

SAN GABRIEL VALLEY WATER COMPANY

September 12, 2025

Subject: Central Avenue Pipeline Improvement
Central Avenue Between Schmidt Road and Garvey Avenue
Alley East of Central Avenue
Our Job No. 10089L

Dear Resident:

As part of our ongoing capital improvement project, San Gabriel Valley Water Company will be installing a new water line in the street fronting your property at the subject location. The project will add new 6-inch and 8-inch diameter pipes. The new pipeline will provide reliable water service and improve the hydraulics of the water system for your neighborhood. Our project is anticipated to start on September 22, 2025 and will take approximately eight (8) weeks to complete the pipeline installation.

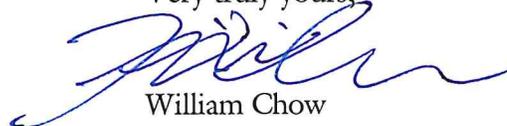

During construction, San Gabriel Valley Water Company's contractor will place temporary pavement over the utility trench to allow normal traffic conditions to resume and to allow residents access to their properties. When the full length of the pipeline is completely installed, San Gabriel Valley Water Company's contractor will restore the street surfaces at the subject location by installing permanent asphalt pavement. This will require about another five days of work approximately two to four weeks after completion of the pipeline installation to complete the paving work.

Except for occasional short delays, you will have complete access to your property during the construction period. If any disturbance of landscaping or concrete work on your property is required to complete the installation of our facilities, these items will be restored to their original conditions just prior to construction. Please be assured that we will make every effort to minimize any inconvenience to you.

If you have any question about our project or need additional information, please call Julian DeSigio Construction Inc., at (626) 480-8900 or William Chow, San Gabriel Valley Water Company's Field Engineer, at (626) 448-2223. Outside of normal business hours, please call (626) 448-4029 and talk to a San Gabriel Valley Water Company's Dispatcher who is available 24 hours a day, 7 days a week, day and night.

Thank you for your understanding and cooperation.

Very truly yours,

William Chow
Assistant Field Engineer
