance Evaluation Plan to ensure that sufficient data are collected to detect changing contaminant or hydrologic conditions that could impact remedy performance, to facilitate implementation of the Remedy Performance Evaluation Plan and to allow for preparation of the Annual Report.

Question B: Are the exposure assumptions, toxicity data, cleanup levels, and RAOs used at the time of remedy selection still valid?

There have been no significant changes in the physical conditions of the site that would affect the protectiveness of the remedy.

Changes in RAOs or Standards

The RAOs used at the time of remedy selection are still valid. There have been no changes in ARARs that affect the protectiveness of the remedy. However, there have been minor changes to some of the chemical-specific ARARs (listed above in Table 2) since the 1999 IROD Amendment (see Attachment 2):

- The federal MCL for chloroform (100 µg/L in the 1999 IROD) was lowered to 80 µg/L in 2002.
- The federal MCL for ethylbenzene of 700 µg/L was identified in the 1999 IROD. California adopted an MCL of 300 µg/L in 2003.
- The CDPH 1,4-dioxane notification level (NL) of 3 µg/L was identified as the standard in the IROD (see Table 2). CDPH lowered the 1,4-dioxane NL to 1 µg/L in November 2010.

The EPA Region 9 Water Division is supporting the Los Angeles Regional Water Quality Control Board (LARWQCB) in developing total maximum daily loads (TMDLs) for Legg Lakes. Legg Lakes is impacted by nutrients impairments (as characterized by periodic occurrences of elevated chlorophyll *a*). The TMDLs are being developed to address these impairments with the goal of reducing chlorophyll *a* such that it consistently meets target levels in the Lakes. The TMDLs are expected to reduce nutrient loads to Legg Lakes and nitrogen is one of the targeted nutrients. As described previously, the shallow zone groundwater extracted from the Whittier Narrows OU wells is treated and discharged to Legg Lakes. The nitrate levels in the treated shallow water (1.5 to 2 mg/L as nitrogen) are very low compared to most shallow groundwater in the San Gabriel Valley. The effluent concentrations are well below the drinking water MCL of 10 mg/L and the basin plan objective for surface water discharges of 8 mg/L. However, the TMDL limits being considered are in the 1.0 mg/L range.

It is not yet clear what the final TMDL limit will be for nitrogen or how soon it will be promulgated. However, the low limits being considered could potentially impact EPA's ability to discharge treated shallow water from the Whittier Narrows OU remedy directly to Legg Lakes without additional treatment. As noted above, significant reductions in shallow extraction may be warranted which would make discharge to Legg Lakes less critical. Regardless, alternative discharge options (e.g., discharge to other surface water bodies, reinjection, or recharge) may need to be considered in the future.

Changes in Exposure Pathways, Toxicity, and Other Contaminant Characteristics

The original risk assessments identified the exposure pathways at Whittier Narrows as domestic use of groundwater including ingestion, inhalation, and dermal exposure. This five-year review qualitatively assessed the potential for vapor intrusion and determined that this exposure pathway is currently incomplete in Whittier Narrows (see Attachment 5 for further discussion).

Since the 1997 risk assessment addendum and 1998 supplemental risk analysis, there have been a number of changes to the toxicity values for certain contaminants of concern at the Whittier Narrows OU. Some revisions to the toxicity values indicate a lower risk from exposure to these chemicals than previously considered. On the other hand, evaluation of the toxicity values for 1,1-DCA, ethylbenzene, PCE and xylenes may indicate higher risks from exposure than previously considered. PCE is the only one of these commonly detected in Whittier Narrows OU groundwater.

The greatest uncertainty with toxicological changes for the Whittier Narrows OU is associated with TCE. In August 2001, U.S. EPA's Office of Research and Development (ORD) released the draft

"Trichloroethylene Health Risk Assessment: Synthesis and Characterization." In 2009, EPA harmonized Region's 3, 6 and 9 similar risk-based screening levels into a single table: "Regional Screening Levels (RSL) for Chemical Contaminants at Superfund Sites." The RSLs are developed using risk assessment guidance from the EPA Superfund program. They are risk-based levels derived from standardized equations combining exposure information assumptions with EPA toxicity data. The current RSL for TCE in tap water is 2.5 µg/L. TCE concentrations in Whittier Narrows OU extraction wells generally range from non-detect up to about 3 µg/L. TCE risk levels will need to be reviewed again in the 2016 five-year review.

The IROD also identified 1,4-dioxane as a COC, although it was not evaluated in the risk assessment. 1,4-Dioxane has been detected in the upgradient South El Monte OU at concentrations exceeding the CDPH drinking water NL of 1 µg/L. The treatment process at Whittier Narrows (LGAC adsorption) is not effective at removing 1,4-dioxane from groundwater. During the past five years, 1,4-dioxane has been detected at concentrations slightly above the CDPH NL in two extraction wells (EW4-5 [intermediate zone] and EW4-8 [shallow zone]), however, concentrations in these wells have not been above the NL since January 2009. The effluent from the treatment plant has never reached the NL of 1 µg/L and for the last two years has generally been between 0.6 µg/L and 0.8 µg/L.

As was noted in the first five-year review for Whittier Narrows, NDMA has been detected in Whittier Narrows above the CDPH NL of 0.01 µg/L. During past five years, NDMA has been detected in Whittier Narrows above the state NL in groundwater from two extraction wells (shallow zone wells EW4-3 and EW4-8) and two monitoring wells (MW4-24 shallow zone, MW4-13 shallow and intermediate zone). The primary source of NDMA in Whittier Narrows is the effluent from two Los Angeles County Sanitation District water reclamation plants, including one located just upgradient of the EW4-3 and EW4-8 shallow extraction wells. In mid-2010, the Sanitation District started a full-scale ultraviolet disinfection system at the Whittier Narrows Reclamation Plant that provides for greatly reduced NDMA concentrations in the plant effluent. This in turn should lead to declining NDMA concentrations in shallow groundwater in western Whittier Narrows.

During the past five years, perchlorate has been detected infrequently in Whittier Narrows OU monitoring and extraction wells and only at concentrations well below the California MCL of 6 µg/L.

Question C: Has any other information come to light that could call into question the protectiveness of the remedy?

As noted in the first five-year review, the original assessment of the site concluded that there would be no ecological receptors because it is a groundwater remedy with the preferred end-use of the treated water to be drinking water. However, as currently implemented, the extracted shallow zone water is treated and discharged on-site into Legg Lakes. The Whittier Narrows OU treatment system employs carbon adsorption (LGAC), which does not remove NDMA. Any NDMA present in groundwater from the shallow extraction wells is discharged directly to Legg Lakes after the water is treated for VOCs. However, NDMA concentrations in water discharged to Legg Lakes are in the low parts per trillion range which is orders of magnitude below concentrations that have the potential to effect aquatic life (in the parts per billion to parts per million range).

As described in the first five-year review, the 1999 IROD Amendment discusses governmental controls that affect extraction and use of groundwater. The portions of the Whittier Narrows OU that contain contaminated groundwater is generally undeveloped and is used as park, nature center and flood-control areas. There are no specifically tailored institutional control (IC) instruments in place at the site. However, there is very limited likelihood for uncontrolled extraction and use of contaminated

groundwater due to government controls. The governmental controls in place at the site act as effective institutional controls because the governmental agencies that manage the land are familiar with the administrative constraints on groundwater extraction. The primary governmental control is provided by the Amended Judgment of August 24, 1989 (including Amendments through February 24, 1992) in the matter of Upper San Gabriel Valley Municipal Water District v. City of Alhambra, et. al., amending the original judgment entered on January 4, 1973, by the Superior Court of California, County of Los Angeles. This judgment establishes the entity known as "Watermaster" with full authority to allocate water resources throughout the San Gabriel Valley. In addition, governmental controls on the use of groundwater as drinking water include EPA and California promulgated MCLs and related standards that require drinking water limits to be met prior to serving the water. These drinking water controls and the Watermaster's authority to regulate and allocate water resources essentially eliminate unregulated use of area groundwater; therefore, the remedy is currently protective.

There is no other information that calls into question the protectiveness of the remedy.

Technical Assessment Summary

According to the data reviewed and the site inspection, the remedy is functioning as intended by the IROD Amendment although further evaluation is needed of the the deeper zone contamination. There have been no changes in the physical conditions of the site that would affect the protectiveness of the remedy. The remedy is meeting all ARARs in the IROD Amendment, and there have been no changes in ARARs affecting the protectiveness of the remedy.

Although there have been some changes in the toxicity factors for the contaminants of concern that were used in the previous risk assessments, as detailed in Attachment 5, these do not impact risk levels or protectiveness. There have been no changes to the standardized risk assessment methodology that could affect the protectiveness of the remedy. There is no other information that calls into question the protectiveness of the remedy.

VIII. Issues

Table 5: Issues

Issues	Affects Current Protectiveness?	Affects Future Protectiveness?
Low levels of contamination exists in the deeper aquifer (>400 feet bgs) near the eastern extraction wells (EW4-5 and EW4-6). This contamination is below the extraction well screens. Additional monitoring is required to determine if migration of this deeper contamination is occurring past these wells.	No	Yes

IX. Recommendations and Follow-up Actions

Table 6: Recommendations and Follow-up Actions

Issue	Recommendations and Follow-up Actions	Party Responsible	Milestone Date
Potential need for additional/new pumping to address deeper contamination. Additional monitoring needed first.	1) Review monitoring well program and determine the number and location of additional monitoring wells needed.	EPA	2/2012
	2) Evaluate whether additional pumping or new extraction wells are needed to address the deeper (> 400 feet bgs) intermediate zone contamination and, if necessary, install wells and pipelines.	EPA	3/2013

In addition to the Issues and Recommendations, the following areas of improvement, which do not affect protectiveness, were identified during the five-year review

- The shallow zone and intermediate zone target extraction rates are not optimized to current contaminant conditions. Based on recent contaminant transport modeling, revised target extraction rates are needed.
- Because the CDPH Notification Level for 1,4-dioxane has recently been lowered, a contingency plan with appropriate 1,4-dioxane trigger levels for initiating additional action(s) should be developed.
- DTSC and EPA should finalize development of the Whittier Narrows OU Performance Evaluation Plan to provide routine evaluation of the remedy, including data collection, annual data evaluation and annual reporting.
- A TMDL for nitrogen loading to Legg Lakes, as is currently proposed, could potentially impact discharges of treated water to the lakes. After a new TMDL is promulgated, EPA can submit a request to the RWQCB for alternative concentration-based wasteload allocations along with a Lake Management Plan.
- If the revised extraction rates for the remedy developed while resolving the Issue identified above exceed the City of Whittier's water demands, EPA will need to re-engage potential treated water recipients and finalize arrangements for an additional end user.

X. Protectiveness Statement

The Whittier Narrows OU currently protects human health and the environment because there is no exposure to contaminated groundwater and groundwater containment is occurring. The additional monitoring described above will help determine whether adjustments to the groundwater extraction systems are warranted to optimize groundwater containment.

XI. Next Review

The next five-year review for the Whittier Narrows OU, San Gabriel Valley (Area 1) Superfund Site is required by September 2016, five years from the date of this review.

Five-Year Review ARARs Evaluation TM

5-Year Review – Applicable or Relevant and Appropriate Requirements (ARARs) Evaluation for the Whittier Narrows OU, San Gabriel Valley Superfund Sites

PREPARED FOR: Bella Dizon/EPA Region IX

PREPARED BY: CH2M HILL

DATE: April 21, 2011

PROJECT NUMBER: 381400.OM.04

This technical memorandum presents an evaluation of the Applicable or Relevant and Appropriate Requirements (ARARs) at the Whittier Narrows OU (WNOU) of the San Gabriel Valley Superfund Sites (site).

Purpose of ARARs Review

The purpose of an ARARs review is to determine whether laws, regulations, or guidance promulgated since approval of site decision documents alter the remedy's protectiveness of human health and the environment. This review evaluates changes to ARARs since the last 5-year review was conducted in 2006.

ARARs are established in the Record of Decision (ROD). Changes to ARARs, where necessary, can be memorialized in ROD Amendments or Explanation of Significant Differences (ESDs).

The preamble to the National Contingency Plan (NCP) states that remedy selection decisions are not to be reopened unless new or modified requirements call into question the protectiveness of the selected remedy (55 CFR 8757, March 8, 1990). This is interpreted to mean generally that ARARs are frozen at the time of remedy approval, unless updated by additional decision documents.

ARARs Background

Section 121(d) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) requires that remedial actions implemented at CERCLA sites are carried out in compliance with any Federal or more stringent State environmental standards, requirements, criteria, or limitations that are determined to be ARARs.

CERCLA response actions are exempted by law from the requirement to obtain Federal, State or local permits related to any activities conducted completely on-site. However, this does not remove the requirement to meet the substantive provisions of permitting regulations that are ARARs.

Applicable. Applicable requirements are cleanup standards, criteria, or limitations promulgated under federal or state law that specifically address the situation at a CERCLA site. A requirement is applicable if the jurisdictional prerequisites of the environmental standard show a direct correspondence when objectively compared with the conditions at the site.

Relevant and appropriate. If a requirement is not legally applicable, the requirement is evaluated to determine whether it is relevant and appropriate. Relevant and appropriate requirements are those cleanup standards, standards of control, and other substantive environmental protection requirements, criteria, or limitations promulgated under federal or state law that, while not applicable, address problems or situations sufficiently similar to the circumstances of the proposed response action and are well suited to the conditions of the site. The criteria for determining relevance and appropriateness are listed in 40 CFR 300.400(g) (2).

To be considered (TBC). TBC criteria are requirements that may not meet the definition of an ARAR, but still may be useful in determining whether to take action at a site or to what degree action is necessary. TBC criteria, as defined in 40 CFR 300.400(g) (3), are non-promulgated advisories or guidance issued by federal or state government that are not legally binding but may provide useful information or recommended procedures for remedial action. Although TBC criteria do not have the status of ARARs, they are considered together with ARARs to establish the required level of cleanup for protection of human health and the environment.

Pursuant to EPA guidance, ARARs generally are classified into three categories: chemical-specific, location-specific, and action-specific requirements. These categories of ARARs are identified below:

- **Action-specific ARARs** are requirements that apply to specific actions that may be associated with site remediation. Action-specific ARARs often define acceptable handling, treatment, and disposal procedures for hazardous substances. These requirements are triggered by the particular remedial activities that are selected to accomplish a remedy. Examples of action-specific ARARs include requirements applicable to landfill closure, wastewater discharge, hazardous waste disposal, and emissions of air pollutants.

- **Chemical-specific ARARs** include those laws and regulations that regulate the release to the environment of materials possessing certain chemical or physical characteristics or containing specified chemical compounds. These requirements generally set health- or risk-based concentration limits or discharge limits for specific hazardous substances.

- **Location-specific ARARs** are those requirements that relate to the geographical or physical location of the site, rather than the nature of the contaminants or the proposed site remedial actions. These requirements may limit the placement of remedial action, and may impose additional constraints on the cleanup action. For example, location-specific ARARs may refer to activities in the vicinity of wetlands, floodplains, endangered species habitat, and areas of historical or cultural significance.

Whittier Narrows OU Background

The WNOU is located within the San Gabriel Valley Superfund Site, Area 1 (CAD980677355), in Los Angeles County, California. The San Gabriel Valley Area 1 site is part of a larger area of groundwater contamination located near the San Bernardino County border, in Los Angeles County, California. The site is situated to the south of the Pomona Freeway and to the west of the San Gabriel Freeway, and consists of low lying hills. Much of WNOU is utilized for flood control, and the Whittier Narrows Flood Control Dam serves as a boundary between the adjacent San Gabriel and Central Basins. Two major rivers located within WNOU boundaries are the San Gabriel and Rio Hondo Rivers. Land use in the area is a mix of residential, commercial, recreational, and light industrial. The nearest residential areas are South El Monte and South San Gabriel to the north and Montebello and Pico Rivera to the south. Groundwater from onsite production wells is used for domestic, industrial, and agricultural purposes. Whittier Narrows is the only location where groundwater flows out of the San Gabriel Basin into the adjoining Central Basin.

The San Gabriel Valley has been the subject of environmental investigation since 1979 when groundwater contaminated with volatile organic compounds (VOCs) was first identified. Subsequent investigation by EPA and others revealed the extent of groundwater contamination in the aquifers of the San Gabriel Valley (the San Gabriel Valley groundwater system is known as the San Gabriel Basin). In May 1984, four broad areas of contamination within the basin were listed as San Gabriel Areas 1 through 4, and the San Gabriel Valley was listed on EPA's NPL.

WNOU is officially part of the San Gabriel Valley Area 1 Superfund Site. EPA divided the San Gabriel Basin into eight operable units (OUs) to provide a means of planning remedial activities in the basin. WNOU is one of eight OUs within the San Gabriel Valley Superfund Site. The other OUs identified by EPA are Alhambra, Baldwin Park, El Monte, Puente Valley, Richwood, South El Monte and Suburban.

The groundwater contamination in the San Gabriel Basin results from the historic use and improper handling and disposal of tetrachloroethene (PCE), trichloroethene (TCE), and other chemicals. These chemicals were used in large quantities at industrial facilities across much of the San Gabriel Valley as early as the 1940s, and by hundreds of businesses in the 1960s, 1970s and 1980s for degreasing, metal cleaning, and other purposes. The chemicals were released to the ground by a combination of disposal, careless handling, leaking tanks and pipes, and other means.

EPA conducted Remedial Investigation/Feasibility Study (RI/FS) activities in the WNOU beginning in the late 1980s. The RI/FS approach is a methodology that the Superfund program has established for characterizing the nature and extent of risks posed by uncontrolled hazardous waste sites to evaluate potential remedial options. The RI serves as a mechanism to collect data for site characterization. The FS serves as the mechanism for development, screening, and evaluation of potential remedial alternatives. An Operable Unit Feasibility Study (OUFS) Report for the WNOU was completed and issued for public review in September 1992. At that time, contaminant concentrations were low and posed a minimal threat to human health and groundwater supplies in the Central Basin.

EPA has issued the following decision documents for the WNOU:

- Record of Decision (ROD), issued March 31, 1993

- ROD Amendment, issued November 10, 1999

The WNOU 1993 ROD focused on evaluation of groundwater contamination potentially flowing from upgradient areas in the San Gabriel Basin into the Whittier Narrows Area and subsequently into the Central Basin. The selected remedial action, as stated in the ROD, was no action, with groundwater monitoring.

Initially, contaminant concentrations were relatively low throughout Whittier Narrows and groundwater resources in the Central Basin were not threatened. Then contaminated groundwater from upgradient areas began migrating into the western side of Whittier Narrows causing significant increases in contaminant concentrations. The increases in contaminant concentrations posed an imminent threat to groundwater resources in the Central Basin. This threat prompted EPA to initiate additional data collection activities and evaluation of active remedial actions.

In 1997, EPA initiated additional groundwater monitoring and further characterization of the hydrogeology in western Whittier Narrows. New monitoring wells were installed, and large-scale aquifer tests were conducted using City of Whittier, Pico Rivera, and Texaco production wells. Results of EPA's investigations in Whittier Narrows were presented in the Site Characterization Report for Whittier Narrows (EPA, 1998a).

The 1999 ROD Amendment specified containment of groundwater exceeding drinking water standards in the vicinity of Whittier Narrows Dam as the site remedy. The selected remedial actions included groundwater containment near the Whittier Narrows Dam by extraction, treatment and discharge.

The system was designed to contain groundwater with chemical contaminant concentrations above primary drinking water standards and consisted of five key components:

- Groundwater extraction system located near the downgradient limit of contaminant concentrations exceeding maximum contaminant levels (MCLs).
- Centralized treatment to reduce contaminant concentrations to acceptable levels.
- Conveyance systems, such as pipelines and booster pumps, to transport contaminated groundwater from the wells to the treatment plant and to transport treated water from the plant to the designated end use.
- Discharge of the treated water; discharge options include use by a local water purveyor, recharge of the water back to the aquifer using existing Montebello Forebay spreading grounds or other recharge facilities.
- Groundwater monitoring to help optimize system design; measure the performance of the containment system and provide early warning of upgradient conditions that could affect the system.

The remedy was configured to meet ARARs. This includes ARARs related to protection of the drinking water supply, treatment of extracted groundwater, and discharge of the treated water (either to water purveyors or to the San Gabriel River and/or Rio Hondo).

Chemical-specific ARARs were identified for the following chemicals of concern (COCs) at

the site in the 1999 ROD Amendment:

- Chloroform
- cis-1,2-Dichloroethene (cis-1,2-DCE)
- 1,1-Dichloroethane (1,1-DCA)
- 1,1-Dichloroethene (1,1-DCE)
- 1,2- Dichloroethane (1,2-DCA)
- 1,4-Dioxane
- Ethylbenzene
- Styrene
- Tetrachloroethene (PCE)
- Toluene
- Trichloroethene (TCE)
- 1,1,1-Trichloroethane (1,1,1-TCA)
- Xylenes

The ROD identified MCLs as groundwater cleanup standards for the site.

Whittier Narrows OU ARARs Review

The following three tables list the ARARs established in the 1999 ROD Amendment, summarize the requirement for each ARAR, cite the regulatory basis for each ARAR, state the evaluated status of each ARAR, and comment on regulatory changes for each ARAR where applicable.

Table 1 contains action–specific ARARs, Table 2 contains chemical–specific ARARs, and Table 3 contains location-specific ARARs. The tables provide the applicable requirements and citation for each established ARAR; and describe whether any updates have occurred for each ARAR in the previous five years. Current versions of the California Code of Regulations (CCR), and the Code of Federal Regulations (CFR) were consulted to review pertinent updates of laws, regulations, or guidance.

Action-specific ARARs and TBCs

Actions identified in the 1999 ROD Amendment include:

- groundwater extraction, treatment, and treated water discharge
- management and disposal of hazardous waste

Table 1 presents the action-specific ARARs and TBCs for the site. As stated in the 1999 ROD Amendment, Subsection III.G of the California State Water Resources Control Board (SWRCB) Resolution 92-49 "Policies and Procedures for Investigation and Cleanup and Abatement of Discharges under Water Code Section 13304" requires attainment of background water quality or, if background levels cannot be restored, the best quality of water that is reasonable. Resolution 92-49 is not an ARAR because this is a remedial action intended to contain the spread of contamination, rather than a final action intended to restore groundwater in the WNOU.

Chemical-specific ARARs and TBCs

Table 2 presents the chemical-specific ARARs and TBCs for the site.

The 1999 ROD Amendment specified MCLs as groundwater cleanup standards for the site. Based on the Safe Drinking Water Act (SDWA), and pursuant to 40 CFR Section 300.430(e)(2)(i)(B), MCLs and non-zero Maximum Contaminant Level Goals (MCLGs) are relevant and appropriate as in-situ aquifer standards for groundwater that is used, or may be used, as drinking water.

As stated in the 1999 ROD Amendment, EPA has determined that the federal MCLs are ARARs for any groundwater that is treated and used for domestic, municipal, industrial, or agricultural purposes, and for any groundwater that is discharged to the environment. In addition, these MCLs are ARARs for currently uncontaminated groundwater in the Montebello Forebay downgradient of Whittier Narrows Dam.

California has established state MCLs for sources of public drinking water, under the California Safe Drinking Water Act of 1976, Health and Safety Code (H&SC) Section 4010.1 and 4026(c), CCR Title 22, Sections 64431 and 64444. Some state MCLs are more stringent than the corresponding federal MCLs. EPA has determined that the more stringent state MCLs are relevant and appropriate for the WNOU.

There are also some chemicals that lack federal MCLs. Where state MCLs exist for chemicals that lack federal MCLs, EPA has determined that the state MCLs are relevant and appropriate for the WNOU.

Since the ROD was published in 1999 the following changes to MCLs and MCLGs for the site COCs have occurred:

- The federal MCL for chloroform (100 ug/L in the 1999 ROD) was lowered to 80 ug/L in 2002. An MCLG of 70 ug/L was established in 2004.
- The federal MCL for ethylbenzene of 700 ug/L was identified in the 1999 ROD. California adopted an MCL of 300 ug/L in 2003.

Retaining the levels identified in the 1999 ROD will not provide a level of protection to human health equivalent to the more recent values cited above.

One chemical of concern detected in the WNOU groundwater, 1,4-dioxane, does not have an MCL or nonzero MCLG. For contaminants lacking MCLs and MCLGs, EPA refers to other available criteria and guidance (TBCs). The California Department of Public Health (CDPH) established a notification level (formerly called an action level) of 3 ug/L for 1,4-dioxane in 1998. A notification level is the concentration of a contaminant in drinking water, at which CDPH has determined, based on available scientific information, that there is an adequate margin of safety to prevent potential risks to human health. California Health and Safety Code section 116455 requires operators of public water systems to notify local governments when a drinking water well exceeds an action level. In practice, drinking water wells that exceed action levels are almost always shut down or have treatment added.

The 1999 ROD Amendment stated that: "EPA has determined that all treated groundwater that is served as drinking water or discharged to the environment shall meet the state action level of 3 ppb for 1,4-dioxane."In November 2010 CDPH lowered the notification level to 1 ppb. Retaining the level identified in the 1999 ROD will not provide a level of protection to

human health equivalent to the revised notification level adopted in 2010.

As stated in the 1999 ROD Amendment, because the selected remedy is an interim measure to contain contaminant migration, EPA has not established chemical-specific ARARs for restoration of the contaminated portions of the WNOU; therefore, ARARs for restoration will be addressed in the Final ROD for the San Gabriel Valley Superfund Sites.

Location-specific ARARs and TBCs

Table 3 presents location-specific ARARs and TBCs for the site. The table shows that revisions in the state and federal regulations did not affect the location-specific ARARs and TBCs in the ROD.

TABLE 1
Action Specific ARARs

Action	Requirement	Citation	Origin	Determination	Status	Comments
Groundwater Extraction, Treatment, and Treated Water Discharge	Protect water quality objectives as identified in the Water Quality Control Plan for the Los Angeles Region (Basin Plan).	CWA; SDWA; and Porter-Cologne	1999 ROD Amendment	Applicable	No Change	Porter-Cologne Water Quality Act incorporates the requirements of the federal Clean Water Act and implements additional standards and requirements for surface and groundwater of the state.
Groundwater Extraction, Treatment, and Treated Water Discharge	Any activity that may increase the volume or concentration of a waste discharged to surface or groundwater is required to use the "best practicable treatment or control."	State Water Resource Control Board Resolution 68-16	1999 ROD Amendment	Applicable	No Change	Resolution 68-16 is applicable if the remedy discharges treated groundwater to either the Rio Hondo or the San Gabriel River.
Groundwater Extraction, Treatment, and Treated Water Discharge	Site investigation activities removal actions meet best available technology economically achievable for treatment and disposal of discharges.	CERCLA Section 104(b)	1999 ROD Amendment	Applicable	No Change	Site investigation activities undertaken pursuant to CERCLA § 104(b) are considered to be removal actions (e.g., discharges from aquifer testing and spinner logging/depth specific sampling of water supply wells).
Management and disposal of hazardous waste	Land disposal requirements	RCRA; and CCR Title 22, Division 4.5	1999 ROD Amendment	Applicable	No Change	Land disposal requirements are applicable to the disposal of spent carbon generated during the treatment of groundwater for removal of VOCs.
Management and disposal of hazardous waste	Manifest requirements.	RCRA; and CCR Title 22, Division 4.5	1999 ROD Amendment	Applicable	No Change	Manifest requirements are ARARs in the event that the remedial action involves multiple water treatment units at different locations and requires the movement of hazardous wastes (e.g., spent carbon) between these locations.
Vadose zone extraction and treatment	New source (air contaminant units) review requirements.	CAA; and SCAQMD Rules 1301 through 1313	1999 ROD Amendment	Applicable	No Change	Rule 1303 requires that all new sources of air pollution in the district use best available control technology and meet appropriate offset requirements. Emissions offsets are required for all new sources that emit in excess of one pound per day.
Vadose zone extraction and treatment	New source (air contaminant units) review requirements.	CAA; and SCAQMD Rule 1401	1999 ROD Amendment	Applicable	No Change	SCAQMD Rule 1401 requires that best available control technology for toxics be employed for new stationary operating equipment, so that the cumulative carcinogenic impact from air toxics does not exceed the maximum individual cancer risk limit of 10 in 1 million (1 x 10-5). Many of the contaminants found in the WNOU groundwater are air toxics subject to Rule 1401.

TABLE 1
Action Specific ARARs

Action	Requirement	Citation	Origin	Determination	Status	Comments
Vadose zone extraction and treatment	New source (air contaminant units) review requirements.	CAA; and SCAQMD Rules 401 through 403	1999 ROD Amendment	Applicable	No Change	SCAQMD Rules 401 through 403 are also ARARs for construction and operation of remedial action facilities. SCAQMD Rule 401 limits visible emissions from a point source. Rule 402 prohibits discharge of material that is odorous or causes injury, nuisance, or annoyance to the public. Rule 403 limits downwind particulate concentrations.

Notes:

CERCLA = Comprehensive Environmental Response, Compensation, and Liability Act

CCR = California Code of Regulations

CFR = Code of Federal Regulations

EPA = U. S. Environmental Protection Agency

Porter-Cologne = CA Porter-Cologne Water Quality Act

RCRA = Resource Conservation and Recovery Act

SCAQMD = Couth Coast Air Quality Management District

SDWA = Safe Drinking Water Act

VOCs = Volatile Organic Compounds

TABLE 2
Chemical-Specific ARARs

Contaminant	Requirement	Citation	Origin	Determination	Status	Comments
Chemicals of Concern (COCs) (Chloroform, 1,1-DCE, 1,1-DCA, 1,2-DCA, cis-1,2-DCE, Ethylbenzene, Styrene, PCE, 1,1,1-TCA, TCE, Toluene, and Xylenes)	MCLs and MCLGs are applicable to water treatment standards.	SDWA; 40 CFR Section 300.430(e)(2)(i)(B) CA H&SC Section 4010.1 and 4026(c), CCR Title 22, Sections 64431 and 64444	1999 ROD Amendment	Applicable	Federal MCL for chloroform lowered to 80 ug/L in 2002, and MCLG of 70 ug/L adopted in 2004. California MCL of 300 ug/L adopted for ethylbenzene in 2003. No Change (i.e., MCLs and MCLGs remain applicable as aquifer standards	Federal MCLs and MCLGs, or California MCLs are relevant and appropriate as treatment standards for groundwater that is or may be used as drinking water. Retaining the levels cited in the 1999 ROD for chloroform and ethybenzene will not provide a level of protection to human health equivalent to the values adopted in 2004 and 2003, respectively..
Chemicals of Concern (COCs) (1,4-Dioxane,)	California Notification Levels are applicable to public water systems	CA H&SC Section 116455	1999 ROD Amendment	To Be Considered	Notification level (formerly called action level) was lowered to 1 ug/L in November 2010. It had been set at 3 ug/L when the 1999 ROD Amendment was signed and at the time of the 2006 5 year review	The 1999 ROD Amendment stated that EPA has determined that all treated groundwater that is served as drinking water or discharged to the environment shall meet the state action level of 3 ppb for 1,4-dioxane. Retaining the level cited in the 1999 ROD will not provide a level of protection to human health equivalent to the notification level adopted in November 2010.

Notes:
CA H&SC = California Health and Safety Code
CFR = Code of Federal Regulations
COCs = Chemicals of Concern
EPA = U. S. Environmental Protection Agency
MCLs = Maximum Contaminant Levels
MCLGs = Maximum Contaminant Level Goals
SDWA = Safe Drinking Water Act

TABLE 3
Location-Specific ARARs

Location	Requirement	Citation	Origin	Determination	Status	Comments
Locations that may impact listed threatened or endangered species	Avoid adverse impacts to listed threatened or endangered species, or conduct appropriate mitigation.	ESA; 15 USC Sections 1531 through 1544; 40 CFR Section 6.302(h) and 50 CFR Parts 17, 222 and 402	1999 ROD Amendment	Applicable	No Change	Any remedial actions that impact a proposed or listed threatened or endangered species or destroy or adversely modify the critical habitat of a listed species must comply with ESA.
Discharge to locations that may deleteriously affect fish, wildlife, or plant life	Prohibit the discharge of harmful quantities of hazardous materials into places that may deleteriously affect fish, wildlife, or plant life.	CA F&GC Sections 2080, 5650(a), 5650(b), 5650(f), 12015, and 12016	1999 ROD Amendment	Applicable	No Change	These provisions are applicable if the remedial action will result in the discharge of treated groundwater to surface waters.
Location of Hazardous Waste Treatment, Storage and Disposal Facilities (TSDFs)	Prohibits the placement of TSDFs within 200 feet of a fault displaced during the Holocene epoch; and requires that TSDFs located within a 100-year floodplain be capable of withstanding a 100-year flood.	22 CCR Section 66264.18	1999 ROD Amendment	Applicable	No Change	These standards are applicable to the construction of any new groundwater treatment facilities used as part of this remedial action.
Preserve historic and archaeological resources	Establishes requirements for the evaluation and preservation of historical and archaeological data that may be destroyed through alteration of terrain as a result of a federal construction project or a federally licensed activity or program.	16 USC Section 469; and 40 CFR Part 6.301(c)	1999 ROD Amendment	Applicable	No Change	There are several documented archeological sites within the Whittier Narrows Flood Control Basin. These requirements are applicable if the remedial action will interfere with any of these facilities.
Preserve historic sites	Requires federal agencies to consider the existence and location of landmarks on the National Registry of Natural Landmarks to avoid undesirable impacts on such landmarks.	16 USC Sections 461 through 467; and 40 CFR Part 6.301(a)	1999 ROD Amendment	Applicable	No Change	The remedial action is not anticipated to affect any of the facilities regulated under the act. However, during any additional preliminary designs, a complete review shall be made of impacted areas.

Attachment 3
Site Inspection Report

Five-Year Review Site Inspection Checklist

I. SITE INFORMATION	
Site name: Whittier Narrows Operable Unit	**Date of inspection:** March 10, 2011
Location and Region: Los Angeles County, California	**EPA ID:** CAD980677355
Agency, office, or company leading the five-year review: U. S. Environmental Protection Agency, Region 9 (with CH2M HILL support)	**Weather/temperature:** Clear, around 74°F

Remedy Includes: (Check all that apply)

Landfill cover/containment	Monitored natural attenuation
Access controls	Groundwater containment
Institutional controls	Vertical barrier walls
√ Groundwater pump and treatment	
Surface water collection and treatment	

II. INTERVIEWS

1. **O&M site manager** Ken Kittredge (Name) Whittier Water Manager (Title) March 10, 2011 (Date)

Interviewed X at site

Problems, suggestions: Ken indicated that O&M was proceeding fine with no particular problems. He noted that the City is continuing to investigation the air vacs on the non-potable site as a source of the high pressures.

2. **O&M staff** Dan McKenna (Name) Whittier Operations Manager (Title) March 10, 2011 (Date)

Interviewed X at site

Problems, suggestions: Dan said that there were no particular problems of note currently. He indicated that backwash operations are now much better, which should help during the next carbon changeout.

II. ON-SITE DOCUMENTS & RECORDS VERIFIED (Check all that apply)

1. **O&M Documents**

O&M manual	X Readily available	X Up to date (See remarks)
As-built drawings	X Readily available	X Up to date (See remarks)
Maintenance logs	Readily available	Up to date X N/A

Remarks: The O&M Manual and as-built drawings are both available and are reasonably up-do-date. However, both need to be updated to incorporate system changes implement over the last 5 to 6 years.

2. **Permits and Service Agreements**

Effluent discharge	X Readily available	X Up to date N/A

Remarks: The City's amended water supply permit from CDPH serves as the equivalent of an effluent discharge permit and provides the effluent monitoring requirements.

3.	**Groundwater Monitoring Records** **X** Readily available X Up to date Remarks: The City monitors either monthly, quarterly or annually depending on their permit requirements. EPA conducts OU-wide monitoring annually to monitor overall plume conditions.
4.	**Discharge Compliance Records** Water (effluent) X Readily available X Up to date Remarks: The City conducts discharge monitoring monthly and e-mails the results to CDPH and EPA monthly. Quarterly reports are also distributed that provide discharge information.

IV. O&M COSTS	
1.	**O&M Organization** Other: The City of Whittier provides system O&M under a cooperative agreement with EPA.
2.	**O&M Cost Records** Funding mechanism/agreement in place: A grant is in place that funds the City's O&M costs. The main body of the Five-Year Review Report includes a table with the annual O&M costs and a comparison to the original O&M cost estimate from the IROD.
3.	**Unanticipated or Unusually High O&M Costs During Review Period** Describe costs and reasons: There were several submersible pump/motor failures resulting in increased O&M costs. Ultimately, the decision was made to replace the submersible pumps with above-ground motors and line shaft pumps. More extensive repairs than expected were required to the internal of the LGAC vessels during carbon changeout because of corrosion associated with the sample ports.

III. ACCESS AND INSTITUTIONAL CONTROLS Applicable √ N/A	
A. General	
1.	**Vandalism/trespassing** Location shown on site map X No vandalism evident Remarks: Previously, there were multiple incidents of vandalism and stolen property. The City now has a security service that periodically patrols the project area. There have not been any problems observed for several years now.
2.	**Land use changes off site** Remarks: There was previously a large industrial facility (a Texaco research facility) adjacent to the treatment plant. That property has now changed over to a trucking facility.

IV. GROUNDWATER/SURFACE WATER REMEDIES X Applicable N/A	
A. Groundwater Extraction Wells, Pumps, and Pipelines X Applicable N/A	

1. **Pumps, Wellhead Plumbing, and Electrical**
X Good condition X All required wells properly operating X Needs Maintenance
Remarks:
Six of the seven extraction wells (4 shallow and 3 intermediate) are operable and in good condition. One of the shallow wells, EW4-9, has an issue with the pump not producing the expected volume. However, this well is not critical and there are no plans to pump that well.

Several of the attached photos show the extraction wells and associated electrical and control facilities.

2. **Extraction System Pipelines, Valves, Valve Boxes, and Other Appurtenances**
X Good condition Needs Maintenance
Remarks:
The conveyance pipelines are all operating as expected and have not caused any operational issues or required unexpected maintenance.

3. **Spare Parts and Equipment**
X Readily available Good condition Requires upgrade Needs to be provided
Remarks: Although there are minimal spare parts and equipment kept on-site, nearly all parts and equipment are readily available locally.

C. Treatment System X Applicable

1. **Treatment Train** (Check components that apply)
Metals removal Oil/water separation Bioremediation
Air stripping X Carbon adsorbers
Filters_____
Additive (*e.g.*, chelation agent, flocculent)_____
Others_____
X Good condition X Needs Maintenance The treatment plant is generally in good condition. However the carbon vessels, tanks and some of the piping are starting to show external signs of weathering and rust. The entire system should be repainted to head-off potential future problems.
X Sampling ports properly marked and functional
Sampling/maintenance log displayed and up to date
X Equipment properly identified
Remarks: If chlorination is going to continue at the plant, it may be advisable to provide a 2nd chlorine injector to improve reliability.
_____

2. **Electrical Enclosures and Panels** (properly rated and functional)
X Good condition Needs Maintenance
Remarks_____
_____

3. **Tanks, Vaults, Storage Vessels**
X Good condition X Proper secondary containment Needs Maintenance
Remarks: As noted above, the tanks should be repainted.
_____

4. **Discharge Structure and Appurtenances**

X Good condition Needs Maintenance

Remarks: The flow meter on the shallow discharge to the south Legg Lakes is not working properly. However, discharge is not currently flowing that direction so the meter is not needed.

5. **Treatment Building(s)**

X Good condition (esp. roof and doorways) Needs repair

Chemicals and equipment properly stored

Remarks_____

6. **Monitoring Wells** (pump and treatment remedy)

X Properly secured/locked X Functioning X Routinely sampled X Good condition

X All required wells located Needs Maintenance

Remarks: Although the wells were not all visited during the inspection. All wells had been monitored in January 2011. The only significant issue is at MW1-MP where the Westbay casing has failed so the well is inoperable. However, there is a surrounding well cluster that provides multi-depth monitoring at many of the same intervals as the Westbay well.

XI. OVERALL OBSERVATIONS

A. Implementation of the Remedy

Describe issues and observations relating to whether the remedy is effective and functioning as designed. Begin with statement of what the remedy is to accomplish (i.e., to contain contaminant plume).

This is a large-scale groundwater containment remedy. However, the system itself is very straightforward employing groundwater extraction, conveyance and treatment of low-level VOCs with carbon adsorption. O&M of this type of system is not complex. The City staff appears to be quite capable of operating the system effectively.

Interview Reports

INTERVIEW RECORD

Site Name: San Gabriel Valley Area 1 - Whittier Narrows OU		**EPA ID No.:** CAD980677355
Subject: 5 Year Review Interviews		**Time:** 2:00 p.m. **Date:** 3/8/11
Type: Telephone Visit X Other **Location of Visit:** City of Whittier City Hall		☐ Incoming ☐ Outgoing
Contact Made By:		
Name: Bella Dizon/EPA and David Towell/CH2M HILL	**Title:** Remedial Project Manager	**Organization:** EPA/CH2M HILL
Individual Contacted:		
Name: Dan Wall	**Title:** Assistant Public Works Director	**Organization:** City of Whittier
Telephone No: 562-464-3545 **E-Mail Address:** dwall@cityofwhittier.org	**Street Address:** City Hall, 13230 Penn Street **City, State, Zip:** Whittier, CA	

Summary Of Interview

1. What is your overall impression of the project? (general sentiment)

Response: Dan feels that it is a needed project. He said it appeared to be accomplishing its goals and is a successful project.

2. What effects have site operations had on the surrounding community?

Response: Because the project site is in a relatively isolated location, Dan does not think the project is having any negative effects on the surrounding community. He said the discharge to Legg Lakes appears to have a positive effect. The project does not have any impacts on the City of Whittier residents and he is not aware of any complaints.

3. Are you aware of any community concerns regarding the site or its operation and administration? If so, please give details.

Response: Most City residents are probably not aware that the water from the Whittier Narrows OU project is a component of the City's water supply. New City council members are always surprised to learn of the existence of the project. The City's state-mandated (CCR) distribution of water quality data always raises general questions about water quality, but not specific to the EPA project.

4. Are you aware of any events, incidents, or activities at the site such as vandalism, trespassing, or emergency responses from local authorities? If so, please give details.

Response: There have not been any incidents of trespassing or vandalism for several years. The City has security company the periodically patrols the entire project area (wells and treatment plant) at night.

5. Do you feel well informed about the site's activities and progress?

Response: Dan fells well informed about the project's intent and progress. He has read background documents regarding the project. He is aware that PCE concentrations are being reduced and overall mass loading is going down. He is aware of the ongoing system improvements, including replacement of submersible pumps and upgrading the VFD controllers.

6. Do you have any comments, suggestions, or recommendations regarding the site's management or operation?

Response: Dan feels it would be beneficial if there was another end user for the project so the extraction rates were not limited solely by the City's water demands. He also believes that the project's reliability has increased and that current operations are in good shape.

He thinks that there should be some relief from the amount of sampling that the City is required to do for the project in accordance with the operating permit issued by the state (California Department of Public Health or DPH). For example, monthly sampling of every carbon vessel does not appear to be necessary if the effluent remains clean. Also, Dan does not believe that 24-hour staffing of the project is needed. This is something that DPH has raised as a possibility.

Summary Of Interview

1. What is your overall impression of the project?
   Response: David's overall impression is that the treatment plant is operating and it is in pretty good shape. For the most part, operations have become more reliable over the last couple of years. As of the last 5-year Review there were still some operational issues with the City getting the plant up and running, problems with electrical cabling, and issues with some wells. These technical and operational issues have been worked on and the resolutions have led to less operational constraints on the project.

2. Is the remedy functioning as expected? How well is the remedy performing?
   Response: David replied that the remedy's basic components, a pump and treat system, are functioning as expected. On the performance side, pumping rates are less than what was targeted which resulted in not meeting 100% containment goals. In the deeper zones there have been limited detections of contaminants moving outside the containment zone, which means that there is not full containment. Based on the cleanup goals identified in the ROD, there are no contaminant or containment issues in the shallow zones.

3. What does the monitoring data show? Are there any trends that show contaminant levels are decreasing?
   Response: David noted that there are significant decreasing trends in contaminant levels downgradient of the remedy where concentrations have dropped dramatically. Upgradient there have been significant reductions in the shallow zone and reductions in deeper zone, but not as dramatic as the shallow zone. Monitoring data show that NDMA is not an issue mainly due to changes in NDMA levels in discharges from L.A. County's Water Reclamation Plant. Perchlorate is non-detect or detected at only trace levels within Whittier Narrows. 1,4-Dioxane is frequently detected but the data show that its levels are not changing. Because the drinking water standards for 1,4-dioxane have changed recently the constituent could potentially be a concern in the future. The Data Review and Remedy Performance Evaluation Technical Memorandum, which is included as an attachment to the 5-year Review, discusses the monitoring data in more detail.

4. Is there a continuous on-site O&M presence? If so, please describe staff and activities. If there is not a continuous on-site presence, describe staff and frequency of site inspections and activities.
   Response: David replied that no, there is not continuous onsite O&M staff, but there is continuous offsite monitoring of the plant and control system and daily site visits. The site visit activities include data collection, system checks, and taking required readings to verify electronic control system accuracy and performance. Operational staff are always available on call.

5. Have there been any significant changes in the O&M requirements, maintenance schedules, or sampling routines since start-up or in the last five years? If so, do they affect the protectiveness or effectiveness of the remedy? Please describe changes and impacts.
   Response: David responded that the basic O&M system requirements have not changed since plant start up. It is a straightforward system to operate. There have been changes that have led to efficiencies, increased reliability, and decreased costs. Monitoring requirements have changed and resulted in decreased operational costs. Carbon change out requirements from the State have also changed which improves use of the carbon and reduces the likelihood of large scale downtimes associated with future carbon change outs.

6. Have there been unexpected O&M difficulties or costs at the site since start-up or in the last five years? If so, please give details.
   Response: David noted that there have been two unexpected O&M issues at the treatment plant. Two years ago, the city encountered administrative and technical issues during the last carbon changeout which resulted in essentially an eight month shut off of the intermediate zone treatment system. To likelihood of this occurring again is minimal because of: better understanding of the State's requirements, changes in the permit requirements for carbon changeout, and reduced chance of changing the type of carbon being used at the plant. The second issue was the excessive failure of submersible pumps that were installed in the extraction wells and the excessive down time required when trying to change them out. To solve this problem they have switched to above ground pumps that provide the same services but are more reliable and easier to service. This change has decreased downtime, lowered O&M costs and increased reliability and consistency over the last couple of years.

7. Have there been opportunities to optimize O&M, or sampling efforts? Please describe changes and resultant or desired cost savings or improved efficiency.
   Response: David responded that for sampling program, there are two components, the treatment plant sampling and the aquifer sampling. Aquifer sampling in the OU should increase. Treatment plant sampling frequencies should decrease. While the decrease in one sampling program balances out the increase in the other sampling program, efficiencies have been realized and there are still efficiencies that can be made. There have not been many opportunities to reduce costs in O&M due to nature of the system, but there are potential opportunities for optimization that could be realized depending on the target rates for containment. If EPA lowers the target rates, then there might be opportunities to make the system more efficient at the treatment plant. Additionally any reductions in the amount of water being pumped would lead to lower operating costs and increased cost savings in all phases of the remedy.

8. Comments, suggestions or recommendations.
   Response: David provided three recommendations: 1. Complete the evaluation of whether target contaminant rates can be reduced so you can realize the benefits. 2. There should be a more formal and routine process for evaluating remedy performance. The initial steps towards this have begun. 3. There is a data gap that needs to be resolved. There might be contamination that is migrating deeper than the current extractions wells. Install additional monitoring points to determine flow and direction of contamination. All of these ideas are explored further in the Data Review and Remedy Performance Evaluation Technical Memorandum attached to the 5 year review. There are currently activities under way to address these recommendations.

Attachment 5
Risk Assessment and Toxicology Analysis Technical Memorandum

Risk Assessment and Toxicology Analysis for the Whittier Narrows OU, San Gabriel Valley Superfund Sites

PREPARED FOR: Bella Dizon/EPA Region IX

PREPARED BY: CH2M HILL

DATE: April 28, 2011

PROJECT NUMBER: 381400.OM.04

This technical memorandum (TM) presents a risk assessment and toxicology analysis to support the second five-year review of the Whittier Narrows Operating Unit (OU) of the San Gabriel Valley Superfund Sites, Los Angeles County, California. The baseline screening level human health risk assessment was conducted in September, 1992 for the Whittier Narrows OU (EPA 1992). An addendum to 1992 baseline risk assessment was prepared in November 1997 (EPA, 1997). In addition, there was a supplemental risk assessment to the 1992 baseline risk assessment which evaluated 1997 groundwater data (EPA, 1998). The first five year review of the Whittier Narrows OU was conducted in September 2006 (EPA 2006). The Interim Record of Decision (IROD) selecting the remedy for the Whittier Narrows OU was issued by EPA in March 1993 and an amendment to the IROD was issued in November, 1999.

As described in the guidance for EPA's Comprehensive Five-Year Reviews (EPA, 2001), a key purpose of the five-year review process for a site is to determine if the remedy is, or upon completion will be, protective of human health and the environment. Protectiveness is generally defined in the National Contingency Plan (NCP) by the risk range and the Hazard Index (HI). The following three questions are part of the technical assessment of the protectiveness of the remedy, as outlined in the EPA five-year review guidance document:

- Question A – Is the remedy functioning as intended by the decision documents?
- Question B - Are the exposure assumptions, toxicity data, and remedial action objectives (RAOs) used at the time of remedy selection still valid?
- Question C – Has any other information come to light that could call into question the protectiveness of the remedy?

To determine whether the remedy at the Whittier Narrows OU remains protective of human health, the sections below evaluate changes in site conditions, changes in exposure pathways, changes in toxicity for the chemicals of concern, and changes in cleanup levels since completion of the Risk Assessment and selection of the Site remedy. The risk assessment prepared by EPA in 1992 and addendum and supplemental risk assessment prepared by CH2M HILL in 1997 and 1998 were reviewed as part of these evaluations.

1.1 Changes in Site Conditions

There has been no significant change in site conditions since the risk assessment in 1997. The site is mainly flood control land with a Nature Center, parks and a few administrative offices and maintenance buildings.

1.2 Changes in Exposure Pathways

The 1997 Risk Assessment Addendum and 1998 Supplemental Risk Analysis identified the exposure pathways at Whittier Narrows OU as domestic use of groundwater including ingestion, inhalation of volatiles from water used for bathing, cooking and laundering, and dermal exposure. The additional exposure pathway of vapor intrusion is discussed below.

Since 1999, the understanding of the fate and transport of chemicals in the subsurface has evolved, with greater concern over the vapor intrusion pathway, particularly at sites with existing buildings and past releases of TCE. The Whittier Narrow OU area is predominately open space with a few administrative or maintenance buildings. EPA's draft Vapor Intrusion Screening Guidance issued November 2002 states that the vapor intrusion pathway should be investigated if the levels of TCE or PCE exceed 5 µg/L[1] (MCL for PCE and TCE) in the shallow zone groundwater (less than 150 feet). During the past five years, TCE has been detected at concentrations of less than 5 µg/L in the shallow zone groundwater of the Whittier Narrows OU. PCE has been detected at concentrations above 5 µg/L in the shallow zone groundwater at three monitoring wells (MW4-8, MW2-5 and MW4-15); however, PCE concentrations have been declining. Since mid-January 2009, PCE has only been detected at concentrations less than 5 µg/L in the shallow zone groundwater within the Whittier Narrows OU. Therefore, currently vapor intrusion is not a concern at Whittier Narrows OU. However, monitoring of PCE and TCE levels should be continued to detect any MCL exceedance that may result in the need for a future soil vapor intrusion pathway evaluation.

1.3 Changes in Toxicity

The toxicity of the chemicals of concern was evaluated using health-based and regulatory criteria. Table 1 provides a direct comparison between the 1997 and 1998 screening levels and current EPA Region 9 Tap Water Regional Screening Levels (RSLs).

Since the risk assessment addendum and supplemental risk analysis were completed, there have been a number of changes to the toxicity values for certain contaminants of concern at the Site. Revisions to the toxicity values for 1,1,1- trichloroethane; 1,1-dichloroethylene; 1,2-dichloroethylene (cis); chloroform; toluene; and TCE indicate a lower risk from exposure to these chemicals than previously considered. On the other hand, evaluation of the toxicity values for 1,1-dichloroethane, ethylbenzene, PCE, xylenes (mixed) indicate higher risks from exposure than previously considered.

The greatest uncertainty with toxicological changes for Site contaminants are anticipated for TCE, one of contaminant of concern at the Site. In August 2001, EPA's Office of Research and Development (ORD) released "*Trichloroethylene Health Risk Assessment: Synthesis and*

[2] Region 9 Tap Water RSL, November, 2010

Characterization" (TCE Health Risk Assessment) for external peer review. The draft TCE Health Risk Assessment takes into account recent scientific studies of the health risks posed by TCE. According to the draft TCE Health Risk Assessment, for those who have increased susceptibility and/or higher background exposures, TCE could pose a higher risk through inhalation than previously considered. The draft TCE Health Risk Assessment is available online at: http://cfpub.epa.gov/ncea/cfm/recordisplay.cfm?deid=23249.

EPA's ORD and Office of Solid Waste and Emergency Response have requested additional external peer review of the draft TCE Health Risk Assessment by the National Academy of Sciences. Consequently, review of the toxicity value for TCE may continue for a number of years. This issue will need to be updated in subsequent five-year reviews.

1.4 New Contaminants

The Interim ROD also identified 1,4-dioxane as a chemical of concern, although it was not evaluated in the risk assessment. The chemical 1,4-dioxane is a semivolatile organic compound (SVOC) that has been detected in other areas of the San Gabriel Basin, including the upgradient South El Monte OU, at concentrations exceeding the and California Department of Public Health (CDPH) drinking water notification level [NL] of 1 µg/L). The treatment process at Whittier Narrows (LGAC adsorption) is not effective at removing 1,4-dioxane from groundwater. There is no federal standard for 1,4-dioxane. However, EPA now provides a tap water RSL of 0.67 µg/L for 1,4-dioxane (EPA, 2010) and, as noted above, CDPH has the 1 µg/L NL. During the past five years, 1,4-dioxane has been detected at concentrations above the state NL in two extraction wells (EW4-5 [intermediate zone] and EW4-8 [shallow zone]), however, concentrations in these wells have not been above the NL since January 2009. 1,4-dioxane has also been detected sporadically above the tap water RSL in monitoring wells; however, these concentrations have generally been below the NL.

At the time of the Interim ROD, only the VOCs listed in Table 1 and 1,4-dioxane were commonly detected within Whittier Narrows. However, the Interim ROD acknowledged that other contaminants, such as perchlorate and N-nitrosodimethylamine (NDMA) had been detected in the San Gabriel Valley upgradient of the Whittier Narrows OU. EPA provides a tap water RSL of 0.00042 µg/L for NDMA and CDPH has a NL of 0.01 µg/L for NDMA. During past five years, NDMA has been detected above the state NL of 0.01 ug/L in the groundwater from two extraction wells (shallow zone wells EW4-3 and EW 4-8) and two monitoring wells (MW4-24 shallow zone, MW4-13 shallow and intermediate zone) in the Whittier Narrows OU. The primary source of the NDMA is the effluent from two nearby water reclamation plants. In mid-2010, the Sanitation District started a full-scale ultraviolet (UV) disinfection system that will result in greatly reduced NDMA concentrations in the effluent from the closest reclamation plants. This in turn should lead to declining NDMA concentrations in shallow groundwater in western Whittier Narrows where EW4-3, EW4-8, and MW4-24 are located. Monitoring well MW4-13 is located in the upgradient area where NDMA had consistently been either not detected or present at very low concentrations. The recent isolated concentration increase at MW4-13 is a departure from past results. The treatment system at Whittier Narrows was not designed to treat NDMA. Any groundwater from the shallow extraction wells that contains NDMA is treated for VOCs and discharged to surface water (Legg Lakes). NDMA concentrations in water discharged to surface water are at levels below the concentrations that produce any effect to aquatic life (ranging from 8 ppb for algae to 3.54 ppm for rainbow trout.)

EPA provides a tap water screening level of 26 µg/L for perchlorate and the California MCL for perchlorate is 6 µg/L. During the past five years, perchlorate has been detected infrequently in Whittier Narrows OU monitoring and extraction wells and only at concentrations well below the MCL.

The table below compares the range of concentration in past five years to the current screening levels for the new contaminants.

Table 2

Comparison of Concentrations Found at the Site to Current Screening Levels

Whittier Narrows Operable Unit, Los Angeles County, California

Chemical	Current Tap Water RSL 2011(µg/L)	MCL/Notification Level 2011 (µg /L)	Range of Detection from 2006 to 2011 (µg/L)
1,4-Dioxane	0.67	1	ND to 1.5
Perchlorate	26	6	ND to 3.7
NDMA	0.00042	0.01	ND to 0.15

1.5 Conclusions

The remedial actions in the Whittier Narrows OU are currently protective of human health and the environment based on a review of current site conditions, exposure pathways, and screening levels. In general, potential sources of exposure that could result in unacceptable risks are being controlled.

Data Review and Remedy Performance Evaluation
Technical Memorandum

Data Review and Remedy Performance Evaluation Technical Memorandum – Whittier Narrows OU Five-Year Review

PREPARED FOR: Bella Dizon/U.S. EPA

PREPARED BY: David Towell/CH2M HILL
Leena Joshi/CH2M HILL

DATE: May 10, 2011

PROJECT NUMBER: 381400.OM.04

1 Introduction

This memorandum provides an evaluation of the data collected in the Whittier Narrows Operable Unit (OU) and the performance of the remedy over the five-year review period. Water quality trends are described, remedy performance issues are identified and recommendations presented.

The primary performance standard for the Whittier Narrows remedy is to provide sufficient hydraulic containment to control migration of contaminated groundwater in the San Gabriel Basin so that groundwater extracted from Whittier Narrows and Montebello Forebay production wells will not exceed drinking water standards. To ensure that this performance standard is met, the Whittier Narrows OU remedy was designed to capture all groundwater contaminated in excess of drinking water standards, such as maximum contaminant levels (MCLs), migrating through Whittier Narrows. However, groundwater monitoring data suggest that complete capture of all water migrating through the interpreted extent of contamination in Whittier Narrows does not appear to be necessary to meet the primary performance standard, particularly in the shallow zone. There are other physical factors and contaminant transport processes that help to limit contaminant migration through Whittier Narrows. These observations are supported by the results of contaminant transport simulations described below in the Remedy Performance Evaluation section.

Groundwater modeling conducted as part of the remedy evaluation efforts for the Interim Remedial Action Report (EPA, 2003) had indicated that extraction of 6,000 gallons per minute (gpm) from the intermediate zone and 5,000 gpm from the shallow zone would be required to capture all contaminated water migrating through the Narrows. Although extraction of 11,000 gpm (6,000 gpm from intermediate extraction wells and 5,000 gpm from shallow extraction wells) has been the goal of systems operation, various limitations on discharge locations and end use options and, as a minor component, mechanical and operational difficulties, have resulted in actual production being much lower than 11,000 gpm. Each of these factors is discussed in more detail below in the Remedy Performance Evaluation section (Section 3).

The Whittier Narrows OU remedy is focused on containment of VOC contamination migrating through Whittier Narrows. Tetrachloroethene or perchloroethylene (PCE) has always been the most widely detected VOC in Whittier Narrows and is consistently detected at the highest concentration. Further, PCE is the only VOC that commonly exceeds MCLs in the Whittier Narrows OU (the PCE MCL is 5 microgram per liter [µg/L]). Trichloroethylene (TCE) (along with 1,4-dioxane, discussed below) is the other VOC that is commonly detected in the OU, but TCE is rarely present at concentrations above 2 to 3 µg/L (the TCE MCL is 5 µg/L) .

Data on three other contaminants (1,4-dioxane, n-nitrosodimethylamine [NDMA] and perchlorate) commonly referred to as "emerging contaminants" are also reviewed in this Technical Memorandum (TM). Of these, 1,4-dioxane is detected much more frequently and over a broader area. However, most of the 1,4-dioxane detections are at concentrations below 1 µg/L (1 µg/L is the notification level [NL] identified by California Department of Public Health [CDPH] above which water utilities are required to inform their governing agency of the contaminant's presence).

2 Data Review

There are five primary monitoring programs that generate water quality data in the Whittier Narrows area, as described in the following list. Some of the programs also produce water level data. Water quality results are included in the tables attached to this TM for PCE (Tables 1, 3 and 9), 1,4-dioxane (Tables 2 and 4), perchlorate (Tables 5 and 6) and NDMA (Tables 7, 8 and 10).

1) Whittier Narrows OU-wide monitoring well sampling: Over the five-year review period, EPA conducted OU-wide sampling events in August/September 2006 and then on an annual basis each January from 2008 through 2011. These events primarily include analyses for VOCs, with 1,4-dioxane analyses included periodically at some locations. The PCE and 1,4-dioxane results from the OU-wide monitoring events are included in Tables 1 and 2, respectively. Water levels are collected from all zones or wells sampled. Table 13 contains the 2011 water level data and Table 14 contains the older data.

2) Whittier Narrows OU extraction well sampling: The Whittier Narrows OU extraction wells include shallow zone wells EW4-3, EW4-4, EW4-8, and EW4-9 and intermediate zone wells EW4-5, EW4-6, and EW4-7. The intermediate zone extraction wells are also called the potable wells because these are the three wells that have been permitted by CDPH for use as drinking water supply wells. The CDPH permit issued to the City of Whittier for operation of the Whittier Narrows OU treatment plant and use of the treated effluent as a potable water supply requires routine monitoring of both the shallow and intermediate extraction wells. The extraction well monitoring results are included in the following tables: Table 3 (PCE), Table 4 (1,4-Dioxane), Table 6 (perchlorate) and Table 8 (NDMA)

3) CDPH early-warning well sampling: As part of the City's CDPH permit, eight monitoring locations are currently sampled on a semiannual basis (this sampling was required quarterly during the first portion of this five-year review period [2006-2007]). The permit designates as early warning wells the following seven multi-port

monitoring well zones: MW4-9 zone 8, MW4-13 zones 3 and 4, MW4-15 zones 3 and 5, and SEMW-06 zones 2 and 4. One conventional monitoring well, MW4-72 is also identified as an early-warning well. The early-warning well monitoring data is summarized in Table 1 (PCE), Table 2 (1,4-dioxane), Table 5 (perchlorate) and Table 7 (NDMA).

4) South El Monte OU (SEMOU) routine multi-port monitoring well sampling: On a semiannual basis, EPA conducts monitoring at the multi-port monitoring wells installed in the SEMOU, north of the Whittier Narrows OU. Monitoring results from the multi-port monitoring wells located towards the southern end of the SEMOU are included in this TM. This includes SEMW-03 and SEMW-06 and, in some cases SEMW-02 and SEMW-05 which are located further upgradient. Data from the southern SEMOU multi-port monitoring wells are included in Table 1 (PCE), Table 2 (1,4-dioxane), Table 5 (perchlorate) and Table 7 (NDMA). Water level data are also typically collected as part of the SEMOU sampling. The 2011 data (SEMW-03 only) are in Table 13 and the older data are included in Table 14.

5) Central Basin Municipal Water District (CBMWD) operates two production wells (CB-1 and CB-2) just south of the Whittier Narrows Dam as part of a project called the Central Basin Water Quality Protection Project (WQPP). The WQPP was installed outside of the CERCLA process to address contamination that had migrated downgradient of the EPA extraction wells before EPA's Whittier Narrows OU remedy began operation. Although there is very little contamination currently present downgradient of EPA's extraction wells, the WQPP continues to operate. Sample results from the CB-1 and CB-2 production wells are summarized in Table 9 (PCE) and Table 10 (NDMA). The other two emerging contaminants, 1,4-dioxane and perchlorate, are generally not detected at the WQPP wells and no data summary tables have been prepared.

2.1 Concentration Distribution and Trends

2.1.1 PCE

As described above, the primary contaminant in Whittier Narrows is PCE. Analytical data results from shallow zone sampling conducted in January/February, 2011 indicate that PCE concentrations are below the MCL throughout the Whittier Narrows OU and are typically non-detect or less than 0.5 µg/L. The extent of PCE contamination in the shallow zone in the Whittier Narrows OU and southern South El Monte OU is presented in Figure 1. Note that the PCE contamination maps presented in this TM (Figures 1 through 4) include additional concentration categories than the VOC contamination maps previously prepared by EPA to provide a more refined illustration of the extent of contamination.

The PCE concentrations detected in the Whittier Narrows OU shallow zone during the recent January/February 2011 OU-wide monitoring event ranged from non-detect to 1.1 µg/L (Table 1). Overall, shallow zone PCE concentrations have continued to decline throughout the Whittier Narrows OU since 2006. As shown in Tables 1 and 3, in 2006, a number of shallow monitoring points within the Whittier Narrows OU still had PCE concentrations near or slightly above the MCL, but in recent monitoring events there are very few PCE detections above 0.5 µg/L. This is in contrast to the shallow zone concentrations at the SEMW-03 and SEMW-06 monitoring wells in the SEMOU. At those

locations (Table 1), shallow zone concentrations have remained elevated in the 10 to 100 µg/L range. The fact that these persistent high concentrations, particularly in SEMW-03, have not resulted in elevated concentrations moving into Whittier Narrows indicates that the amount of mass being loaded into the shallow zone in the southern South El Monte area must not be sufficient to overcome the contaminant transport properties acting to inhibit contaminant migration. Although the specific processes that are most important in limiting downgradient migration into Whittier Narrows are not known, there are likely several contributing factors, including:

- Relative magnitude of sources in the South El Monte OU. Many of the PRP facilities identified in the South El Monte OU are relatively small industrial operations that changed hands several times over the years. These operations may not have resulted in large residual vadose zone sources.
- Mass removal from the vadose zone and shallow aquifer. Several facilities conducted vadose zone remediation using soil vapor extraction. In addition, the San Gabriel Basin Water Quality Authority's former hydraulic barrier project, which operated for several years ending in April 2004, removed considerable mass from the shallow aquifer.
- Hydrogeologic factors reducing loading or inhibiting downgradient migration. Shallow zone water levels have been fairly low for most of the last 10 years resulting in reduced potential for direct loading of residual vadose zone contamination into the shallow groundwater. The lower water levels have also lowered the gradient in the shallow zone, providing more opportunity for vertical migration into the intermediate aquifer. Also, considerable recharge occurs in the Whittier Narrows OU in Legg Lakes, the Rio Hondo, San Gabriel River and the cross-over channel providing both dilution and an additional driving force for downward migration of contaminant mass into the intermediate zone.

PCE concentrations in the shallow zone extraction wells (Table 3) and at monitoring wells located downgradient of the remedy (see Table 11) are mostly nondetect. The low upgradient shallow zone concentrations, combined with these very low downgradient concentrations, support a conclusion that active pumping in the shallow zone may not currently be needed for the Whittier Narrows OU remedy to meets its objectives. This is discussed further below in the Conclusions and Recommendations section.

There is one monitoring point within the Whittier Narrows OU that continues to contain significantly elevated PCE concentrations: MW4-15 Zone 4. This zone is screened at the very top of the intermediate zone (145 to 155 feet below ground surface [bgs]) and the most recent results were 110 and 160 µg/L in duplicate samples (Table 1). The contamination observed in this well is a continuation of a plume migrating southward from the South El Monte OU. However, based on the lack of elevated PCE concentrations at other monitoring points in the vicinity of this location (both laterally and vertically), the high concentration plume observed at MW4-15 Zone 4 does not appear to be laterally or vertically extensive within the Whittier Narrows OU as illustrated on Figures 2, 6 and 7.

Except for MW4-15 Zone 4, PCE concentrations have generally been declining in the intermediate zone in the upgradient portions of the Whittier Narrows OU (see MW4-8,

MW4-9, MW4-10, MW4-13 and MW4-15 on Table 1). However, the concentration reductions have been less consistent in the intermediate zone compared to the shallow zone and several upgradient zones remain near or slightly above the MCL.

Similar to the shallow zone, the intermediate zone monitoring points in the southern portion of the SEMOU have remained high, particularly in SEMW-03. However, unlike the shallow zone, elevated PCE intermediate zone concentrations, in the range of 25 to 50 µg/L, do persist well into Whittier Narrows. To provide a more detailed assessment of the extent of intermediate zone PCE contamination, contour maps have been prepared illustrating the contamination present within three separate intermediate zone depth intervals: 150 to 300 feet below ground (Figure 2), 300 to 450 feet below ground (Figure 3) and 450 to 600 feet below ground (Figure 4). As Figures 2 and 3 illustrate, elevated PCE concentrations extend as far south as extraction well EW4-5 and nearby monitoring wells MW1-3 and MP1-5 (the MW1 monitoring well cluster and adjacent multiport well EPAMW1-MP share several of the same monitoring zones and are completed within a few tens of feet of each other). Table 3 shows that although PCE concentrations remain high in extraction well EW4-5, concentrations in the other two intermediate zone extraction wells, EW4-6 and EW4-7, are now less than the MCL.

One key observation is that intermediate zone PCE concentrations downgradient of the remedy (Table 11), have consistently decreased between 2006 and 2011. This downward concentration trend has continued relatively consistently since the start of remedy operations in 2002. The continuing concentration decreases are of particular note considering that extraction from the intermediate zone extraction wells has continued to be well below the target rates (Table 12).

PCE data from the two Central Basin MWD production wells associated with the WQPP project, CB-1 (located near monitoring well 4-20) and CB-2 (located near monitoring well 4-12), located just south of the Whittier Narrows Dam are shown on Table 9. PCE concentrations in these active production wells are now typically between non-detect levels and 1 µg/L.

Two areas of intermediate zone PCE concentrations that may be of concern as they relate to Whittier Narrows OU remedy performance are the concentrations in the deeper intervals at MW4-22 and at the MW1 cluster (located near EW4-5 and EW4-6). PCE concentrations in the deepest three ports at MW4-22 have remained fairly consistent or increased slightly since 2006 (Table 1). Based on particle tracking simulations conducted in 2003 to evaluate the effectiveness of remedy extraction wells (conducted in support of the Interim Remedial Action Report [EPA, 2003]), MW4-22 appears to be near the eastern edge of the capture zone provided by the Whittier Narrows OU extraction wells. The deepest port in MW4-22 is screened to 440 feet below ground which is 50 feet deeper than the extraction wells. Monitoring wells MW1-3 (390 feet deep) and MW1-2 (510 feet deep) had PCE concentrations of 26 and 9.3 µg/L, respectively, in the recent monitoring event (Table 1). The deeper MW1-2 well is completed 120 feet deeper than nearby extraction well EW4-6. It should be noted that PCE concentrations in the deeper monitoring intervals at the downgradient WN01 well remain non-detect. However, it appears that additional deeper downgradient monitoring points are needed in this general area.

2.1.2 1,4-Dioxane

The recent data included in Table 2 (monitoring wells) and Table 4 (extraction wells) show that 1,4-dioxane concentrations in the shallow zone remain consistently low in the Whittier Narrows OU and southern South El Monte OU and are generally non-detect or less than 1 µg/L (see Figure 17 for postings of the latest 1,4-dioxane results in shallow zone wells). The only shallow monitoring location with a concentration above 1 µg/L is SEMW3-4 and at that location concentrations have declined from 6.2 to 1.7 µg/L since 2006 (Table 2).

The intermediate zone 1,4-dioxane data shown in Table 2 indicate that low-level detections are fairly prevalent in the upgradient portions of the Whittier Narrows OU and southern portion of the South El Monte OU. Concentrations are consistently below 1 µg/L, as shown in Figure 18 which presents recent 1,4-dioxane data. The only monitoring location where the latest concentration exceeds 1 µg/L is SEMW3-3. Similar to the shallow zone, the concentrations at this location have declined considerably since February 2006, declining from 8.3 µg/L down to 1.8 µg/L in the recent monitoring event. 1,4-Dioxane is present in all three intermediate zone extraction wells (Table 4) at concentrations that typically range from nondetect to 0.9 µg/L. EW4-5 is the only intermediate depth extraction well that has had 1,4-dioxane above the CDPH notification of 1 ug/L. The most recent concentration above 1 µg/L was reported as 1.1 µg/L in December 2008 (Table 4). 1,4-Dioxane concentrations in monitoring wells in the vicinity of EW4-5 and EW4-6, also indicate concentrations less than 1 ug/L. Concentrations ranging from 0.56 to 0.67 were detected in wells MW-1-3 (380 to 390 feet bgs) and MW1-4 (234 to 240 feet bgs).

The consistently low 1,4-dioxane concentrations present in upgradient shallow and intermediate zone monitoring wells over the last several years suggest that it is unlikely that significant additional migration of 1,4-dioxane into the intermediate zone (potable) extraction wells would be expected in the near term. 1,4-Dioxane levels in individual extraction wells will likely continue over the next several years to remain in the same 0.5 to 1.2 µg/L range that has been observed over the last few years (Table 4). This suggests that the Whittier Narrows OU treatment plant potable effluent will probably not reach 1.5 µg/L in the near term. The 1.5 µg/L value is the concentration required in the effluent for there to be an official exceedance of the CDPH notification level of 1 µg/L.

2.1.3 Perchlorate

Perchlorate monitoring within the Whittier Narrows OU is primarily limited to the early-warning monitoring wells and the extraction wells (Tables 5 and 6). In addition, the southern SEMOU monitoring wells are regularly sampled for perchlorate (Table 5). Perchlorate is infrequently detected within the Whittier Narrows OU and when it is detected, the concentrations are typically in the 1 to 3 µg/L range (the perchlorate MCL is 6 µg/L). Perchlorate is generally nondetect in Whittier Narrows OU extraction wells (Table 6).

Perchlorate is detected on a much more consistent basis in the southern SEMOU monitoring wells. Detected concentrations remain low in the 1 to 4 µg/L (Table 5) with no exceedances of the 6 µg/L MCL detected.

At this point, based on the available perchlorate data shown in Tables 5 and 6, it does not appear likely that perchlorate will be an issue that requires attention in the Whittier Narrows OU in the near future.

2.1.4 NDMA

NDMA monitoring in the upgradient portions of the Whittier Narrows OU is limited to the early-warning monitoring locations. In 2010, NDMA concentrations at the two zones (one shallow and one intermediate) in both the MW4-13 well and SEMW-06 well were reported to be above the CDPH notification level of 0.010 µg/L (Table 7). These recent, isolated concentration increases are a departure from past results, which were consistently nondetect or very low in these upgradient areas.

Shallow NDMA concentrations in the western portion of the Whittier Narrows OU have historically been strongly influenced by high-concentration NDMA discharges from the Whittier Narrows Reclamation Plant operated by the County Sanitation Districts of Los Angeles County (the Sanitation District). Since 2004, the Sanitation District has attempted to minimize direct discharges to the Rio Hondo which appear to have the greatest influence on NDMA concentrations in EPA's shallow extraction wells EW4-3 and EW4-and nearby shallow monitoring wells MW4-23 and MW4-24. In mid-2010, the Sanitation District started a full-scale ultraviolet (UV) disinfection system that will result in greatly reduced NDMA concentrations in the reclamation plant effluent. This in turn should lead to declining NDMA concentrations in shallow groundwater in western Whittier Narrows. Over the last few years, NDMA concentrations in the EW4-3 and EW4-8 wells have ranged from nondetect up to 0.1 µg/L (10 times the CDPH notification level) (Table 8).

As shown in Table 8, low-level NDMA detections (below the notification level) were detected consistently through August 2006 in EW4-7, the westernmost Whittier Narrows intermediate extraction well. This well is screened a bit shallower than the other intermediate wells (up to 160 feet below ground) and is located more directly down-gradient of the elevated shallow zone concentrations of NDMA observed in the EW4-8 vicinity. However, concentrations have been nondetect since 2007. These concentrations are expected to remain very low or nondetect as long as the shallow NDMA levels don't increase significantly.

NDMA data from the two Central Basin WQPP project production wells CB-1 (located near MW4-20) and CB-2 (located near MW4-12) are included in Table 10. The NDMA data from these two active production wells show that concentrations have consistently been at or below the notification level of 0.010 µg/L. NDMA concentrations have declined somewhat since 2006 and have been nondetect for the last two quarters of 2010.

The lower effluent NDMA concentrations that should be maintained from the Whittier Narrows Reclamation Plant combined with the generally low concentrations in upgradient areas indicate that NDMA is not likely to be a significant issue in Whittier Narrows in the near term.

2.1.5 Vertical Distribution of PCE Contamination

Figure 5 shows the locations of five cross sections running through the Whittier Narrows and southern South El Monte OU areas. These cross sections were originally prepared more than 10 years ago to illustrate generalized hydrostratigraphic information for the aquifers in

the OU area and the interpreted vertical extent of contamination. The cross sections have been updated with the latest PCE concentration data and contaminant concentration contours and are included as Figures 6 through 10. Three of the cross sections run generally east-west across the Whittier Narrows OU. Cross-section A-A′ (Figure 6) is located near the 60 Freeway at the upgradient end of Whittier Narrows. Cross-section E-E′ (Figure 10) extends through the Whittier Narrows OU extraction well field. Cross-section D-D′ (Figure 9) runs approximately along the Whittier Narrows Dam at the downgradient end of the OU. Two of the cross-sections run from northeast to southwest starting in the South El Monte OU and extending through Whittier Narrows and beyond Whittier Narrows Dam. These include Cross-Section B-B′ (Figure 7) that runs along the western side of the Whittier Narrows OU contamination and Cross-Section C-C′ (Figure 8) that runs along the eastern side of the Whittier Narrows OU contamination. The distribution of PCE contamination shown on each section is summarized below. The PCE contamination shown in the cross sections uses the same concentration ranges and color schemes as the plan view contamination maps shown in Figures 1 through 4.

Cross-Section A-A′ (Figure 6)- This cross section illustrates the contamination moving into the Whittier Narrows OU from the upgradient South El Monte OU. As the figure shows, there is a relatively limited lateral and vertical extent of high-level PCE contamination surrounding MW4-15 Zone 3. The only other PCE MCL exceedances are for the top four intermediate zone monitoring points at MW4-8. Shallow zone concentrations entering Whittier Narrows are low.

Cross-Section B-B′ (Figure 7)- This long cross section illustrates the high-level contamination that is still present in the South El Monte OU and the relatively limited extent of contamination along the western side of the Whittier Narrows OU (except the high concentration at the MW4-15 Zone 3 location). The figure shows the four different shallow zone hot spots located along the trace of the cross section in the South El Monte OU, but no shallow zone contamination above the MCL within Whittier Narrows. Similarly, high levels of PCE contamination are present down to a depth of over 400 feet below ground at SEMW-03 in the South El Monte OU, but high concentrations of PCE in the Whittier Narrows OU portion of the cross section only extend down to less than 200 feet below ground.

Cross-Section C-C′ (Figure 8)- This is another long cross section that starts in the eastern portion of the South El Monte OU and extends through the eastern portion of the Whittier Narrows OU contamination on past the Whittier Narrows Dam. This section shows that low concentrations of PCE are present throughout the vertical profile of MW4-9 located at the upgradient end of the Whittier Narrows OU. In fact, no shallow zone PCE contamination is present along this entire cross section. The highest PCE concentrations detected along the section are found at depth in monitoring well MW1-3 (co-located with the EPAMP01 well), located near extraction wells EW4-5 and EW4-6. The presence of higher PCE concentrations towards the downgradient portion of this cross section is the result of southerly to slightly southeasterly migration of the intermediate zone contamination that enters Whittier Narrows near the Rosemead Boulevard/60 Freeway intersection as illustrated in Figures 2 and 3. As shown in Figure 8, it does not appear that PCE contamination above the MCL currently extends downgradient as far as the Whittier Narrows Dam.

Cross-Section D-D' (Figure 9)- Cross-Section D-D' confirms that no PCE contamination in excess of the MCL is currently migrating past the Whittier Narrows Dam into the Montebello Forebay portion of the downgradient Central Basin. Even the extent of PCE in excess of 0.5 µg/L is limited. Preventing migration of contamination into the Central Basin is one of the key performance evaluation factors for the Whittier Narrows OU remedy.

Cross-Section E-E' (Figure 10)- This cross section runs through all 7 of the Whittier Narrows OU extraction wells, from west (shallow wells EW4-8 and EW4-3) to east (intermediate well EW4-6). Cross-section E-E' highlights two areas of potential concern for the Whittier Narrows OU remedy:

1) There is deep contamination present more than 100 feet deeper than the bottom of the extraction well screens in the vicinity of EW4-6. It is not likely that the remedy extraction wells can capture all of this contamination.

2) There are MCL exceedances present at depth in MW4-22. As noted above, particle-tracking simulations conducted in 2003 (EPA, 2003) indicate that MW4-22 is likely very near the eastern edge of the capture envelope provided by operation of the remedy extraction wells at the target rates of 6,000 gpm . The location and depth of the contamination make it difficult for the remedy extraction wells to contain.

2.2 Groundwater Elevations

The water levels measured during the recent OU-wide monitoring event and the associated groundwater elevations are presented in Table 13. Table 14 provides a listing of groundwater elevations from measurements collected between 2006 and early 2011. As described below and illustrated in Table 14, the groundwater elevations have not changed dramatically over the last 5 years. Groundwater elevation contours based on data from the 2011 monitoring event are shown in Figure 11 (shallow zone) and Figure 12 (intermediate zone). In general, the groundwater elevation contours are consistent with prior contour maps constructed in 2002/2003. Figures 19 and 20 are representative hydrographs of two shallow zone monitoring points. Figures 21 and 22 are intermediate zone hydrographs.

For shallow zone wells monitored in both 2006 and 2011, the groundwater elevations have increased by 1 to 2 feet in about half of the wells and decreased by 2 to 3 feet in half of the wells. In general, prior to December 2010, conditions had been relatively dry and water levels in the San Gabriel Basin have been near historic lows. The significant influence of ongoing shallow zone extraction at the EW4-3 and EW4-4 wells is apparent in the 188 and 190 foot contours that form a pumping depression around these wells. This is likely the cause of the declining water levels observed at many locations. The record setting rainfall that took place in Southern California in December 2010 and the significant amount of recharge occurring behind Whittier Narrows Dam as high storm flows were retained had already began to influence some of the shallow groundwater elevations by the 2nd half of January 2011 when the monitoring event was initiated. This recent recharge would be a contributing factor in some of the groundwater elevation increases and is leading to a small mound developing in the shallow water table behind Whittier Narrows Dam as evidenced by the elevations measured in MW4-23 and MW4-26 (Figure 11). One anomaly is the shallow groundwater elevations is at SEMW-03, which appears to be several feet lower than would have been expected in comparison to historic groundwater elevation observations.

The cause of this anomaly is unclear, but the upcoming field investigations in the South El Monte OU should shed more light on shallow flow conditions in the vicinity of this well.

In the intermediate zone, groundwater elevations between 2006 and 2011 have in general decreased by around 1 to 3 feet in most wells, although similar to the shallow zone there are locations where water levels have increased slightly. The overall decline is the result of the extended drought conditions that have impacted groundwater levels throughout the San Gabriel Basin. When monitored in early 2011, these intermediate wells would not yet be responding to the increased recharge that occurred in December 2010. The groundwater elevation contours shown in Figure 12 follow a very similar pattern to contour maps prepared in the past. Some influence from intermediate extraction well pumping is apparent in the 186 and 188 foot contours, although the impacts are limited. It should be noted that the December and January intermediate zone extraction rates were quite low (~2,400 gpm) because of the wet weather and the normal low demands for potable water during that time of year. Groundwater data collected during the late summer peak pumping periods would likely show additional influence from the intermediate zone extraction. However, even during the full-scale pumping test conducted in the summer of 2002, the impact of the extraction on intermediate zone water levels are relatively localized. As is shown in Figure 12, the groundwater flow divide that typically occurs in the South El Monte OU and separates flow towards Whittier Narrows from flow towards South El Monte OU extraction wells appears to be situated quite far to the south compared to most times. The location of the flow divide is transient and it generally moves towards the south during low-water level conditions as have been present in the San Gabriel Basin for a number of years.

The intermediate zone groundwater contours are based on data generally collected between approximately 250 and 350 feet bgs, so they are not necessarily representative of what may be happening in deeper portions of the intermediate zone. As is discussed elsewhere in this TM, the water quality data and contaminant transport modeling results indicate that deeper intermediate zone contamination may be moving towards the southeast, while the contours in Figure 12 indicate a southwesterly flow direction.

3 Remedy Performance Evaluation

A general evaluation of Whittier Narrows OU remedy performance is presented in this section.

3.1 Extraction Rates from Remedy Wells

Average annual extraction rates for the Whittier Narrows OU extraction wells for the five-year review evaluation period of 2006 to 2010 are presented in Table 12. The annual averages (in gpm) shown in Table 12 were calculated by taking the total volume of water extracted from each well during the calendar year (in gallons) and dividing that by the number of minutes in the year. As shown in the table, extraction rates have generally been well below the target rates. Figures 23 and 24 provide graphs of monthly production from September 2006 through 2010 for the shallow and intermediate zone extraction wells, respectively.

3.1.1 Shallow Zone Extraction

For the shallow zone, extraction over the five-year period averaged only about 1,165 gpm, well below the interim target rate of 2,000 gpm. One contributing factor to the reduced average extraction rate was the halting of shallow extraction for 8 months beginning in July 2007 because a modified three-party water production agreement was being developed between EPA, the Main San Gabriel Basin Watermaster and Los Angeles County Parks Department. A water production agreement is required because EPA does not have pumping rights in the San Gabriel Basin. In addition, the persistent occurrence of elevated back pressures across the liquid-phase granular activated carbon (LGAC) vessels being used to treat the shallow groundwater has limited the system's operational capacity. It appears that air has been getting entrained within the carbon in the LGAC vessels contributing to the increased pressures. Since August 2010, supplemental operational procedures have been implemented where the air is routinely bled off from the vessels and recent extraction rates have been closer to the 2,000 gpm target rate.

The 2,000 gpm shallow target rate had been selected to address several factors influencing shallow extraction, including:

- The limited extent of shallow zone contamination in Whittier Narrows which indicated that minimal extraction was required to meet remedy objectives- Currently, there are no shallow zone MCL exceedances within the Whittier Narrows OU so shallow extraction is not required to meet remedy objectives.
- Treatment plant booster pump capacity- In addition to the elevated back pressures noted above, shallow zone discharge is currently to the Los Angeles County Parks Department's historic irrigation distribution system so the treated water can be transported to both the southern and northern Legg Lakes and make use of decorative water features installed by the County. Discharging to the irrigation system has increased the back pressure on the shallow zone booster pump.
- The water production agreement requirement that all shallow discharge that overflows from Legg Lakes (only about 800 gpm, on average, are required to keep the lakes full) infiltrates back into the ground within Mission Creek before the water reaches San Gabriel Boulevard- Increased shallow zone extraction rates would make it harder to ensure that all water is recharged.

3.1.2 Intermediate Zone Extraction

Intermediate zone extraction rates over the five-year review period (2006 to 2010) averaged about 3,257 gpm. This is just over half (54%) of the 6,000 gpm intermediate zone target rate. One significant factor in lowering the average extraction rate was the 8-month period (from August 2008 through April 2009) when the treatment plant was essentially shutdown to facilitate a carbon changeout. The changeout took many months longer than anticipated due to a number of factors, including interaction with CDPH because of changing the type of carbon to be used, delays in receipt of analytical data from the carbon supplier, scheduling delays associated with the carbon replacement contractor and the finding that repairs were required to fix damaged or corroded sample port materials and the surrounding lining on the inside of many LGAC vessels.

Although there have also been several operations and maintenance issues related to booster pumps, well pumps and variable frequency drives (VFDs) that have periodically limited the available capacity for the intermediate (potable) portion of the extraction and treatment system, the primary factors impacting intermediate extraction rates are related to reductions in the City of Whittier's water demand and the need for the City to use their own Central Basin water rights to meet a portion of the City's demand.

Prior to completing system modifications in 2003 that resulted in the only discharge option for the treated potable water being to the City of Whittier's system, it was known that the City's water demand was such that the maximum annual average pumping rate from the potable wells would be approximately 5,200 gpm (consistent with City demand of approximately 8,300 acre-feet per year), compared to the target rate of 6,000 gpm. It was anticipated that the ability to supply water to an additional water purveyor would be added to reach the 6,000 gpm target rate. However, another purveyor has not been added. Further, the City's water demand has recently declined by approximately 10%, likely because of regional publicity regarding water conservation combined with a depressed economy. The City of Whittier also owns approximately 900 acre-feet of pumping rights in the Central Basin that must be used on an annual basis because there is limited ability to "bank" Central Basin water rights for future use and there is little demand for leasing the rights. Previously, the City was selling water to some of the neighboring cities such as Pico Rivera and Santa Fe Springs that had water supply limitations. However, with the availability of treated water from the Central Basin's WQPP project, these neighboring purveyors no longer need to buy water from the City.

This combination of factors impacting City water demand had resulted in a condition where the maximum annual average intermediate zone pumping rate available is likely in the 4,000 gpm range unless another end user is added or City demand increases.

As is described in the following sections, despite the average intermediate zone extraction rate being only around 3,250 gpm over the last 5 years, the magnitude and extent of downgradient contamination have continued to decline. This implies that intermediate zone extraction at rates well below the current 6,000 gpm target rate may be able to meet remedy performance objectives. As an activity separate from the five year review, additional model simulations are being conducted using the updated groundwater flow and transport model to evaluate potentially lowering the target pumping rates. The results of these simulations will be documented in a separate technical memorandum.

3.2 Changes in the Extent of Contamination

The current extent of PCE contamination in the Whittier Narrows OU and southern South El Monte OU is depicted in Figure 1 for the shallow zone and Figures 2 through 4 for different depth intervals within the intermediate zone. These recent maps of PCE contamination are drawn using a more refined set of concentration contour intervals than prior maps of VOC contamination prepared for the area. To allow for a more direct comparison of changes in the distribution of contamination between 2002 (when remedy construction was completed) and present, updated 2002 contamination maps were prepared using the more refined contour intervals that were applied to the 2011 contamination maps. These are shown in Figure 13 (shallow zone) and Figure 14 (intermediate zone). Changes in the extent of contamination are discussed in the following text.

3.2.1 Shallow Zone Contamination Changes

As shown in Figure 1, there are currently no shallow zone MCL exceedances within the Whittier Narrows OU. This is a dramatic change from the extent of shallow contamination existing in 2002 (Figure 13) where there was a large area of contamination in the western portion of the narrows where concentrations exceeded 25 µg/L, including areas in excess of 50 and 100 µg/L surrounding wells MW4-72 and MW4-15. A number of factors likely combined to result in this much contamination disappearing from the shallow zone in Whittier Narrows, including significant reductions in loading from the upgradient South El Monte OU, dilution from the significant recharge occurring within Whittier Narrows, vertical migration into the intermediate zone and mass removal from remedy well pumping. Although there are persistent areas of elevated shallow zone contamination in the South El Monte OU, the mass loading to the aquifer in these areas does not appear to be large enough to generate high concentration plumes migrating into Whittier Narrows. As described in more detail above in Section 2.1.1, there are likely several contributing factors to the reduced mass loading, including: the relative magnitude of sources in the South El Monte OU; mass removal from the vadose zone and shallow aquifer; and hydrogeologic factors reducing loading or inhibiting downgradient migration.

3.2.2 Intermediate Zone Contamination Changes

The current extent of contamination in the intermediate zone has been divided into three maps (Figures 2, 3 and 4), with each covering a specific 150-foot thick vertical horizon. Because the 2002 intermediate zone contamination is shown on a single composite map, it is not as easy to do a straightforward comparison of changes in the extent of contamination. However, several conclusions are apparent:

- The areal extent of high concentration areas towards the southern end of the South El Monte OU is somewhat smaller now compared to 2002, but the changes are not dramatic.
- The extent of above MCL contamination upgradient of the Whittier Narrows OU extraction wells has not changed dramatically. The area with contamination above the MCL is only slightly narrower. However, the width of the higher concentrations has shrunk more substantially and also extends a little further downgradient.
- In the vicinity of the extraction wells, the western edge of contamination has shifted towards the east. This indicates that extraction from intermediate well EW4-7 is now less important than extraction from EW4-5 and the easternmost well EW4-6.
- The extent of intermediate zone contamination above the MCL has greatly diminished downgradient of the Whittier Narrows OU extraction wells. This is likely the result of remedy well pumping combined with extraction from the WQPP wells CB-1 and CB-2. Only a small area of above MCL contamination remains in the 150- to 300-foot deep interval.
- The area of deep (450- to 600-feet below ground) contamination shown on Figure 4 will be difficult to capture because the Whittier Narrows OU extraction wells are only screened down to 390 feet. However, based on the existing water quality data (which are limited for these deeper intervals), it appears to be a relatively isolated area suggesting that the amount of mass migrating into the deeper horizons may be

relatively small. Although additional downgradient monitoring is needed, the deep contamination does not yet appear to have migrated as far as the Whittier Narrows Dam because the deeper zones at WN-01 remain nondetect.

3.3 Contaminant Transport Simulations of Plume Capture

Because of the significant changes observed in the extent of contamination in Whittier Narrows, particularly in the shallow zone throughout the OU and in the intermediate zone downgradient of the remedy extraction wells, EPA decided to conduct additional groundwater modeling intended to support potential reductions in the target remedy extraction rates. In mid-2010 EPA tasked CH2M HILL with initiating the modeling effort, including updating the existing groundwater flow model and developing a contaminant transport model. The model update will be described in a separate CH2M Hill technical memorandum that is currently under preparation. The primary components of the modeling effort have included the following:

- Updating the existing basinwide groundwater flow model with available data through June 2009. The basinwide model previously ended June 2001.
- Incorporating the refinements made to the models in the Whittier Narrows and South El Monte areas back into the basinwide model.
- Reviewing the calibration results for the updated model, particularly focusing on the calibration results (scatter plots, hydrographs and water budgets) for the Whittier Narrows area.,
- Developing a contaminant transport model to assess contaminant movement in the Whittier Narrows and southern South El Monte OU areas.
- Calibrating the contaminant transport model so that it can reasonably well simulate the observed changes in PCE distribution during operation of the Whittier Narrows remedy between 2002 and 2009 (the end of the model period).
- Using the calibrated contaminant transport model to simulate predicted future migration of the current contamination (Figures 1 through 4) under a variety of hydraulic (e.g., high-water level and low-water level) conditions and remedy operational scenarios that represent new target rates. This final step is ongoing at the present time.

The 2002 to 2009 contaminant transport simulations are considered an appropriate tool to support conclusions about past remedy performance for this five-year review. These simulations start with the observed extent of contamination in 2002 (Figures 13 and 14), then simulate movement of that contamination through the end of the model period in 2009. The simulations reflect actual conditions for this period, including recorded extraction rates (for remedy wells and non-remedy wells), reported recharge rates, hydraulic heads and other input parameters included in the calibrated model for this period. The results of the contaminant transport simulations for the shallow and intermediate zones are shown in Figures 15 and 16, respectively. Note that the Slice 3 results shown on Figure 15 are heavily influenced by the elevated PCE concentrations present at the very top of the intermediate zone and may not be representative of shallow zone conditions. Observations from the transport simulations include:

- The simulated extent of shallow zone contamination in 2009 shows no migration beyond the extraction well locations which is consistent with historical and recent observations. The simulation does indicate a relatively large area of shallow zone MCL exceedances upgradient of the extraction wells. However, by 2009 the actual extent of shallow zone contamination above the MCL within Whittier Narrows is minimal. The dramatic decline in shallow zone concentrations observed in Whittier Narrows between 2002 and 2009 is very difficult to simulate without assuming unreasonable contaminant conditions (e.g., initial contaminant distribution that is significantly less than measured concentrations) and transport parameters that would not be consistent with known conditions in Whittier Narrows (e.g., high degradation rates even though no degradation by-products have been detected).

- The simulated extent of intermediate zone contamination shown in Figure 16 matches very well the 2009 contamination contours shown in light brown in the background, particularly for the upper reaches of the intermediate zone (Slice 4). The Slice 4 simulation results show a relatively small plume of above MCL contamination extending to just beyond the Whittier Narrows Dam, similar to the observed 2009 conditions. The extent of higher level contamination simulated for Slice 4 (shown in yellow) also matches well with the mapped area of high concentrations. Finally, the overall shapes of the simulated and observed areas of above MCL contamination are consistent.

- The simulated extent of contamination in Slice 5 is reasonably similar to the mapped 2009 conditions, although the simulated results somewhat overpredict the extent of above MCL contamination migrating past the remedy extraction wells. It should be noted that the mapped 2009 intermediate zone contamination represents a composite of the maximum concentration detected from any of the available intermediate zone depth intervals, which covers several hundred feet of the aquifer. So, the depth-specific simulation results are not necessarily expected to match the mapped contours particular moving deeper (i.e., Slice 6) where the mapped contours likely overstate the actual extent of contamination.

- The simulated migration of deeper intermediate zone contamination (Slice 6) towards the southeast beyond the Whittier Narrows extraction wells highlights an area of concern based on recent monitoring results. Although no significant migration beyond the extraction wells has been detected to date in monitoring well WN-01, the simulation confirms that this is an area that warrants additional scrutiny.

  As is illustrated in the cross sections shown in Figures 7, 8 and 9, the alluvial aquifer thins considerably to less than 350' deep in the vicinity of the Whittier Narrows Dam in the western half of Whittier Narrows. This means that the deeper contamination (i.e., in the 450 to 600 foot depth interval) present near the extraction wells would need to move into shallower depths for it to migrate towards the south or southwest. This physical constraint makes it much more likely that the deep contamination would either head towards the southeast where the alluvial aquifer remains deep (i.e., in the vicinity of WN-01) or be drawn into deep production wells to the east (City of Whittier wells or Suburban Water System wells located east of the San Gabriel River).

4 Conclusions

4.1 Shallow Zone

In the shallow zone, the extent of contamination has shrunk dramatically since remedy construction was completed in 2002 and PCE concentrations have continued to decline consistently over the last five years (2006 to 2010). There are currently no shallow zone MCL exceedances in the Whittier Narrows OU, indicating that continued extraction is not needed to meet the goals of this hydraulic containment remedy.

There are likely several factors that have combined to lead to the current conditions. The largest factor is reduced migration of shallow zone contamination from the upgradient South El Monte OU into Whittier Narrows. Although high levels of shallow contamination remain in the southern portion of the South El Monte OU (Figure 1), these hot spots must not be loading sufficient mass to the shallow aquifer to produce high concentration plumes migrating downgradient. The general low water-level conditions that have persisted for much of the last decade may be contributing to the reduced mass loading, however, following record rainfall in the winter of 2005 shallow water levels rose dramatically. There has not been an associated spike in shallow zone concentrations observed in the South El Monte source areas. This indicates that shallow zone PCE concentrations within the Whittier Narrows OU are unlikely to increase significantly in the next several years.

Based on the available data, it does not appear that any of the emerging contaminants discussed above (1,4-dioxane, perchlorate and NDMA) will be a near-term issue in the shallow zone in Whittier Narrows.

Significant reductions in the target rates for shallow zone extraction appear warranted and completely eliminating shallow zone extraction should also be considered. If shallow extraction is curtailed, an appropriate monitoring program will need to be developed and implemented to ensure that rising shallow zone concentrations in the future would be detected in sufficient time to re-activate the shallow extraction system. Note that shallow zone concentrations downgradient of the Whittier Narrows OU extraction wells have always remained low regardless of how much shallow zone extraction has been occurring.

4.2 Intermediate Zone

The extent of intermediate zone contamination downgradient of the Whittier Narrows OU extraction wells has declined dramatically since remedy extraction began in 2002. In general, downgradient PCE concentrations have continued to decline over the five-year period evaluated for this report. These continued concentration declines have occurred despite intermediate zone extraction averaging less than 3,300 gpm over the last five years. This provides strong evidence that the remedial objectives (hydraulic control of migrating contamination) can be met at a lower flow rate than the current intermediate zone target extraction rate of 6,000 gpm.

Intermediate zone contaminant concentrations upgradient of the extraction wells have remained elevated, although the overall width of the contaminated area has shrunk and shifted a bit to the east (Figures 2 and 3). The changes in the distribution of contamination migrating towards the extraction wells indicate that intermediate pumping should likely be focused on EW4-5 (center well) and EW4-6 (eastern well) rather than EW4-7.

One area of potential concern has been identified in the intermediate zone. Deep contamination in excess of the MCL has been detected in a monitoring well cluster near EW4-6 (MW1) and at MW4-22 located to the northeast of the extraction wells (see Figures 4 and 10). It is unlikely that the existing extraction wells can capture all of this contamination, even with increased pumping from EW4-6. However, it is not clear how significant of a threat the contamination potentially not being captured represents to downgradient areas or nearby water purveyor production wells. Additional contaminant transport simulations will help in evaluating this issue; however, it appears that new, deep monitoring downgradient of the intermediate zone extraction wells is also necessary.

5 Recommendations

The predictive contaminant transport modeling that EPA is currently conducting, combined with the data evaluation presented in this technical memorandum, should be used to select lower target extraction rates for the Whittier Narrows remedy shallow and intermediate extraction wells (and whether additional pumping is needed to address the deeper intermediate contamination). This should include consideration of completely eliminating shallow extraction.

If the decision is made to suspend shallow extraction, the shallow aquifer monitoring program should be evaluated as part of the Remedy Performance Evaluation Plan (see below) to enable early detection of shallow aquifer contamination migrating from the South El Monte OU. The existing shallow extraction wells should be maintained, thus allowing for timely reactivation should the need arise.

The location and depth of an additional deep monitoring well (or wells) to be installed downgradient of the eastern end of the Whittier Narrows extraction well field should be determined and arrangements made for well installation. In addition, arrangements should be made for sampling of the deepest well (MW1-1) at the monitoring well cluster located between EW4-5 and EW4-6 (this well could not be sampled in the 2011 event because the well was inaccessible).

A Remedy Performance Evaluation Plan should be developed that identifies:

- the specific remedial objectives of the remedy;
- how compliance with those objectives will be determined;
- the data that needs to be collected to support remedy performance evaluations; and,
- the technical evaluations to be conducted each year to evaluate remedy performance.

An Annual Remedy Performance Evaluation Report should be prepared summarizing the available monitoring data, summarizing remedy performance and describing any upcoming technical evaluations or proposed changes to the remedy.

A comprehensive Groundwater Monitoring Plan should be included as an attachment to Remedy Performance Evaluation Plan to ensure that sufficient data are collected to detect changing contaminant or hydrologic conditions that could impact remedy performance, to facilitate implementation of the Remedy Performance Evaluation Plan and to allow for preparation of the Annual Report.

Once the new lower target extraction rates for the shallow and intermediate zones are approved by EPA and DTSC and the Remedy Performance Evaluation Plan is complete, opportunities for additional system optimization should be evaluated, including the remaining recommendations from the U.S. Army Corps of Engineers Remediation System Evaluation Report (U.S. Army Corps of Engineers, 2008).

SPECIAL FLOOD HAZARD AREAS
- Without Base Flood Elevation (BFE) *Zone A, V, A99*
- With BFE or Depth *Zone AE, AO, AH, VE, AR*
- Regulatory Floodway

OTHER AREAS OF FLOOD HAZARD
- 0.2% Annual Chance Flood Hazard, Areas of 1% annual chance flood with average depth less than one foot or with drainage areas of less than one square mile *Zone X*
- Future Conditions 1% Annual Chance Flood Hazard *Zone X*
- Area with Reduced Flood Risk due to Levee. See Notes. *Zone X*
- Area with Flood Risk due to Levee *Zone D*

OTHER AREAS
- NO SCREEN Area of Minimal Flood Hazard *Zone X*
- Effective LOMRs
- Area of Undetermined Flood Hazard *Zone D*

GENERAL STRUCTURES
- Channel, Culvert, or Storm Sewer
- Levee, Dike, or Floodwall

OTHER FEATURES
- 20.2 Cross Sections with 1% Annual Chance
- 17.5 Water Surface Elevation
- Coastal Transect
- Base Flood Elevation Line (BFE)
- Limit of Study
- Jurisdiction Boundary
- Coastal Transect Baseline
- Profile Baseline
- Hydrographic Feature

MAP PANELS
- Digital Data Available
- No Digital Data Available
- Unmapped

N

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 7/26/2021 at 4:26 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

Industrial Waste / Underground Storage Tanks / Stormwater

Back

You searched the following address:

Street Number: 825 Street Name: Lexington-gallatin road

Our office does not have any records (related to industrial waste/underground storage tanks/stormwater) for the requested site address.

Please double check the spelling of the street name or search a different address. Both street number and street name must be exact and spelled correctly as they appear for the facility on file. Do not include street direction prefix (i.e. N, S, E, W, etc...) or suffix (i.e. ST, AVE, RD, BLVD, etc...) unless they appear in the street name (i.e. AVENUE K, AVENIDA CESAR CHAVEZ, 10TH ST EAST, CROSSROADS PKWY N, etc...). Do not include any extra spaces after the street number or after the street name.

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractor's License Law for the following reason (SEC. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to provisions of the Contractors License Law (Chapter 9 (commencing with Sec. 7000) of Div. 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500.).

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with a licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who

☐ I am exempt under Section _____ B.&P.C. for this reason

DESCRIBE COMPLETELY THE INTENDED USE OF ALL SPACE APPLICABLE TO THIS BUILDING PERMIT:

The following statement must be signed by the Building owner.

(When approved by the Building Official, the owner's agent may sign for permits other than the initial or shell building permit.)

Will the applicant of future building occupant handle a hazardous material or mixture containing a hazardous material equal to or greater than the amounts specified on the hazardous materials information guide?

☐ YES ☐ NO

If the answer to the question was yes, will the proposed building or modified facility be within 1000 feet of the outer boundary of a school?

☐ YES ☐ NO

Will the intended use of the building by the applicant or future building occupant require a permit for construction or modification from the South Coast Air Quality Management District (SCAQMD)? (See permitting checklist for guidelines.)

☐ YES ☐ NO

I have read the hazardous material information guide and the SCAQMD permitting checklist. I understand my requirement under the State of California Health and Safety Code Section 25505,25533, and 25534 concerning hazardous materials reporting.

☐ OWNER ☐ AGENT

First American	ALTA Commitment for Title Insurance
Commitment	ISSUED BY **First American Title Insurance Company** File No: NCS-1063311-SA1

COMMITMENT FOR TITLE INSURANCE

Issued By

FIRST AMERICAN TITLE INSURANCE COMPANY

NOTICE

IMPORTANT-READ CAREFULLY: THIS COMMITMENT IS AN OFFER TO ISSUE ONE OR MORE TITLE INSURANCE POLICIES. ALL CLAIMS OR REMEDIES SOUGHT AGAINST THE COMPANY INVOLVING THE CONTENT OF THIS COMMITMENT OR THE POLICY MUST BE BASED SOLELY IN CONTRACT.

THIS COMMITMENT IS NOT AN ABSTRACT OF TITLE, REPORT OF THE CONDITION OF TITLE, LEGAL OPINION, OPINION OF TITLE, OR OTHER REPRESENTATION OF THE STATUS OF TITLE. THE PROCEDURES USED BY THE COMPANY TO DETERMINE INSURABILITY OF THE TITLE, INCLUDING ANY SEARCH AND EXAMINATION, ARE PROPRIETARY TO THE COMPANY, WERE PERFORMED SOLELY FOR THE BENEFIT OF THE COMPANY, AND CREATE NO EXTRACONTRACTUAL LIABILITY TO ANY PERSON, INCLUDING A PROPOSED INSURED.

THE COMPANY'S OBLIGATION UNDER THIS COMMITMENT IS TO ISSUE A POLICY TO A PROPOSED INSURED IDENTIFIED IN SCHEDULE A IN ACCORDANCE WITH THE TERMS AND PROVISIONS OF THIS COMMITMENT. THE COMPANY HAS NO LIABILITY OR OBLIGATION INVOLVING THE CONTENT OF THIS COMMITMENT TO ANY OTHER PERSON.

COMMITMENT TO ISSUE POLICY

Subject to the Notice; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and the Commitment Conditions, ***First American Title Insurance Company***, a Nebraska Corporation (the "Company"), commits to issue the Policy according to the terms and provisions of this Commitment. This Commitment is effective as of the Commitment Date shown in Schedule A for each Policy described in Schedule A, only when the Company has entered in Schedule A both the specified dollar amount as the Proposed Policy Amount and the name of the Proposed Insured.

If all of the Schedule B, Part I-Requirements have not been met within six months after the Commitment Date, this Commitment terminates and the Company's liability and obligation end.

First American Title Insurance Company

COMMITMENT CONDITIONS

1. DEFINITIONS

(a) "Knowledge" or "Known": Actual or imputed knowledge, but not constructive notice imparted by the Public Records.
(b) "Land": The land described in Schedule A and affixed improvements that by law constitute real property. The term "Land" does not include any property beyond the lines of the area described in Schedule A, nor any right, title, interest, estate, or easement in abutting streets, roads, avenues, alleys, lanes, ways, or waterways, but this does not modify or limit the extent that a right of access to and from the Land is to be insured by the Policy.
(c) "Mortgage": A mortgage, deed of trust, or other security instrument, including one evidenced by electronic means authorized by law.
(d) "Policy": Each contract of title insurance, in a form adopted by the American Land Title Association, issued or to be issued by the Company pursuant to this Commitment.
(e) "Proposed Insured": Each person identified in Schedule A as the Proposed Insured of each Policy to be issued pursuant to this Commitment.
(f) "Proposed Policy Amount": Each dollar amount specified in Schedule A as the Proposed Policy Amount of each Policy to be issued pursuant to this Commitment.
(g) "Public Records": Records established under state statutes at the Commitment Date for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without Knowledge.
(h) "Title": The estate or interest described in Schedule A.

2. If all of the Schedule B, Part I—Requirements have not been met within the time period specified in the Commitment to Issue Policy, this Commitment terminates and the Company's liability and obligation end.

3. The Company's liability and obligation is limited by and this Commitment is not valid without:
(a) the Notice;
(b) the Commitment to Issue Policy;
(c) the Commitment Conditions;
(d) Schedule A;
(e) Schedule B, Part I—Requirements; and
(f) Schedule B, Part II—Exceptions.

4. COMPANY'S RIGHT TO AMEND

The Company may amend this Commitment at any time. If the Company amends this Commitment to add a defect, lien, encumbrance, adverse claim, or other matter recorded in the Public Records prior to the Commitment Date, any liability of the Company is limited by Commitment Condition 5. The Company shall not be liable for any other amendment to this Commitment.

5. LIMITATIONS OF LIABILITY

(a) The Company's liability under Commitment Condition 4 is limited to the Proposed Insured's actual expense incurred in the interval between the Company's delivery to the Proposed Insured of the Commitment and the delivery of the amended Commitment, resulting from the Proposed Insured's good faith reliance to:
  (i) comply with the Schedule B, Part I—Requirements;
  (ii) eliminate, with the Company's written consent, any Schedule B, Part II—Exceptions; or
  (iii) acquire the Title or create the Mortgage covered by this Commitment.
(b) The Company shall not be liable under Commitment Condition 5(a) if the Proposed Insured requested the amendment or had Knowledge of the matter and did not notify the Company about it in writing.
(c) The Company will only have liability under Commitment Condition 4 if the Proposed Insured would not have incurred the expense had the Commitment included the added matter when the Commitment was first delivered to the Proposed Insured.
(d) The Company's liability shall not exceed the lesser of the Proposed Insured's actual expense incurred in good faith and described in Commitment Conditions 5(a)(i) through 5(a)(iii) or the Proposed Policy Amount.
(e) The Company shall not be liable for the content of the Transaction Identification Data, if any.
(f) In no event shall the Company be obligated to issue the Policy referred to in this Commitment unless all of the Schedule B, Part I—Requirements have been met to the satisfaction of the Company.
(g) In any event, the Company's liability is limited by the terms and provisions of the Policy.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

6. LIABILITY OF THE COMPANY MUST BE BASED ON THIS COMMITMENT

(a) Only a Proposed Insured identified in Schedule A, and no other person, may make a claim under this Commitment.
(b) Any claim must be based in contract and must be restricted solely to the terms and provisions of this Commitment.
(c) Until the Policy is issued, this Commitment, as last revised, is the exclusive and entire agreement between the parties with respect to the subject matter of this Commitment and supersedes all prior commitment negotiations, representations, and proposals of any kind, whether written or oral, express or implied, relating to the subject matter of this Commitment.
(d) The deletion or modification of any Schedule B, Part II—Exception does not constitute an agreement or obligation to provide coverage beyond the terms and provisions of this Commitment or the Policy.
(e) Any amendment or endorsement to this Commitment must be in writing and authenticated by a person authorized by the Company.
(f) When the Policy is issued, all liability and obligation under this Commitment will end and the Company's only liability will be under the Policy.

7. IF THIS COMMITMENT HAS BEEN ISSUED BY AN ISSUING AGENT

The issuing agent is the Company's agent only for the limited purpose of issuing title insurance commitments and policies. The issuing agent is not the Company's agent for the purpose of providing closing or settlement services.

8. PRO-FORMA POLICY

The Company may provide, at the request of a Proposed Insured, a pro-forma policy illustrating the coverage that the Company may provide. A pro-forma policy neither reflects the status of Title at the time that the pro-forma policy is delivered to a Proposed Insured, nor is it a commitment to insure.

9. ARBITRATION

Arbitration provision intentionally removed.

   Proposed Insured: To Be Determined
   Proposed Policy Amount: $ To Be Determined

   (c) ☐ 2006 ALTA® Policy
   Proposed Insured:
   Proposed Policy Amount: $
3. The estate or interest in the Land described or referred to in this Commitment is

   Fee Simple
4. The Title is, at the Commitment Date, vested in:

   El Monte Meadows, LLC, a California limited liability company
5. The Land is described as follows:

   See Exhibit "A" attached hereto and made a part hereof

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

Commitment No.: NCS-1063311-SA1

SCHEDULE B, PART I

Requirements

All of the following Requirements must be met:

A. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.

B. Pay the agreed amount for the estate or interest to be insured.

C. Pay the premiums, fees, and charges for the Policy to the Company.

D. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.

E. Releases(s) or Reconveyance(s) of Item(s): None

F. Other: None

G. You must give us the following information:
   a. Any off record leases, surveys, etc.
   b. Statement(s) of Identity, all parties.
   c. Other: None

The following additional requirements, as indicated by "X", must be met:

[X] H. Provide information regarding any off-record matters, which may include, but are not limited to: leases, recent works of improvement, or commitment statements in effect under the Environmental Responsibility Acceptance Act, Civil Code Section 850, et seq.

The Company's Owner's Affidavit form (as provided by the company) must be completed and submitted prior to close in order to satisfy this requirement. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

[X] I. An ALTA/NSPS survey of recent date, which complies with the current minimum standard detail requirements for ALTA/NSPS land title surveys, must be submitted to the Company for review. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

[X] J. The following LLC documentation is required from:

(i) a copy of the Articles of Organization
(ii) a copy of the Operating Agreement, if applicable
(iii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
(iv) express Company Consent to the current transaction

[] K. The following partnership documentation is required **:**

(i) a copy of the partnership agreement, including all applicable amendments thereto
(ii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
(iii) express Partnership Consent to the current transaction

[] L. The following corporation documentation is required:

(i) a copy of the Articles of Incorporation
(ii) a copy of the Bylaws, including all applicable Amendments thereto
(iii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
(iv) express Corporate Resolution consenting to the current transaction

[X] M. Based upon the Company's review of that certain partnership/operating agreement dated **Not disclosed** for the proposed insured herein, the following requirements must be met:
Any further amendments to said agreement must be submitted to the Company, together with an affidavit from one of the general partners or members stating that it is a true copy, that said partnership or limited liability company is in full force and effect, and that there have been no further amendments to the agreement. This Commitment will then be subject to such further requirements as may be deemed necessary.

[] N. A copy of the complete lease, as referenced in Schedule A, #3 herein, together with any amendments and/or assignments thereto, must be submitted to the Company for review, along with an affidavit executed by the present lessee stating that it is a true copy, that the lease is in full force and effect, and that there have been no further amendments to the lease. This Commitment will then be subject to such further requirements as may be deemed necessary.

[X] O. Approval from the Company's Underwriting Department must be obtained for issuance of the policy contemplated herein and any endorsements requested thereunder. This Commitment will then be subject to such further requirements as may be required to obtain such approval.

[X] P. Potential additional requirements, if ALTA Extended coverage is contemplated hereunder, and work on the land has commenced prior to close, some or all of the following requirements, and any other requirements which may be deemed necessary, may need to be met:

[] Q. The Company's "Indemnity Agreement I" must be executed by the appropriate parties.

Commitment No.: NCS-1063311-SA1

SCHEDULE B, PART II

Exceptions

THIS COMMITMENT DOES NOT REPUBLISH ANY COVENANT, CONDITION, RESTRICTION, OR LIMITATION CONTAINED IN ANY DOCUMENT REFERRED TO IN THIS COMMITMENT TO THE EXTENT THAT THE SPECIFIC COVENANT, CONDITION, RESTRICTION, OR LIMITATION VIOLATES STATE OR FEDERAL LAW BASED ON RACE, COLOR, RELIGION, SEX, SEXUAL ORIENTATION, GENDER IDENTITY, HANDICAP, FAMILIAL STATUS, OR NATIONAL ORIGIN.

The Policy will not insure against loss or damage resulting from the terms and provisions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

1. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I-Requirements are met.

2. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.

3. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.

4. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.

5. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.

6. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.

7. General and special taxes and assessments for the fiscal year 2021-2022, a lien not yet due or payable.

8. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

9. Water rights, claims or title to water, whether or not shown by the public records.

10. An easement for water ditches and pipes and incidental purposes in the document recorded in Book 1228 of Deeds, Page 15.

    The location of the easement cannot be determined from record information.

11. An easement for water ditches and pipes and incidental purposes in the document recorded in Book 634 of Deeds, Page 1.

    The location of the easement cannot be determined from record information.

12. An easement for sewers, drains, ditches, water pipes or other conduits and incidental purposes in the document recorded in Book 4549 of Deeds, Page 119.

    The location of the easement cannot be determined from record information.

13. An easement for underground drain and incidental purposes in the document registered April 08, 1942 as Document No. 5621-K of Torrens.

    The location of the easement cannot be determined from record information.

    In Book 34628, Page 106 Official Records and registered October 23, 1950 as Document No. 33495-S, appears the record of a deed of easement from Thomas W. Bell, who acquired title as Thomas Bell, Jr. and Audrey P. Bell, husband and wife, to the United States of America, granting the right to flood and submerge the easement for an underground drain, reserved by grantors in a deed registered April 08, 1942 as Document No. 5621-K, in the office of the land registrar of Los Angeles County, California, insofar as the reserved interest described therein are concerned, in furtherance of the construction, operation and mai of the Whittier Narrows Flood Control Basin Project and the grantors reserve, however, all other right acquired or held by them, in the aforementioned deed registered April 08, 1942 as Document No. 5621-K on Certificate No. PT-29368, in the office of the land registrar, Los Angeles County, California, together with the right to maintain, repair, renew and/or remove underground drain on the easement reserved in the aforementioned document.

14. Covenants, conditions and restrictions as set forth in the document above mentioned but deleting any covenant, condition, or restriction indicating a preference, limitation or discrimination based on race, color, religion, sex, marital status, ancestry, disability, handicap, familial status, or national origin, to the extent such covenants, conditions or restrictions violate 42 U.S.C. Section 3604(c) or California Government Code Section 12955. Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status.

15. An easement for public utilities and incidental purposes, recorded in Book 38422, Page 309 of Official Records.

In Favor of:	Southern California Edison Company
Affects:	As described therein

16. The right to flood and submerge the interest reserved by Thomas W. Bell, a married man, who acquired title as Thomas Bell, Jr., an unmarried man, in various deeds insofar, as the reserved

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

interests described therein are concerned, in furtherance of the construction, operation and maintenance of the Whittier Narrows Flood Control Basin Project, said interests being the undivided one-half of oil, gas and other hydrocarbon substances in the former registered portion of said land, as granted by the deed from Thomas W. Bell, a married man to the United States of America registered October 27, 1953 as Instrument No. 19549-V Torrens.
Said Deed recites:
In the exercise of the rights reserved under the aforementioned deeds, the grantor in the exploration and/or development of such reserved interests, shall not erect nor maintain any wooden structures, oils, sumps, mud or water sumps, storage tanks or other structures, which may result in floatable debris and the reserved rights shall not be exercised so as to cause pollution of the soils and waters of the Whittier narrows flood control basin.

17. An easement for pole lines and incidental purposes, recorded September 01, 1955 in Book 48844, Page 377 of Official Records.
In Favor of: Southern California Edison Company
Affects: As described therein

18. An easement and perpetual right in favor of the United States of America to overflow, flood and submerge said land designated as Parcel Q-1409, pursuant to the covenants and conditions, as provided in an order and judgment entered September 08, 1955, in an action by United States of America in Case No. 9103, United States District Court Civil.

A certified copy of said order was recorded October 09, 1958 in Book M131, Page 58, Official Records.

The location of the easement cannot be determined from record information.

19. An easement for storm drain and slope and incidental purposes, recorded February 05, 1965 as Instrument No. 3954 in Book D2790, Page 298 of Official Records.
In Favor of: Los Angeles County Flood Control District, a Body Corporate and Politic of the State of California
Affects: As described therein

20. The terms and provisions contained in the document entitled "Resolution Setting Aside Portion of County-Owned Property for Public Road and Highway Purposes - Santa Anita Avenue (17-4B), Vicinity of South El Monte - R-5326300295" recorded August 28, 1986 as Instrument No. 86-1130744 of Official Records.

21. The effect of a map purporting to show the land and other property, filed in Book 320, Page 76 of Record of Surveys.

22. Any facts, rights, interests or claims which would be disclosed by a correct ALTA/NSPS survey.

23. Rights of parties in possession.

24. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.

25. All visible and apparent easements or uses and all underground easements or uses, the existence of which may arise by unrecorded grant or by use.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 04/27/2021 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 04/27/2021 has revealed that there is 1 SEMS

site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

EXXONMOBIL OIL CORP EPA ID:: CAL000056178	1100 N SANTA ANITA A	NE 1/8 - 1/4 (0.193 mi.)	D33	104

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/23/2021 has revealed that there are 8 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 5 CPS-SLIC sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 3 UST sites within approximately 0.25 miles of the target property.

State and tribal voluntary cleanup sites

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 04/23/2021 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

AOCONCERN: San Gabriel Valley areas where VOC contamination is at or above the MCL as designated by region 9 EPA office. Date of Government Version: 3/30/2009 Exide Site area is a cleanup plan of lead-impacted soil surrounding the former Exide Facility as designated by the DTSC. Date of Government Version: 7/17/2017

A review of the AOCONCERN list, as provided by EDR, has revealed that there is 1 AOCONCERN site within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 7 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SAN GABRIEL VALLEY (AREA 1) (Continued) **1000114959**

Summary Details:

Conditions at listing September 1983): San Gabriel Valley Area 1) is a ground water plume that runs along the axis of the Rio Hondo Wash and the Salt Pit Wash in the San Gabriel ground water basin in El Monte, Los Angeles County, California. The plume also parallels the San Gabriel River to the east. It is approximately 4 miles long and 1.5 miles wide. Ground water is contaminated with trichloroethylene TCE), perchloroethylene PCE), and carbon tetrachloride CTC) according to analyses by State agencies and local water companies. Many public wells in this area exceed the EPA Suggested No Adverse Response Levels SNARL) for TCE and PCE. Approximately 200,000 people are affected. Cities and public water companies in the area have tested to ensure that their water supplies contain less than 5 parts per billion ppb) of TCE and 4 ppb PCE, levels considered safe for human consumption. When alternative methods of reducing the TCE and PCE levels below such levels are not effective, wells are removed from service. Currently, three small mutual water companies have no alternate water supply and have advised their customers to use bottled water. Status June 1984): As a result of EPA s analysis of initial remedial measures, completed in December l983, EPA will install water treatment systems to provide clean water to two of the three companies that have no alternate supply. The third company has already purchased a treatment system and will begin operation of the system soon. A supplemental sampling program of contaminated wells will begin soon to get a snapshot view of the degree of contamination. The State Department of Health Services and EPA arepreparing to initiate a remedial investigation/feasibility study to determine the aerial and vertical extent of contamination and to develop alternatives for treatment and management of the problem. EPA continues its investigation to identify sources of contamination. This site, along with the three other San Gabriel Valley sites, was added to the NPL in May 1984 because it involves a serious problem that required taking immediate remedial action.

NPL:

NPL Status:	Currently on the Final NPL
Category Description:	Depth To Aquifer-> 100 Feet
Category Value:	135

Environmental Interest/Information System:
SUPERFUND NPL
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Site Name:	CHINCHAS AUTO BODY
Violation Date:	12-09-2019
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 12/09/2019. OBSERVATION: 1x 55 gallon drum of used paint and 1x 55 gallon drum of used paint filters located in the waste storage was observed without a hazardous waste label. CORRECTIVE ACTION: Submit a photo to the CUPA demonstrating that the container listed above has been properly labeled. (Labels provided during inspection, corrected on site.)
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW
Violation Source:	CERS
Site ID:	559880
Site Name:	CHINCHAS AUTO BODY
Violation Date:	08-29-2016
Citation:	22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description:	Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes:	Returned to compliance on 09/13/2018. OBSERVATION: This facility does

CHINCHAS AUTO BODY (Continued) **S124929959**

not have a valid EPA ID number to manage hazardous waste. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an EPA ID number. CORRECTIVE ACTION: Immediately obtain an EPA ID number through DTSC to manage hazardous waste and submit evidence to the CUPA within 30 days.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Name: JAMES S LORENZO MACHINE
Violation Date: 01-12-2016
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain and/or maintain an Active EPA ID.
Violation Notes: Returned to compliance on 04/04/2016. OBSERVATION: This facility does not have an EPA Identification number to manage hazardous waste. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an EPA ID number. CORRECTIVE ACTION: Immediately obtain an EPA ID number through the Department of Toxic Substances Control (DTSC) to manage hazardous waste. A hazardous waste generator shall not treat, store, dispose of, transport, or offer for transportation, hazardous waste without an active EPA ID number.
Violation Division: Los Angeles County Fire Department
Violation Program: HW

Violation Date: 08-07-2019
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes: Returned to compliance on 05/28/2020. OBSERVATION: The business failed to update business plan within 30 days when one of the following occurs: a 100 percent or more increase in the quantity of a previously disclosed material; any handling of a previously undisclosed hazardous material (solvent in 55-gal drum outside); a change of business address, business ownership, or business name; or a substantial change in the handler's operations that requires modification to any portion of the business plan. CORRECTIVE ACTION: Update all submittal elements effected by the change(s) and electronically submit the update within 30 days.

Violation Date:	01-12-2016
Citation:	HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)
Violation Description:	Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 01/19/2016. OBSERVATION: A hazardous materials business plan has not been received by the CUPA. The owner/operator failed to electronically submit its business plan to the statewide information management system, CERS (California Environmental Reporting System). HSC 25508(a)(1) CORRECTIVE ACTION: Submit the business plan electronically in the California Environmental Reporting System (CERS) and implement immediately. Go to CERS internet website (http://cers.calepa.ca.gov/) and establish an account. After an account is created, complete CERS Online Business Plan and submit. Include: 1) Business Activities 2) Business Owner/Operator Identification 3) Hazardous Materials Inventory 4) Site Map 5) Emergency Response/Contingency Plan 6) Employee Training Plan. If you need assistance contact the Los Angeles County Fire Department Data Operations section at 323-890-4000.

Violation Date:	08-07-2019
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 05/22/2020. OBSERVATION: Owner/Operator is a small quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles), or has failed to comply with the conditions of CCR 66262.34(d) and has stored hazardous waste over 90 days. CORRECTIVE ACTION: Dispose of hazardous waste (waste oil-coolant mixture) that has been stored over the applicable time limit and provide documentation that the violation has been corrected.

JAMES S LORENZO MACHINE (Continued) **S106769876**

Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes: Returned to compliance on 05/22/2020. OBSERVATION: Approximately 10 drums were observed in the backyard without labels. CORRECTIVE ACTION: Submit photos/documentation to this department demonstrating that the empty containers listed above have been marked with the date they were emptied and are being properly managed pursuant to 22 CCR 11 66261.7.

Violations:
Site ID: 64926
Site Name: H&S Energy Products, LLC #2042
Violation Date: 08-27-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Property History:	The site consists of two separate sections of land which once comprised the control area and the administrative and launch area. A total of 40.69 acres were acquired between 1954 and 1962. 10.36 acres by fee, 29.00 acres by use permit, 1.29 acres by lease and 0.04 acre by license. The site was reported excess to the General Services Administration GSA on 26 June 1969. At the former administrative launch area, 1.29 acres lease terminated in 1965. 11.29 acres permit was returned to the Army civil works and 17.61 acres was conveyed to the U.S Air Force. The Air Force issued license to the California Air National Guard for year-round training and support. At the control site, 2.27 acres fee was conveyed to the Department of Commerce NOAA on 14 October 1971. The property was transferred to the city of Los Angeles by Quitclaim deed on 21 February 1974. The remaining 7.99 acres fee was conveyed to the city on November 1972 by quitclaim deed. Both deeds contain stipulations that the property will be used and maintained for public park or recreational purposes. Neither deed contains a restoration clause.

Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 07/01/2013
Comments: Long-term water production agreement.Multi-Party Water Production Agreement. O&M of the interim remedy requires a multi-party water production agreement to account for the volume of water extracted against water rights. In addition, the water production agreement will allow for "rare occasion" water extraction and discharge that is not accounted against anyone's water rights.

Agency Type:	Private
SIC Code:	4213
SIC Code 2:	Not reported
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	STORMS
Waste Type2:	Not reported
Waste2:	Stormwater Runoff
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/07/2020

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 03/24/2021
Date Data Arrived at EDR: 05/11/2021
Date Made Active in Reports: 07/28/2021

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

825 LEXINTON-GALLATIN
825 LEXINGTON-GALLATIN ROAD
SOUTH EL MONTE, CA 91733

TARGET PROPERTY COORDINATES

Latitude (North):	34.037361 - 34° 2' 14.50''
Longitude (West):	118.053104 - 118° 3' 11.17''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	402786.5
UTM Y (Meters):	3766604.0
Elevation:	221 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5630799 EL MONTE, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

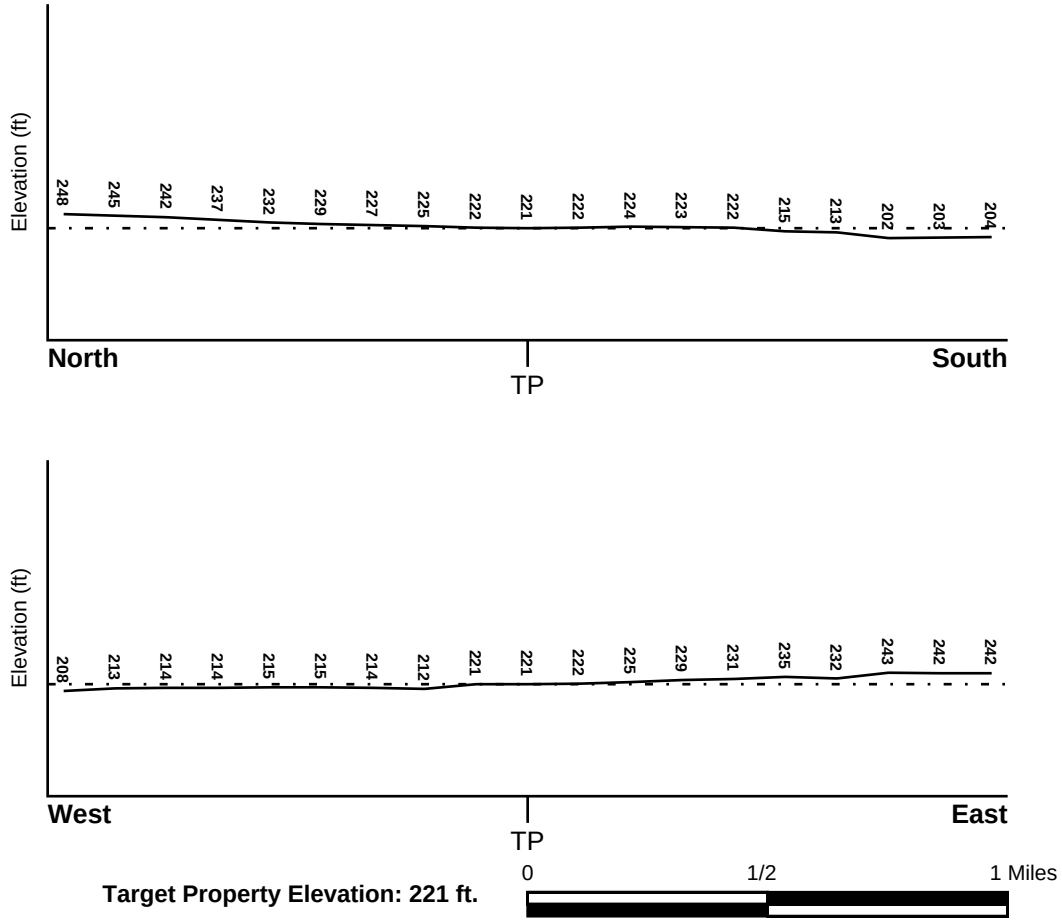
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 221 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1670F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1665F	FEMA FIRM Flood data
06037C1664F	FEMA FIRM Flood data
06037C1668F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
EL MONTE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
106	1/2 - 1 Mile ESE	S
1G	1/2 - 1 Mile ESE	S

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

APPENDIX D: QUALIFICATIONS

PARTNER

PARTNER

Heather Hodgetts
Senior Scientist

Education
B.A. in Earth Sciences, University of Southern California

Training
40-Hour OSHA-approved Health & Safety Training
8-hour OSHA HAZWOPER Annual Refresher

Highlights
20 years in the environmental consulting industry
Phase I Environmental Site Assessments
Phase II and III Subsurface Investigations

Experience Summary
As a Senior Scientist for due diligence services within the Investment Advisory Group, Ms. Hodgetts focuses on providing solutions to clients' due diligence and engineering needs and sharing years of expertise with staff and clients. Previously, Ms. Hodgetts was a Senior Environmental Scientist for a Fortune 500 company and was responsible for managing due diligence projects throughout the United States.

Ms. Hodgetts has performed hundreds of Phase I Environmental Site Assessments, Third Party Reviews, Due Diligence Audits, and Record Search, Phase II Subsurface Investigations, Underground Storage Tank Investigations, Remedial Investigations, Limited asbestos surveys, Lead-based paint surveys, Radon Studies, and Lead-in-water sampling and analysis.

Ms. Hodgetts has worked with various clients including: individual investors, institutional investors, private and institutional equity companies, insurance companies, attorneys, brokers, developers, and multiple lenders.

Project Experience
Phase I Environmental Site assessments

Ms. Hodgetts has performed Phase I Environmental Site Assessments of commercial, residential, and industrial properties including schools, shopping centers, industrial parks, manufacturing facilities, drycleaners and gasoline stations.

Subsurface Investigations

Conducted soil and groundwater assessments at County of San Diego Department of Public Works Road Stations throughout San Diego County. Activities included field oversight of groundwater monitoring well installation using mud-rotary, air-rotary, and hollow-stem augers; soil and groundwater sampling; receptor surveys; and installed monitoring wells and soil borings.

Environmental Regulatory Compliance

Assisted in environmental regulatory compliance audit and ownership transfer activities. The audit included coordinating with local agencies to transfer environmental permits for air, wastewater, hazardous waste, and medical waste.

Storage Tank Programs

Completed UST Closure Reports, Limited Site Assessments, Soil Assessment Reports, Soil Closure Reports, and Corrective Action Plans for submittal to regulatory agencies for UST sites owned by various industrial and government entities.

School District Investigations

Worked in-house for San Diego Unified School District (SDUSD) for 15 months completing the environmental due diligence for Proposition MM, a bond measure passed by voters to fund modernization of 165 existing school and construction of 16 new/rebuilt schools. Activities included: conducting Phase I ESAs for proposed school sites, including information relevant to the California Department of Education (CDE) School Site Selection and Approval Guide; submitting Phase I ESAs for EPA Department of Toxic Substances Control review; preparing Public Participations Plans and assisting with public meeting presentations; and submitting site packages to CDE for site approval. In addition to SDUSD, Ms. Hodgetts has also worked on Los Angeles Unified School District, Coronado Unified School District, and Lake Elsinore Unified School District sites.

Subsurface Investigations

Conducted soil and groundwater assessments at County of San Diego Department of Public Works Road Stations throughout San Diego County. Activities included field oversight of groundwater monitoring well installation using mud-rotary, air-rotary, and hollow-stem augers; soil and groundwater sampling; receptor surveys; and installed monitoring wells and soil borings.

Environmental Regulatory Compliance

Assisted in environmental regulatory compliance audit and ownership transfer activities. The audit included coordinating with local agencies to transfer environmental permits for air, wastewater, hazardous waste, and medical waste.

Cellular Telephone Investigations

Performed environmental assessments for cellular telephone antenna installations for a major cellular operator. Tasks included: inspections of numerous buildings, installations, additions, collocations, and vacant land; and asbestos and lead sampling at these facilities throughout southern California.

Over 25 years of experience in the environmental service industry with a focus on due diligence assessments
Knowledgeable with ASTM, EPA's All Appropriate Inquiry (AAI), and customized client formats.
100+ Phase I Environmental Site Assessments

Experience Summary
As Technical Director for due diligence services as part of the Investment Advisory Group, Ms. Stott focuses on report quality, client service, and sharing her years of expertise with staff and clients.

Ms. Stott has performed hundreds of Phase I Environmental Site Assessments, Third Party Reviews, Due Diligence Audits, Record Search and Risk Assessments, Phase II and III Subsurface Investigations, Underground storage tank investigations, Remedial Investigations, Radon Studies, Mold Assessments, Methane Surveys, Indoor Air Quality Assessments, and Lead-in-water sampling and analysis.

Clients have varied and have included: individual investors, City of Los Angeles Agencies, Los Angeles County, City of Anaheim, institutional investors, private and institutional equity companies, insurance companies, attorneys, brokers, developers, and multiple lenders.

Project Experience
Ms. Stott has conducted, managed and directed thousands of ESAs throughout her career and has been Senior Project Manager for hundreds of site investigations, characterization studies and remediation projects throughout California and the US. The following select projects summarize her experience and due diligence background:

Transaction Due Diligence
Project Manager, Western US and Southern California, LBA Realty. For over 16 years performed due diligence services related to real estate transfers as well as asset refinances for LBA Realty. The relationship requires close coordination and communication with property managers and representatives to provide a smooth process with client and lenders. Services have also included review of third party reports, asbestos surveys, subsurface investigations, and development of soil management plans. Many projects involved multiple locations in several states thus requiring coordination with other offices and client contacts.

Environmental Lead, West Coast, Barings, LLC (Barings). Ms. Stott assists with management and review of environmental due diligence and environmental actions associated with acquisitions, property development, joint venture developments, property divestments and finance group loan transactions. Environmental due diligence includes Phase I ESAs, Phase II ESAs, indoor air quality assessments, mold assessment and mitigation planning, providing third party review, asbestos investigations, asbestos abatement, operation and maintenance plan development, remedial action development and implementation, regulatory correspondence and permitting.

Phase I ESAs – multiple clients throughout US.. Ms. Stott manages and oversees preparation of Phase I Environmental Site Assessments for several confidential clients. All are completed to ASTM guidelines with various special criteria specific to each client.

Subsurface Investigations/Vapor Intrusion

Project Manager, Whittier, CA, Confidential Client. Conducted several investigations to evaluate the potential for vapor intrusion associated with contaminated groundwater into client buildings. At one location a horizontal well system was installed to passively vent vapors. Site investigations involved the installation of multiple, multi-depth vapor probes through the property to map the plume and to assist in decision making for potential further investigation. Data collected from both soil vapor and indoor air monitoring was subjected to risk assessment in order to determine if indoor air quality had been negatively impacted and engineering controls needed to protect workers. Client was able to purchase and redevelop portions of the desired parcels for use as parking.

Project Manager and Environmental Lead, Berkeley, CA, LBA Realty. Evaluation of potential risks associated with the presence of trichloroethylene (TCE) and breakdown products cis 1,2- dichloroethene (cis 1,2-DCE) and vinyl chloride (VC), and methyl tert butyl ether (MTBE) in groundwater and ambient air at an existing building in Berkeley, CA. Worked with outside counsel to evaluate, summarize, and present the risks and potential risks of continued investment in the property. Remedial systems were installed under DTSC oversight, risk assessment performed and the building remodeled and reused for office space.

Municipal/State Contracts

Project Manager, ESAs for City of Anaheim widening of Lincoln Avenue. As a subcontractor to the geotechnical consultant, Partner provided Environmental Site Assessments for multiple properties along the project alignment. The parcel uses ranged from car wash, to older office and motel properties, automotive repair, banks, public school, and a church. Partner finished the multi-site project on time and within budget.

PHASE I ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE

The following questionnaire is required by the ASTM Standard E1527-13 and E1527-21, which adheres to the All Appropriate Inquiries (AAI) Rule (United States Environmental Protection Agency) (40 CFR 312).

As defined by ASTM, the User of the report is the *"party seeking to use Practice E1527 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. The user has specific obligations for completing a successful application of this practice."*

PROPERTY ADDRESS:	825 Lexington-Gallatin
PROPERTY CITY, STATE ZIP:	South El Monte, CA

1. **Environmental liens that are filed or recorded against the property (40 CFR 312.25)**

   Did a search of land title records (or judicial records) identify any environmental liens filed or recorded against the subject property under federal, tribal, state or local law?

   [ ] YES [X] NO

2. **Activity and use limitations (AULs) that are in place on the subject property or that have been filed or recorded against the subject property (40 CFR 312.26(a)(1)(v) and (vi))**

   Did a search of land title records (or judicial records) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded against the subject property under federal, tribal, state or local law?

   [X] YES [ ] NO Per conversation with Mr. Martinez, response is No

3. **Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)**

   Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

   [ ] YES [X] NO

PARTNER

4. Relationship of the purchase price to the fair market value of the subject property if it were not contaminated (40 CFR 312.29)

Does the purchase price being paid for this subject property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject property?

[X] YES [ ] NO

---

5. Commonly known or reasonably ascertainable information about the Property (40 CFR 312.30)

Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases?

[ ] YES [X] NO

---

a. Do you know the past uses of the subject property?

[X] YES [ ] NO

---

b. Do you know of specific chemicals that are present or once were present at the subject property?

[ ] YES [X] NO

---

c. Do you know of spills or other chemical releases that have taken place at the subject property?

[ ] YES [X] NO

---

d. Do you know of any environmental cleanups that have taken place at the subject property?

[ ] YES [X] NO

---

e. Do you have any prior knowledge that the subject property was developed as a gas station, drycleaner, manufacturing/industrial facility in the past?

[ ] YES [X] NO

---

f. Are you aware of historical use of hazardous materials or petroleum products used or present on the subject property?

[ ] YES [X] NO

---

g. Do you know if the property is currently or was formerly equipped with underground storage tanks (USTs) or septic tanks?

[ ] YES [X] NO

h. Do you know of any past, threatened or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the subject property?

[ ] YES [X] NO

6. The degree of obviousness of the presence or likely presence of contamination at the subject property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

Based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of releases at the subject property?

[ ] YES [X] NO

RE: PRA of February 24, 2025, Reference # W079362-022425.

Dear Carol Noland,

The Los Angeles County Fire Department, Health Hazardous Materials Division, being the custodian or keeper of records, certify that a thorough search for the records you requested has been carried out.

Re: 825 LEXINGTON GALLATIN RD SITE ID: 12087
SOUTH EL MONTE CA 91733

The search revealed that your noted address did not match our database.

It should be understood that this does not mean that the records you requested do not exist. It is possible that such records may be misfiled; exist under another spelling, another name, or may have been destroyed based on this Department's Record Retention Policy. However, with the information furnished to our office, and to the best of our knowledge, no records were located.

For businesses in Burbank, Culver City, Downey, City of LA, La Habra, Monrovia, Pasadena, Santa Monica, Torrance & Underground Storage Tanks in Los Angeles County jurisdiction click here.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Violation Description:

Failure to comply with one or more of the following overfill prevention equipment requirements:
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or
Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or
Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or
Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overfill prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Inspected by a certified UST service technician.

Maintain records of overfill prevention equipment inspection for 36 months.

Violation Description:

Failure to comply with one or more of the following overfill prevention equipment requirements:
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or
Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or
Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or
Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overfill prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Inspected by a certified UST service technician.

Maintain records of overfill prevention equipment inspection for 36 months.

Violation Description:

"Failure to meet one or more of the following requirements:

Install or maintain a liquid-tight spill container.

Have a minimum capacity of five gallons.

Have a functional drain valve or other method for the removal of liquid from the spill container.

Be resistant to galvanic corrosion.

Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container.

Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Tested by a certified UST service technician.

Maintain records of spill containment testing for 36 months.

Violation Description:

Failure to comply with one or more of the following overfill prevention equipment requirements:
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or

Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or
Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or
Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overfill prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Inspected by a certified UST service technician.

Maintain records of overfill prevention equipment inspection for 36 months.

Envirostor ID: 60002693
Site History:

The Site is a 3.85 acre vacant lot which was most recently occupied by a motor home manufacturing facility. The Site is located within a mixed commercial, industrial, and residential area of South El Monte, California. According to the Los Angeles County Assessorï¿½s Office, the Site consists of three parcels, including: Assessor Parcel Number (APN): 8118-019-900 and APN: 8118-019-901 (1204 Santa Anita Avenue), and APN: 8118-019-902 (1144 Santa Anita Avenue). According to available historical sources, the Site was formerly utilized as a motor home manufacturing facility and improved with multiple structures that were developed beginning in the early 1950s. The structures were demolished in 2009 with only the building slabs and asphalt/concrete paving sections remaining onsite.
The immediately surrounding properties consist of Santa Anita Avenue to the northwest, followed by undeveloped land, a commercial building, and a Chevron Gas Station farther to the west; Santa Anita Business Park and Santa Anita Commerce Center to the northeast; a residential development to the southeast; and various commercial and light industrial structures to the southwest.
ï¿½ R & R Custom Coach Works formerly occupied the Site under a historic/former property address (1126 Santa Anita Avenue) and is listed as a Resource
Conservation and Recovery Act Small Quantity Generator (RCRA-SQG). No information or records concerning historical housekeeping practices were available

at the time of this writing.

ï¿½ The Site is listed as a Statewide Environmental Evaluation and Planning System (SWEEPS) Underground Storage Tank (UST) site. No additional information or records concerning current or former UST(s) were available.
ï¿½ The Site is located within a region of known groundwater contamination designated by the United States Environmental Protection Agency (USEPA) as a National Priority List (NPL) site. Groundwater beneath the San Gabriel Valley has been impacted by VOCs, predominantly tetrachloroethene (PCE) and trichloroethene (TCE).
ï¿½ Extensive staining was observed on a building slab located in the western portion of the Site. No further information concerning materials utilized during the historical manufacture of motor homes on the Site.
ï¿½ The Phase I ESA Report recommended performing a geophysical subsurface survey at the Site to identify and locate any USTs, underground structures, and/or other subsurface features which may have contained hazardous substances, and that a Phase II ESA be performed to confirm or deny the presence of contaminants at the Site.
VOCs and metals are the COCs.

VIMS Plan in 2019 and installed in 2021.Construction of residences completed in 2021.

VIMS report was submitted in 2022 and approved.

Site closed with NFA in 2022.

Property History:	

Feature Description:

The site consists of two separate sections of land which once comprised the control area and the administrative and launch area. A total of 40.69 acres were acquired between 1954 and 1962. 10.36 acres by fee, 29.00 acres by use permit, 1.29 acres by lease and 0.04 acre by license. The site was reported excess to the General Services Administration GSA on 26 June 1969.

At the former administrative launch area, 1.29 acres lease terminated in 1965. 11.29 acres permit was returned to the Army civil works and 17.61 acres

was conveyed to the U.S Air Force. The Air Force issued license to the California Air National Guard for year-round training and support.

At the control site, 2.27 acres fee was conveyed to the Department of Commerce NOAA on 14 October 1971. The property was transferred to the city of Los Angeles by Quitclaim deed on 21 February 1974. The remaining 7.99 acres fee was conveyed to the city on November 1972 by quitclaim deed. Both deeds contain stipulations that the property will be used and maintained for public park or recreational purposes. Neither deed contains a restoration clause.

Potential Contaminants Of Conc:

1,4-DIOXANE
N-NITROSODIMETHYLAMINE
TETRACHLOROETHYLENE (PCE)
TRICHLOROETHYLENE (TCE)

Site History:

The Whittier Narrows Operable Unit is one of eight OUs established by the USEPA for the San Gabriel Valley Superfund Site and is located within San Gabriel Valley Superfund Site Area 1. Whittier Narrows is a 1.5-mile gap in the bedrock hills that separates the San Gabriel and Central Basins and represents the primary discharge point for groundwater and surface water flow exiting the San Gabriel Basin. USEPA designated Whittier Narrows as an OU specifically to address groundwater contamination flowing out of the San Gabriel Basin, through Whittier Narrows, into the Montebello Forebay portion of the Central Basin. The OU is bounded to the north by the South El Monte OU (at Highway 60) and to the south by the Montebello Forebay portion of the Central Basin (near the Whittier Narrows Dam).

Chlorinated volatile organic compounds (VOCs), 1,4-dioxane, and n-nitrosodimethylamine (NDMA) are the primary groundwater contaminants found in the Whittier Narrows Operable Unit (WNOU). Tetrachloroethene (PCE) is the most prevalent VOC exceeding drinking water standards in the WNOU. USEPA has not identified any significant sources of VOC and 1,4-dioxane contamination in the WNOU. Hence, the VOC and 1,4-dioxane contamination is migrating into the OU from upgradient industrial sources within the San Gabriel Basin. The contamination being addressed by the interim remedy largely appears to originate from the South El Monte OU, located immediately north of the WNOU.

The interim remedy for the WNOU is identified in USEPA's Interim Record of Decision (IROD) Amendment issued in November 1999. The overall remedial action includes containment of contaminated groundwater north of Whittier Narrows Dam using extraction wells near San Gabriel Boulevard, Rosemead Boulevard, and Siphon Road. The extracted groundwater is piped to a centralized treatment plant for treatment to remove VOCs. Under normal operating conditions, treated water is then conveyed to the designated end uses which are potable, drinking-water use and use to maintain the water level in Legg Lakes. The project is expected to operate for as long as contaminant concentrations in groundwater moving through Whittier Narrows exceed state or federal drinking water standards.

USEPA and the City of Whittier (City) operated the system from 2002 until May 16, 2013. The City used the treated water for drinking water supply from December 2005 until March 2013. Regulatory oversight for operation and maintenance of this interim remedy transferred to the State on May 17, 2013. Since the transfer, DTSC and its operator (San Gabriel Valley Water Company (SGVWC)) have been operating the system. Until USEPA constructs infrastructure to connect SGVWC to the system (a $5.5M project is underway) and the California Department of Public Health approves the system for drinking water use, all treated water is being sent to Legg Lakes.

Document Type: Other Report
Activity Type: Completed Activities
Date Completed: 7/1/2013
Comments: Long-term water production agreement.Multi-Party Water Production Agreement. O&M of the interim remedy requires a multi-party water production agreement to account for the volume of water extracted against water rights. In addition, the water production agreement will allow for "rare occasion" water extraction and discharge that is not accounted against anyone's water rights.

Envirostor ID: 60001340
Site History:

The Whittier Narrows Operable Unit is one of eight OUs established by the USEPA for the San Gabriel Valley Superfund Site and is located within San Gabriel Valley Superfund Site Area 1. Whittier Narrows is a 1.5-mile gap in the bedrock hills that separates the San Gabriel and Central Basins and represents the primary discharge point for groundwater and surface water flow exiting the San Gabriel Basin. USEPA designated Whittier Narrows as an OU specifically to address groundwater contamination flowing out of the San Gabriel Basin, through Whittier Narrows, into the Montebello Forebay

portion of the Central Basin. The OU is bounded to the north by the South El Monte OU (at Highway 60) and to the south by the Montebello Forebay portion of the Central Basin (near the Whittier Narrows Dam).

Chlorinated volatile organic compounds (VOCs), 1,4-dioxane, and n-nitrosodimethylamine (NDMA) are the primary groundwater contaminants found in the Whittier Narrows Operable Unit (WNOU). Tetrachloroethene (PCE) is the most prevalent VOC exceeding drinking water standards in the WNOU. USEPA has not identified any significant sources of VOC and 1,4-dioxane contamination in the WNOU. Hence, the VOC and 1,4-dioxane contamination is migrating into the OU from upgradient industrial sources within the San Gabriel Basin. The contamination being addressed by the interim remedy largely appears to originate from the South El Monte OU, located immediately north of the WNOU.

The interim remedy for the WNOU is identified in USEPA's Interim Record of Decision (IROD) Amendment issued in November 1999. The overall remedial action includes containment of contaminated groundwater north of Whittier Narrows Dam using extraction wells near San Gabriel Boulevard, Rosemead Boulevard, and Siphon Road. The extracted groundwater is piped to a centralized treatment plant for treatment to remove VOCs. Under normal operating conditions, treated water is then conveyed to the designated end uses which are potable, drinking-water use and use to maintain the water level in Legg Lakes. The project is expected to operate for as long as contaminant concentrations in groundwater moving through Whittier Narrows exceed state or federal drinking water standards.

USEPA and the City of Whittier (City) operated the system from 2002 until May 16, 2013. The City used the treated water for drinking water supply from December 2005 until March 2013. Regulatory oversight for operation and maintenance of this interim remedy transferred to the State on May 17, 2013. Since the transfer, DTSC and its operator (San Gabriel Valley Water Company (SGVWC)) have been operating the system. Until USEPA constructs infrastructure to connect SGVWC to the system (a $5.5M project is underway) and the California Department of Public Health approves the system for drinking water use, all treated water is being sent to Legg Lakes.

Sub Area Link:
Document Type: Other Report
Date Completed: 7/1/2013
Comments: Long-term water production agreement.Multi-Party Water Production Agreement. O&M of the interim remedy requires a multi-party water production agreement to account for the volume of water extracted against water rights. In addition, the water production agreement will allow for "rare occasion" water extraction and discharge that is not accounted against anyone's water rights.
